Whereas:

(1) In order to ensure uniform application of the Combined Nomenclature annexed to Regulation (EEC) No 2658/87, it is necessary to adopt measures concerning the classification of the goods referred to in the Annex to this Regulation.

ANNEX

Description of the goods	**Classification (CN code)**	**Reasons**
(1)	**(2)**	**(3)**
A bag made of fabric woven from polypropylene strip of less than 5 mm wide, cuboid in shape and measuring approx. 54,5 cm × 74 cm × 25 cm, with two strong handles made of the same material sewn on the two long sides of the bag, each going down to underneath the bottom of the bag. The bag is visibly coated with plastic sheeting on both surfaces, there are no compartments inside, and it can be closed on the top with a zip fastener. The edges are reinforced with a sewn-on band. (container similar to a shopping bag) (See photograph No 649)[a]	4202 92 19	Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature, Note 2(m) to Chapter 39, Additional Note 1 to Chapter 42 and the wording of CN codes 4202, 4202 92 and 4202 92 19. Due to its cuboid shape typical for shopping bags and the reinforced handles situated in such a way as to be carried by the shopper's hands and due to the fact that the plastic sheeting, the zip fastener, the reinforced border and the strong handles (continuing along the sides of the bag for reinforcing purposes) enable prolonged use, the bag has the objective characteristics of a ‘container similar to a shopping bag’. Containers similar to a shopping bag are covered by heading 4202 (see also the Harmonised System (HS) Explanatory Note to heading 4202, first paragraph, which explicitly mentions that this heading covers only the articles specifically named therein and similar containers). Due to the above-mentioned characteristics the article in question is not the kind of container generally used for the packing or conveyance of all kinds of products, therefore classification in heading 3923 is excluded within the meaning of Note 2(m) to Chapter 39 (see also the HS Explanatory Notes to heading 3923, first
