EXPLANATORY NOTE

(This note is not part of the Regulations but is intended to indicate their general purport.)

These Regulations supersede the Regulations of 1930 and make provision for the control of vehicular traffic at modern light signals. The new provisions are as follows:—

1. Regulation 3(3) prescribes the light signals to be provided at automatic half-barrier level crossings.
2. Regulation 4 prescribes the manner in which a lens showing a green arrow may be used in light signals.
3. Regulation 5 deals with the use of portable light signals. The two-light system of signals, namely red and green, is legalised only until the 31st December 1969.
4. Regulation 6 prescribes the legal significance of the various traffic-light signals.

An obsolete provision in the 1930 Regulations for the control of pedestrians by vehicular light signals has not been re-enacted.
