BACKGROUND

1. A government may impose a levy on an entity. The IFRS Interpretations Committee received requests for guidance on the accounting for levies in the financial statements of the entity that is paying the levy. The question relates to when to recognise a liability to pay a levy that is accounted for in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.

SCOPE

2. This Interpretation addresses the accounting for a liability to pay a levy if that liability is within the scope of IAS 37. It also addresses the accounting for a liability to pay a levy whose timing and amount is certain.

3. This Interpretation does not address the accounting for the costs that arise from recognising a liability to pay a levy. Entities should apply other Standards to decide whether the recognition of a liability to pay a levy gives rise to an asset or an expense.

4. For the purposes of this Interpretation, a levy is an outflow of resources embodying economic benefits that is imposed by governments on entities in accordance with legislation (i.e. laws and/or regulations), other than:

(a) those outflows of resources that are within the scope of other Standards (such as income taxes that are within the scope of IAS 12 *Income Taxes*); and

(b) fines or other penalties that are imposed for breaches of the legislation.

'Government' refers to government, government agencies and similar bodies whether local, national or international.

5. A payment made by an entity for the acquisition of an asset, or for the rendering of services under a contractual agreement with a government, does not meet the definition of a levy.

6. An entity is not required to apply this Interpretation to liabilities that arise from emissions trading schemes.

ISSUES

7. To clarify the accounting for a liability to pay a levy, this Interpretation addresses the following issues:

(a) what is the obligating event that gives rise to the recognition of a liability to pay a levy?
