The sociodemographic impacts of the COVID-19 pandemic in Latin America and the Caribbean

**COVID-19
RESPONSE**

**Fourth session of the
Regional Conference on
Population and Development in
Latin America and the Caribbean**
Santiago, 28-30 June 2022

Mario Cimoli
Acting Executive Secretary

Raúl García-Buchaca
Deputy Executive Secretary
for Management and Programme Analysis

Simone Cecchini
Chief, Latin American and Caribbean Demographic
Centre (CELADE)-Population Division of ECLAC

Sally Shaw
Chief, Documents and Publications Division

This document was prepared by the Latin American and Caribbean Demographic Centre (CELADE)-Population Division of ECLAC, in its capacity as technical secretariat of the Regional Conference on Population and Development in Latin America and the Caribbean, for the fourth session of the Conference (Santiago, 28–30 June 2022). The technical secretariat was assisted by the Division for Gender Affairs of ECLAC and received support and assistance from the United Nations Population Fund (UNFPA) in the preparation of the document.

The document was coordinated by Simone Cecchini, Chief of the Latin American and Caribbean Demographic Centre (CELADE)-Population Division of ECLAC, and Leandro Reboiras Finardi, Population Affairs Officer in the same Division. The drafting committee comprised Simone Cecchini, Helena Cruz Castanheira, Fabiana Del Popolo, Daniela González Ollino, Francis Jones, Jorge Martínez Pizarro, Leandro Reboiras Finardi, Jorge Rodríguez Vignoli, Zulma Sosa Portillo and Pamela Villalobos, all from ECLAC. The following staff members from ECLAC substantive divisions and subregional headquarters participated in the preparation of the document: Mario Acuña, Udy Bell, Catarina Camarinhas, Sonia Gontero, Iliana Vaca Trigo and Alejandra Valdés. The authors are particularly grateful for the collaboration of Fernando Campos, David Candia, José Henrique Costa Monteiro da Silva, Ernesto Espinoza, Claudia González, Verónica Montes de Oca, Malva-Marina Pedrero, Marta Rangel, Antonia Roberts, Victoria San Juan y Javiera Tapia, consultants with CELADE-Population Division of ECLAC, and Camila Baron, a consultant with the Division for Gender Affairs. Thanks are also due to Paula Antezana, Alejandra Alzerreca, Juan José Calvo, Sabrina Juran, Cecilia Maurente, Rocío Muñoz, Katherine Rivera-McKinley, Jackeline Romio, Allán Sánchez Osorio and Leonie Werner from the Regional Office for Latin America and the Caribbean of UNFPA.

Support for the preparation of this document was also received from the twelfth tranche United Nations Development Account project “Harnessing the contribution of intra-region migration to socio-economic development in Latin American and Caribbean countries” and the “Social inequality and the future of workers in Latin America in the context of post-pandemic recovery” project, financed by the Ford Foundation.

The boundaries and names shown on the maps included in this publication do not imply official endorsement or acceptance by the United Nations.

CONTENTS

Foreword	11
Introduction.....	15
A. Summary of the analyses dealing with the socioeconomic impacts of the pandemic in Latin America and the Caribbean.....	17
1. The health effects on the Latin American and Caribbean population have been among the world's worst	17
2. Women and gender equality have been particularly affected	17
3. Poverty and extreme poverty have risen strongly	18
4. Social inequality has increased	18
5. There was a record contraction in economic activity.....	18
6. The economic crisis had an immediate and devastating effect on the labour market	18
7. A substantial fiscal effort has been made	19
8. The pandemic quickly affected education.....	19
9. The housing outlook looks very challenging.....	19
10. Problems of access to some basic services have worsened.....	20
11. The weaknesses of public transport have become apparent.....	20
12. During the pandemic, a range of public policy measures were deployed to protect the population, and new opportunities opened up.....	20
B. Multiple risk factors: urbanization, density and metropolization, overcrowding, lack of access to basic services and structural weaknesses in the health-care sector	21
Bibliography.....	24
Chapter I	
The impact of coronavirus disease (COVID-19) on demographic dynamics	25
A. Mortality	27
1. Mortality from COVID-19 in Latin America and the Caribbean	27
2. The new strains and the rise in mortality in 2021.....	28
3. The impact of COVID-19 on life expectancy at birth: from steady increase to the current crisis	32
4. In conclusion: there is an urgent need to adopt measures based on reliable, timely information.....	35

