Contents

Foreword	11
Summary	15
Introduction	17
Part one Sustainability in the region	
Chapter I	
Economic performance in the 1990s	31
A. Economic growth in Latin America and the Caribbean.....	32
B. Public finances and inflation.....	34
C. Capital flows and the instability of economic growth	35
D. Economic openness, trade and integration	36
E. Foreign direct investment.....	40
F. The impact of production transformation on sustainable development.....	41
Chapter II	
Major trends in social development in the 1990s.....	45
A. Employment	46
B. Loss of job security	49
C. Inequality in income distribution.....	49
D. Inequalities in land distribution	51
E. Relative decline in poverty.....	52
F. Public social spending	54
G. Social challenges for sustainability	57

Chapter III

Demographic trends	61
A. Population and environmentally sustainable development...	63
1. Demographic transition as a challenge for governments and societies.....	63
2. The dependency ratio and the demographic bonus	64
3. The population/resources ratio. Carrying capacity.....	65
4. Mobility of regional population: migrations.....	66
5. Migration and remittances	68
6. Spatial trends in population settlement.....	70

Chapter IV

The environmental situation in the region	73
A. Natural ecosystems	73
1. Natural land ecosystems.....	73
2. Marine and coastal ecosystems.....	105
B. Water resources	111
1. Water resources and their availability in the region	111
2. Water management in the region	118
C. Urbanization and the environment.....	120
D. Pollution.....	126
1. Air	126
2. Drinking water and sanitation	129
3. Waste	131
4. Changes in industrial pollution	134
5. Rural and diffused pollution.....	135
E. Energy trends in the region and global climate change	136
1. Energy trends in Latin America and the Caribbean over recent decades	136
2. Latin America and the Caribbean and global climate change.....	142
3. The contribution of Latin America and the Caribbean to total emissions	143

Chapter V

Socio-environmental vulnerability	147
A. The world context.....	147
B. Natural disasters in the region	148
C. The socio-economic impact of disasters in the region	151

Chapter VI

Public policies	157
A. The institutional framework for the environment	157
B. Evolution of regulatory frameworks	162
C. Integration of public policies	164
D. Experiments with the use of economic instruments in environmental management	165
E. Participation for sustainable development: sustainable development at the national and local levels; participation of leading actors from civil society and the productive sectors	169
1. Sustainable development at the national and local levels	169
2. Civil society and citizen participation	172
3. Participation of the business sector in sustainable development	175

Chapter VII

International framework	179
A. Pre- and post-Rio multilateral environmental accords	180
B. The region and global environmental problems	183
C. The Latin American and Caribbean response	185
D. Subregional integration and sustainable development agendas	191
E. Imperatives for a new institutional structure	193

Part two Future prospects

Chapter VIII

The region's role in a global alliance	199
A. Recognizing the progress made	199
B. A disturbing assessment	200
C. The main challenges	201
D. Constraints in national and global agendas	202
E. The uniqueness of the region	203
F. Domesticating globalization for sustainable development	204
G. Synergy between agreements and more efficient environmental institutions	204
H. Convergence between global agreements and the regional position	205

I.	Knowledge and technology for sustainable development.....	206
J.	Towards a new stage of policy integration.....	206
K.	Public participation.....	207
 Chapter IX		
	Proposals for future action.....	209
A.	Protection and sustainable use of natural ecosystems and biodiversity, and access to genetic resources.....	213
1.	Protection and sustainable use of natural ecosystems and biodiversity	213
2.	Access to genetic and transgenic resources.....	216
3.	Regional and global alliances.....	216
B.	Vulnerability	217
1.	Natural disasters	217
2.	Vulnerability and sustainable development in small island States	218
C.	Water management	219
D.	Energy management	221
1.	Climate change.....	221
2.	Energy efficiency.....	223
E.	Urban management.....	223
F.	The institutional underpinnings of sustainable development.....	224

Tables, figures and boxes

Tables

I.1	Latin America and the Caribbean: world market shares, 1985-1998.....	37
I.2	Latin America and the Caribbean: export, in total and by subregional integration scheme, 1990-2000.....	39
I.3	Latin America and the Caribbean: selected environmental indicators.....	42
II.1	Latin America: poverty and indigence rates, 1980-2000.....	52

III.1	Latin America and the Caribbean: main remittance receiving countries, 1990-2000.....	69
IV.1	Latin America and the Caribbean (33 countries): area of forests and other wooded areas	81
IV.2	Latin America and the Caribbean (33 countries): output of forest products	83
IV.3	Latin America and the Caribbean (33 countries): annual changes in forested areas	89
IV.4	Renewable water resources and availability of water, by continents.....	112
IV.5	Past evolution and future projections of water use, by continents.....	115
IV.6	Latin America and the Caribbean (24 countries): urban population as percentage of total, 1970-2000.....	121
IV.7	People living in cities of over a million inhabitants	122
IV.8	The largest cities in Latin America, 1995	123
IV.9	Air pollution	127
IV.10	Levels of lead in the blood of different urban population groups in selected countries of Latin America and the Caribbean.....	128
IV.11	Drinking water and basic sanitation: situation of Latin America and the Caribbean.....	130
IV.12	Latin America (selected cities): solid waste production, wastewater treatment and waste collection.....	132
IV.13	Latin America (23 countries): coverage of urban sanitation.....	133
IV.14	Regions of the world: selected energy and carbon dioxide (CO ₂) emission indicators	141
V.1	The 10 worst natural disasters of the twentieth century in the Caribbean.....	150
V.2	Latin America and the Caribbean: natural disasters between 1972 and 2001	152
V.3	The damage caused by hurricane Mitch.....	154
VI.1	Highest environmental authorities in Latin America
