**No. S 786**

STRATEGIC GOODS (CONTROL) ACT  
(CHAPTER 300)

STRATEGIC GOODS (CONTROL)  
ORDER 2020

ARRANGEMENT OF PARAGRAPHS

Paragraph

1. Citation and commencement
  2. Strategic goods and strategic goods technology
  3. Revocation
- The Schedule
- 

In exercise of the powers conferred by section 4A(1) of the Strategic Goods (Control) Act, the Minister for Trade and Industry makes the following Order:

**Citation and commencement**

1. This Order is the Strategic Goods (Control) Order 2020 and comes into operation on 16 November 2020.

**Strategic goods and strategic goods technology**

2. The goods and technology specified in the Schedule are strategic goods and strategic goods technology, respectively, for the purposes of the Act.

**Revocation**

3. The Strategic Goods (Control) Order 2019 (G.N. No. S 532/2019) is revoked.

---

---

## THE SCHEDULE

Paragraph 2

### PART 1

#### MILITARY GOODS THE EXPORT, TRANSHIPMENT OR BRINGING IN TRANSIT OF WHICH, AND TECHNOLOGY THE EXPORT OR TRANSMISSION OF WHICH, REQUIRE A PERMIT

##### *Division 1 — Preliminary Provisions*

##### *Subdivision 1 — General Notes*

1. Non-controlled goods (including plant) containing one or more controlled components set out in Division 2 are to be considered controlled goods within Division 2, if the controlled components are the principal element of the non-controlled goods and can feasibly be removed or used for other purposes.
2. In determining whether goods are to be considered the principal element of other goods for the purposes of paragraph 1, factors such as the quantity, value and technological know-how involved, and other special circumstances which might establish the goods as the principal element of those other goods, must be weighed.
3. Goods specified in Division 2 include both new and used goods.
4. Chemicals in Division 2 are listed by name and CAS number. Chemicals of the same structural formula (including hydrates) as chemicals listed in Division 2 are to be considered as coming within the descriptions of the second-mentioned chemicals regardless of name or CAS number. CAS numbers are shown in order to assist in identifying whether a particular chemical or mixture is a chemical within Division 2, irrespective of nomenclature. CAS numbers are not intended to be used as unique identifiers, because some forms of the listed chemical have different CAS numbers, and mixtures containing a listed chemical may also have different CAS numbers.
5. Specially formulated pharmaceutical products that contain any item under Category Code ML8 in Division 2 are not treated as coming under that Division.
6. An aircraft is not treated as coming under Category Code ML10 in Division 2, if it has no item listed in that Division and it is not configured for military use.

---

*Subdivision 2 — Definitions of Words and  
Expressions in this Part*

---

7. In this Part, a word or expression in quotation marks (“ ”) takes the definition set out against it in this paragraph:

“additives” (ML8) means substances used in explosive formulations to improve their properties;

“aircraft” (ML8, ML10, ML14) means a fixed wing, swivel wing, rotary wing (helicopter), tilt rotor or tilt-wing airborne vehicle;

“automated command and control systems” (ML11) means electronic systems, through which information essential to the effective operation of the grouping, major formation, tactical formation, unit, ship, subunit or weapons under command is entered, processed and transmitted. This is achieved by the use of computer and other specialised hardware designed to support the functions of a military command and control organisation. The main functions of an automated command and control system are the efficient automated collection, accumulation, storage and processing of information; the display of the situation and the circumstances affecting the preparation and conduct of combat operations; operational and tactical calculations for the allocation of resources among force groupings or elements of the operational order of battle or battle deployment according to the mission or stage of the operation; the preparation of data for appreciation of the situation and decision-making at any point during operation or battle; and computer simulation of operations;

“biocatalysts” (ML7, ML22) means enzymes for specific chemical or biochemical reactions or other biological compounds which bind to and accelerate the degradation of CW agents;

“biological agents” (ML7) means pathogens or toxins, selected or modified (such as by altering the purity, shelf life, virulence, dissemination characteristics, or resistance to UV radiation) to produce casualties in humans or animals, degrade equipment or damage crops or the environment;

“biopolymers” (ML7) means any of the following biological macromolecules:

- a. Enzymes for specific chemical or biochemical reactions;
- b. ‘Anti-idiotypic antibodies’, ‘monoclonal antibodies’ or ‘polyclonal antibodies’; or

- c. Specially designed or specially processed ‘receptors’;

*Technical Notes*

1. *‘Anti-idiotypic antibodies’ means antibodies which bind to the specific antigen binding sites of other antibodies.*
2. *‘Monoclonal antibodies’ means proteins which bind to one antigenic site and are produced by a single clone of cells.*
3. *‘Polyclonal antibodies’ means a mixture of proteins which bind to the specific antigen and are produced by more than one clone of cells.*
4. *‘Receptors’ means biological macromolecular structures capable of binding ligands, the binding of which affects physiological functions.*

“civil aircraft” (ML4, ML10) means an “aircraft” listed by designation in published airworthiness certification lists by civil aviation authorities of one or more “participating states” to fly commercial civil internal and external routes or for legitimate civil, private or business use;

“cyber incident response” (ML21) means the process of exchanging necessary information on a cybersecurity incident with individuals or organisations responsible for conducting or coordinating remediation to address the cybersecurity incident;

“deactivated firearm” (ML1) means a firearm that has been made incapable of firing any projectile by processes. These processes permanently modify the essential elements of the firearm. Deactivation of the firearm may be attested by a certificate delivered by a competent authority of the country in which the firearm is deactivated and may be marked on the firearm by a stamp on an essential part;

“development” (All Categories) has the same meaning as in the Act;

“digital computer” (ML21) means equipment which can, in the form of one or more discrete variables, perform all of the following:

- a. Accept data;
- b. Store data or instructions in fixed or alterable (writable) storage devices;
- c. Process data by means of a stored sequence of instructions which is modifiable; and
- d. Provide output of data;

---

---

Technical Note

*Modifications of a stored sequence of instructions include replacement of fixed storage devices, but not a physical change in wiring or interconnections.*

“end-effectors” (ML17) means grippers, ‘active tooling units’ and any other tooling that is attached to the baseplate on the end of a “robot” manipulator arm;

Technical Note

*‘Active tooling units’ means devices for applying motive power, process energy or sensing to a workpiece.*

“energetic materials” (ML8) means substances or mixtures that react chemically to release energy required for their intended application. “Explosives”, “pyrotechnics” and “propellants” are subclasses of energetic materials;

“equivalent standards” (ML6, ML13) means comparable national or international standards recognised by one or more “participating states” and applicable to the relevant entry;

“explosives” (ML8, ML18) means solid, liquid or gaseous substances or mixtures of substances which, in their application as primary, booster, or main charges in warheads, demolition and other applications, are required to detonate;

“expression vectors” (ML7) means carriers (e.g. plasmid and virus) used to introduce genetic material into host cells;

“fibrous or filamentary materials” (ML13) includes the following:

- a. Continuous monofilaments;
- b. Continuous yarns and rovings;
- c. Tapes, fabrics, random mats and braids;
- d. Chopped fibres, staple fibres and coherent fibre blankets;
- e. Whiskers, either monocrystalline or polycrystalline, of any length;
- f. Aromatic polyamide pulp;

“first generation image intensifier tubes” (ML15) means electrostatically focused tubes, employing input and output fibre optic or glass face plates, or multi-alkali photocathodes (S-20 or S-25), but not microchannel plate amplifiers;

“fuel cell” (ML17) means an electrochemical device that converts chemical energy directly into Direct Current (DC) electricity by consuming fuel from an external source;
