EXPLANATORY NOTE

(This note is not part of the Order but is intended to indicate its general purport.)

This Scheme provides for payment of compensation to owners of beef carcases which on inspection are found to be infested with cysts of cysticercus bovis and are either:—

(i) wholly condemned as unfit for human consumption because of generalised infestation; or

(ii) ordered to be refrigerated because of local infestation, to make them fit for human consumption.

The compensation payable is related to the extent by which the incidence of the disease in Northern Ireland is in excess of that in Great Britain.

Two-thirds of the total compensation is payable under this Scheme and the remaining one-third is payable in accordance with the Cysticercus Bovis (Supplementary Compensation) Scheme (Northern Ireland) 1966 out of moneys provided under the Agriculture (Temporary Assistance) Acts 1954 and 1957.

1966. No. 241 **[C]**