B. Fertility, with special attention to sexual and reproductive health	36
C. International migration	42
1. Border closures and restricted opening	42
2. Migration is continuing and becoming more complex	43
D. Internal migration	44
Bibliography	48

Chapter II

Structural inequalities and the protection of human rights during the pandemic: from the perspective of the Montevideo Consensus on Population and Development

Introduction	57
A. Children, adolescents and young people	57
B. Older persons	61
C. Women	67
1. A historic reversal in women's economic autonomy	68
2. An unprecedented increase in the burden of unpaid domestic and care work	70
3. Women on the front line of the pandemic response	71
4. Effects of the pandemic on the physical autonomy of women and girls	72
5. There is still a lack of women in political decision-making	76
D. Migrants	76
1. Differential impacts of the pandemic on the migrant population and a lack of information	77
2. The need for State cooperation for safe, orderly and regular migration	78
E. Indigenous peoples	80
1. Indigenous peoples in Latin America-Abya Yala: the demographic background and its implications in the context of the pandemic	80
2. The differential impact of the pandemic on indigenous peoples	83
3. Inclusion of indigenous peoples in national vaccination plans	86
4. State responses to the health and economic impacts of the pandemic on indigenous peoples	87
5. Independent responses of indigenous peoples to the pandemic	87
6. Indigenous peoples' collective rights in the context of the pandemic: progress and tension	88
F. Afrodescendent persons and communities	89
1. Population dynamics and vulnerability to the pandemic	91
2. The differentiated impact of the pandemic	96
3. Responses to the pandemic	98
G. Persons with disability	100
1. The sociodemographic situation of persons with disability in Latin America and the Caribbean prior to the pandemic	101
2. Public policy actions implemented by governments in the light of the Montevideo Consensus and other international instruments	109
Bibliography	112

Chapter III

The sociodemographic impacts of COVID-19 in the Caribbean

A. Older persons and those with noncommunicable diseases (NCDs)	128
B. Children, adolescents and youth	130
C. Women	132
Bibliography	134

Chapter IV

Conclusions and recommendations for action in light of the priority measures

of the Montevideo Consensus on Population and Development.....	137
A. The pandemic's impact on information sources	139
B. Children, adolescents and young people	141
C. Older persons.....	142
D. Women	143
E. Migrants	144
F. Indigenous peoples.....	145
G. People of African descent and their communities	147
H. Persons with disabilities	149
I. Emerging priorities in the Caribbean.....	150
Bibliography.....	151

Tables

Table I.1	Four developed countries: birth rates, 2017–2020, and births, 2019–2021	39
Table I.2	Brazil, Chile and Peru: monthly births, January to March, 2015–2021	41
Table II.1	Latin America and the Caribbean (24 countries): specific vaccination programmes for the migrant population and official calls for vaccination of migrant populations regardless of migration status, 2020–2021	79
Table II.2	Latin America (17 countries): population self-identifying as indigenous, according to the latest census and estimates to 2021	81
Table II.3	Latin America (4 countries): index of housing vulnerability in indigenous and non-indigenous populations, by population size of municipality of residence, most recent available census.....	83
Table II.4	Latin America (17 countries): inclusion of indigenous peoples as target population in national vaccination plans, October 2021 review	86
Table II.5	Latin America (20 countries): Afrodescendent population, on the basis of most recent census and estimates as at 2021	91
Table II.6	Latin America (4 countries): proportion of persons with disability, by area of residence, 2010 and 2020 census rounds	102
Table II.7	Latin America (4 countries): age structure of persons with and without disability and male-female ratio by age group, 2020 census round.....	103
Table II.8	Guatemala, Mexico and Peru: proportion of population without access to the Internet, a computer or a mobile phone at home, by disability status, 2020 census round.....	107

