COUNCIL DIRECTIVE

of 6 February 1979

concerning the flood protection programme in the Hérault Valley

(79/174/EEC)

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the European Parliament (2),

Whereas Article 39 (2) (a) of the Treaty provides that, in working out the common agricultural policy, account should be taken of the social structure of agriculture and the structural and natural disparities between the various agricultural regions;

Whereas, in order to achieve the objectives of the common agricultural policy set out in Article 39 (1) (a) and (b), special measures appropriate to the production conditions in the least-favoured agricultural areas should be adopted at Community level;

Whereas certain Mediterranean regions of the Community are in an unfavourable situation as regards agricultural incomes and suffer from under-employment not only in agriculture but also generally; whereas the Hérault Valley is one of these regions;

Whereas action should be concentrated on basic aspects of the structural development of these regions which will have rapid and lasting effects on agricultural incomes;

Whereas agricultural production in the Hérault Valley is seriously affected by flooding;

Whereas the provision of the necessary flood protection measures must be speeded up by means of Community aid, thereby facilitating in this area the conversion of areas under vines within the framework of the programme to accelerate the restructuring and conversion of vineyards in certain Mediterranean regions of France;

Whereas these objectives should be pursued by way of a measure covering this area as part of a programme extending over several years;

Whereas it follows from the foregoing that the measures referred to above constitute a common measure within the meaning of Article 6 of Council Regulation (EEC) No 729/70 of 21 April 1970 on the financing of the common agricultural policy (3), as last amended by Regulation (EEC) No 2788/72 (4);

Whereas it is the task of the Commission, after receiving the opinion of the Standing Committee on Agricultural Structure, to approve a programme presented by the French Republic,

HAS ADOPTED THIS DIRECTIVE:

Article 1

1. In order to improve the agricultural situation in the lower and middle areas of the Hérault Valley by means of hydraulic engineering to prevent flooding, a common measure shall be introduced to protect this area from flooding, by the construction of a barrage and dams, and thus to bring about the conditions necessary for the conversion of vineyards, and to facilitate the reorientation of production to market requirements and the introduction of development plans within the meaning of Articles 2 and 4 of Council Directive 72/159/EEC of 17 April 1972 on the modernization of farms (5).

2. All the measures provided for by this Directive constitute a common measure within the meaning of Article 6 (1) of Regulation (EEC) No 729/70.

Article 2

1. The financial contribution of the Community may be used only in the context of a programme applying to all the measures for flood protection in the area referred to in Article 1.

This programme shall be submitted to the Commission by the French Republic.

2. The programme and any amendments thereto shall be examined and approved, after consultation of the Committee of the European Agricultural Guidance and Guarantee Fund, hereinafter called 'the Fund', on the financial aspects thereof, in accordance with the procedure laid down in Article 18 (2) and (3) of Directive 72/159/EEC.
