These species should therefore be included in Annex C to Regulation (EC) No 338/97.

(14) In view of the extent of the amendments it is appropriate, for reasons of clarity, to replace the Annex to Regulation (EC) No 338/97 in its entirety.

(15) Regulation (EC) No 338/97 should therefore be amended accordingly.

(16) Article XV.1(c) of the Convention states that 'amendments adopted at a meeting [of the Conference of the Parties] shall enter into force 90 days after that meeting for all Parties (…)'. In order to meet that deadline and ensure the timely entry into force of the changes to the Annex to this Regulation, the entry into force of this Regulation should be on the third day following that of its publication.

ANNEX

Notes on interpretation of Annexes A, B, C and D

1. Species included in Annexes A, B, C and D are referred to:

(a) by the name of the species; or

(b) as being all of the species included in a higher taxon or designated part thereof.

2. The abbreviation 'spp.' is used to denote all species of a higher taxon.

3. Other references to taxa higher than species are for the purposes of information or classification only.

4. Species printed in bold in Annex A are listed there in consistency with their protection as provided for by Directive 2009/147/EC of the European Parliament and of the Council[(2)] or Council Directive 92/43/EEC[(3)].

5. The following abbreviations are used for plant taxa below the level of species:

(a) 'ssp.' is used to denote subspecies;

(b) 'var(s).' is used to denote variety (varieties); and

(c) 'fa.' is used to denote forma.

6. The symbols '(I)', '(II)' and '(III)' placed against the name of a species or higher taxon refer to the Appendices to the Convention in which the species concerned are listed as indicated in notes 7, 8 and 9. Where none of these annotations appears, the species concerned are not listed in the Appendices to the Convention.

7. (I) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix I to the Convention.

8. (II) against the name of a species or higher taxon indicates that the species or higher taxon concerned is included in Appendix II to the Convention.

9. (III) against the name of a species or higher taxon indicates that it is included in Appendix III to the Convention. In this case the country with respect to which the species or higher taxon is included in Appendix III is also indicated.

10. 'Cultivar' means, following the definition of the 8th edition of the *International Code of Nomenclature for Cultivated Plants*, an assemblage of plants that (a) has been selected for a particular character or combination of characters, (b) is distinct, uniform, and stable in these characters, and (c) when propagated by appropriate means, retains those characters. No new taxon of a cultivar can be regarded as such until its category name and circumscription has been formally published in the latest edition of the International Code of Nomenclature for Cultivated Plants.

11. Hybrids may be specifically included in the Appendices but only if they form distinct and stable populations in the wild. Hybrid animals that have in their previous four generations of the lineage one or more specimens of species included in Annexes A or B shall be subject to this Regulation just as if they were full species, even if the hybrid concerned is not specifically included in the Annexes.

12. When a species is included in Annex A, B or C, all parts and derivatives of the species are also included in the same Annex unless the species is annotated to indicate that only specific