Figures

Figure I.1	Number of confirmed coronavirus (COVID-19) deaths and cases in the world per 1,000 population, as of 28 February 2022	27
Figure I.2	Latin America and the Caribbean (23 countries): monthly distribution of COVID-19 variants, 1 November 2020 to 28 February 2022.....	29
Figure I.3	Latin America and the Caribbean (25 countries): reported COVID-19 deaths and fully vaccinated population, by month, up to 28 February 2022	30
Figure I.4	Latin America (8 countries): reported COVID-19 deaths, persons aged 0 to 59, 1 March 2020 to 28 February 2022	31
Figure I.5	Latin America (4 cities): relationship between excess mortality and level of crowding, 2020.....	34
Figure I.6	Latin America (9 countries): relationship between excess deaths and percentages of households whose members could not receive medical attention, 2020.....	34
Figure I.7	Latin America (9 countries): reasons for being unable to receive medical attention in 2020.....	35
Figure I.8	Latin America (9 countries): total fertility rate, 2015–2020	40

Figure I.9	Brazil, Chile and Colombia: mobility control and border closure measures, 2020 and 2021	42
Figure I.10	Chile, Colombia and Costa Rica: international migrant populations, 2017–2020	43
Figure I.11	Latin America and the Caribbean: international emigrants and immigrants, by destination and origin, 2020	44
Figure I.12	Metropolitan Area of the Valley of Mexico: net domestic migration and net migration rate annually per 1,000 population, censuses of 2000, 2010 and 2020	47
Figure II.1	Selected countries: rate of orphanhood owing to coronavirus disease (COVID-19), 1 March 2020 to 30 April 2021	58
Figure II.2	Latin America and the Caribbean: distribution of older persons by sex and age group, 1950–2050	62
Figure II.3	Latin America (6 countries): mortality rate for coronavirus disease (COVID-19), by age groups, 1 March 2020–31 January 2022	64
Figure II.4	Latin America and the Caribbean (24 countries): labour force participation rate for women, 2001–2022	68
Figure II.5	Latin America and the Caribbean (24 countries): unemployment rate, by sex, 2008–2022	69
Figure II.6	Latin America (14 countries): poverty rates by sex and poverty femininity index, people aged 20–59 years, around 2020	70
Figure II.7	Latin America (18 countries and territories): feminicides or femicides, 2018–2020	73
Figure II.8	Latin America (5 countries): femininity ratio of the indigenous population by age group, 2020 census round	81
Figure II.9	Latin America (16 countries): relative distribution of the indigenous population by area of residence, latest available census	82
Figure II.10	Latin America (6 countries): estimated COVID-19 case fatality rate in indigenous and non-indigenous populations, as at 26 November 2021	84
Figure II.11	Chile: rate of confirmed COVID-19 cases by large territorial areas, 1 April 2020 to 31 December 2021	84
Figure II.12	Mexico: COVID-19 case fatality rate in indigenous and non-indigenous populations, by sex, as at 20 December 2021	85
Figure II.13	Latin America (11 countries): indigenous leaders and community members killed in the context of the lack of protection of indigenous peoples' territorial rights, 2015–2021	90
Figure II.14	Latin America (15 countries): Afrodescendent population, by area of residence, latest available census	92
Figure II.15	Latin America (6 countries): population living in poverty, by ethnicity and race, 2020	93
Figure II.16	Latin America (4 countries): population without access to drinking water, by ethnicity and race and area of residence, latest available census	94
Figure II.17	Latin America (weighted average of 6 countries): average hourly labour income of the employed population aged 15 and over, by ethnicity and race, sex and schooling, around 2019	95
