within ten days prior to movement and found to show no evidence of brucellosis. In this case the veterinary surgeon's certificate showing the result of this test must be sent by the owner of the animal to the Ministry when an application for a movement permit in respect of the animal is made.

(2) Where an animal under three months of age is moved to a Brucellosis (Certified) Herd or to a Brucellosis (Eradication) Herd from premises other than those specified in paragraph 1(*a*) or (*b*), a permit issued by the Ministry, authorising such movement shall contain the conditions set out in paragraph 1 and shall furthermore require that:—

(*a*) the animal shall be isolated on its arrival on the premises and shall be detained in isolation until check-tested by a veterinary surgeon not sooner than two months subsequent to the animal's arrival on the premises, or when the animal reaches the age of three months, whichever is the later; and that

(*b*) the animal shall not join the Brucellosis (Certified) Herd or Brucellosis (Eradication) Herd unless the veterinary surgeon's check-test, made under (*a*) above, shows that there is no evidence of brucellosis in the animal.

3. Where, for the purpose of exhibition or sale at a place where it is to be accommodated in premises approved by the Ministry for the exhibition and sale of cattle from Brucellosis (Certified) Herds, an animal is moved from a Brucellosis (Certified) Herd, a permit issued by the Ministry authorising movement may contain the conditions set out in paragraph 1.

EXPLANATORY NOTE.

(This Note is not part of the Order but is intended to indicate its general purport.)

This Order replaces the Brucellosis Order (Northern Ireland), 1960, and incorporates certain amendments resulting from the making of the Brucellosis Control Order (Northern Ireland), 1962. It also changes the conditions of a permit under which an animal may move into a Brucellosis (Certified) Herd or a Brucellosis (Eradication) Herd from non-approved premises.
