Commission Implementing Regulation (EU) 2017/1008 of 15 June 2017 concerning the authorisation of the preparation of of Lactococcus lactis PCM B/00039, Carnobacterium divergens PCM KKP 2012p, Lactobacillus casei PCM B/00080, Lactobacillus plantarum PCM B/00081 and Saccharomyces cerevisiae PCM KKP 2059p as a feed additive for chickens for fattening (holder of authorisation JHJ Ltd) (Text with EEA relevance)

COMMISSION IMPLEMENTING REGULATION (EU) 2017/1008

of 15 June 2017

concerning the authorisation of the preparation of of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p as a feed additive for chickens for fattening (holder of authorisation JHJ Ltd)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition[(1)], and in particular Article 9(2) thereof,

Whereas:

(1) Regulation (EC) No 1831/2003 provides for the authorisation of additives for use in animal nutrition and for the grounds and procedures for granting such authorisation.

(2) In accordance with Article 7 of Regulation (EC) No 1831/2003 an application was submitted for the authorisation of the preparation of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003.

(3) That application concerns the authorisation of the preparation of of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p as a feed additive for chickens for fattening, to be classified in the additive category ‘zootechnical additives’.

(4) The European Food Safety Authority (‘the Authority’) concluded in its opinion of 12 July 2016[(2)] that, under the proposed conditions of use, the preparation of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p does not have an adverse effect on animal health, human health or

the environment, and that it has a potential to improve zootechnical performance in chickens for fattening. The Authority does not consider that there is a need for specific requirements of post-market monitoring. It also verified the report on the method of analysis of the feed additive in feed submitted by the Reference Laboratory set up by Regulation (EC) No 1831/2003.

(5) The assessment of the preparation of of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p shows that the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003, are satisfied. Accordingly, the use of that preparation should be authorised as specified in the Annex to this Regulation.

(6) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

The preparation specified in the Annex, belonging to the additive category ‘zootechnical additives’ and to the functional group ‘gut flora stabilisers’, is authorised as an additive in animal nutrition.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 15 June 2017.

For the Commission

The President

Jean-Claude JUNCKER

***Changes to legislation:** There are currently no known outstanding effects for the Commission Implementing Regulation (EU) 2017/1008. (See end of Document for details)*

ANNEX

Identification number of the additive	**Name of the holder of authorisation**	**Additive**	**Composition, chemical formula, description, analytical method**	**Species or category of animal**	**Maximum age**	**Minimum content**	**Maximum content**	**Other provisions**	**End of period of authorisation**
						CFU//kg of complete feedingstuff with a moisture content of 12 %			
Category of zootechnical additives. Functional group: gut flora stabilisers									
4b1892	JHJ Ltd	*Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p	*Additive composition* Preparation of *Lactococcus lactis* PCM B/00039, *Carnobacterium divergens* PCM KKP 2012p, *Lactobacillus casei* PCM B/00080, *Lactobacillus plantarum* PCM B/00081 and *Saccharomyces cerevisiae* PCM KKP 2059p containing a minimum of 1,2 × 10^9 CFU/g of total Lactic Acid Bacteria (LAB) and	Chickens for fattening	—	5×10^8 (LAB) 5×10^6 (*Saccharomyces cerevisiae* PCM KKP 2059p)	—	1. In the directions for use of the additive and premixtures, indicate the storage temperature, storage life and stability to pelleting. 2. The use is permitted in feed containing the following coccidiostats: narasin/ nicarbazin, salinomycin sodium, diclazuril, decoquinate, or maduramicin ammonium. 3. For users of the additive	6 July 2027
