

## FIRST COMMISSION DIRECTIVE

of 18 April 1978

amending the Annexes to Directive 69/208/EEC on the marketing of seed of oil and fibre plants

(78/388/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 69/208/EEC of 30 June 1969 on the marketing of seed of oil and fibre plants <sup>(1)</sup>, as last amended by Directive 78/55/EEC <sup>(2)</sup>, and in particular Article 20a thereof,

Whereas, in the light of the development of scientific and technical knowledge, Annexes I, II and III to the said Directive should be amended for the reasons set out below;

Whereas, in order to improve the genetic value of seeds, the crop isolation for monoecious hemp should be strengthened and provision should be made for varietal purity standards which the crop must satisfy in the case of certain species;

Whereas certain conditions for crop isolation should be adapted to the conditions sufficient for ensuring the satisfaction of the varietal purity standards;

Whereas special standards should be set in respect of the maximum content of further undesirable or noxious seeds such as *Avena ludoviciana*, *Avena sterilis*, or *Rumex* species other than *Rumex acetosella*;

Whereas, in order to satisfy the conditions for official examination of seed carried out in accordance with current international methods, it is necessary to revise certain provisions;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Standing Committee on Seeds and Propagating Material for Agriculture, Horticulture and Forestry,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

Directive 69/208/EEC is hereby amended as follows:

1. Annex I shall read as follows:

*'ANNEX I*

## CONDITIONS TO BE SATISFIED BY THE CROP

1. The previous cropping of the field shall not have been incompatible with the production of seeds of the species and variety of the crop, and the field shall be sufficiently free from such plants which are volunteers from previous cropping.
2. The crop shall conform to the following standards as regards distances from neighbouring sources of pollen which may result in undesirable foreign pollination:

<sup>(1)</sup> OJ No L 169, 10. 7. 1969, p. 3.

<sup>(2)</sup> OJ No L 16, 20. 1. 1978, p. 23.

Crop	Minimum distance
1	2
Brassica spp. other than Brassica napus oleifera; Cannabis sativa other than monoecius hemp; Carum carvi; Gossypium spp.; Helianthus annuus; Sinapis alba:	
— for the production of basic seed	400 m
— for the production of certified seed	200 m
Brassica napus oleifera:	
— for the production of basic seed	200 m
— for the production of certified seed	100 m
Cannabis sativa, monoecius hemp:	
— for the production of basic seed	5 000 m
— for the production of certified seed	1 000 m

These distances can be disregarded if there is sufficient protection from any undesirable foreign pollination.

3. The crop shall have sufficient varietal identity and varietal purity. In particular, crops of Brassica spp., Cannabis sativa, Carum carvi, Gossypium spp., Helianthus annuus, Sinapis alba shall conform to the following standards: the number of plants of the crop species which are recognizable as obviously not being true to the variety shall not exceed one per 10 m<sup>2</sup>.
4. Harmful organisms which reduce the usefulness of the seed shall be at the lowest possible level.
5. The satisfaction of the abovementioned standards or other conditions shall be examined in official field inspections.

These field inspections shall be carried out in accordance with the following conditions:

- A. The condition and the stage of development of the crop shall permit an adequate examination.
- B. There shall be at least one field inspection.
- C. The size, the number and the distribution of the portions of the field to be inspected in order to examine the satisfaction of the provisions of this Annex shall be determined in accordance with appropriate methods.

2. Annex II shall read as follows:

*'ANNEX II*

**CONDITIONS TO BE SATISFIED BY THE SEED**

**I. BASIC AND CERTIFIED SEED**

1. The seed shall have sufficient varietal identity and varietal purity. In particular, seeds of the species listed below shall conform to the following standards or other conditions:

Species and category	Minimum varietal purity (%)
1	2
Arachis hypogaea:	
— basic seed	98.0
— certified seed	95.0
Linum usitatissimum:	
— basic seed	99.7
— certified seed, 1st generation	98.0
— certified seed, 2nd and 3rd generation	97.5
Papaver somniferum:	
— basic seed	99.0
— certified seed	98.0
Glycine max.:	
— basic seed	97.0
— certified seed	95.0

The minimum varietal purity shall be examined mainly in field inspections carried out in accordance with the conditions laid down in Annex I.

2. The seed shall conform to the following standards or other conditions as regards germination, analytical purity and content of seeds of other plant species including *Orobanche* spp.:
