Economic Survey of Latin America and the Caribbean

Trends and challenges of investing for a sustainable
and inclusive recovery

UNITED NATIONS

ECLAC

Mario Cimoli
Acting Executive Secretary

Raúl García-Buchaca
Deputy Executive Secretary for Management
and Programme Analysis

Daniel Titelman
Chief, Economic Development Division

Sally Shaw
Chief, Documents and Publications Division

The *Economic Survey of Latin America and the Caribbean* is issued annually by the Economic Development Division of the Economic Commission for Latin America and the Caribbean (ECLAC). The 2022 edition was prepared under the leadership of Daniel Titelman, Chief of the Division, and coordinated by Daniel Titelman and Ramón Pineda Salazar.

Comments and suggestions were received from Mario Cimoli, Wilson Peres and Vianka Aliaga. Thanks are extended, for their assistance, to the Statistics Division, the Division of International Trade and Integration, the Division for Gender Affairs, the ECLAC subregional headquarters in Mexico City and Port of Spain, and the Commission's country offices in Bogotá, Brasilia, Buenos Aires, Montevideo and Washington, D.C.

The sections of the first chapter, "Regional overview", are based on inputs prepared by the following experts: Cecilia Vera, José Antonio Sánchez, Albert Bredt and Pablo Carvallo (international context), Esteban Pérez-Caldentey (global liquidity), Cecilia Vera, José Antonio Sánchez, Albert Bredt and Pablo Carvallo (external sector), Claudio Aravena (economic activity), Ramón Pineda Salazar, Claudio Aravena, Sonia Gontero and Sonia Albornoz (employment and wages), Ramón Pineda Salazar, Christine Carton and Alejandra Acevedo (prices), Noel Pérez Benítez, Michael Hanni, Ivonne González and Jean-Baptiste Carpentier (fiscal policy), Ramón Pineda Salazar, Alejandra Acevedo, Christine Carton and Franciss Peñaloza (monetary, exchange-rate and macroprudential policies), Cecilia Vera, Pablo Carvallo, Albert Bredt and Patricia Weng (economic projections), with the assistance of the ECLAC subregional headquarters and national offices.

The chapters of part II entitled "Trends and challenges of investing for a sustainable and inclusive recovery", were coordinated by Daniel Titelman, Noel Pérez Benítez and Ramón Pineda Salazar. They were prepared with inputs by: chapter II: Ramón Pineda Salazar, Claudio Aravena and Viviana Friedman; chapter III: Noel Pérez Benítez, Michael Hanni, Jean-Baptiste Carpentier, Valeria Torres and Lucy Winchester; chapter IV: Ramón Pineda Salazar and Claudio Aravena, using materials prepared by consultants Jorge Valverde and Emilio Castillo. In addition, assistance was provided by the subregional headquarters and national offices of ECLAC, the Natural Resources Division and the Latin American and Caribbean Institute for Economic and Social Planning (ILPES).

The country notes were prepared by the following experts: Alejandra Acevedo, Olga Lucía Acosta, Sonia Albornoz, Dillon Alleyne, Anahí Amar, Claudio Aravena, Fernando Balbuena, Christine Carton, Pablo Carvallo, Martín Cherkasky, Georgina Cipoletta, A. Randolph Gilbert, Sonia Gontero, Enrique González, Camila Gramkow, Michael Hanni, Michael Hendrickson, Álvaro Lalanne, Jesús López, Ana Lúza Matos, Sheldon McLean, Carlos Mussi, Roberto Orozco, Ramón Padilla, Machel Pantin, Franciss Peñaloza, Juan Pérez, Noel Pérez Benítez, Esteban Pérez-Caldentey, Ramón Pineda Salazar, José Porcile, Blademir Quiguanas, Juan Carlos Rivas, Indira Romero, José Antonio Sánchez, Jesús Santamaría, Nyasha Skerrette, Cecilia Vera and Francisco Villarreal. Sonia Albornoz coordinated the statistical annex in collaboration with Alejandra Acevedo, Claudio Aravena, Pablo Carvallo, Ivonne González, Michael Hanni and Ramón Pineda Salazar.

Explanatory notes:

- Three dots (...) indicate that data are not available or are not separately reported.
- A dash (-) indicates that the amount is nil or negligible.
- A full stop (.) is used to indicate decimals.
- The word "dollars" refers to United States dollars, unless otherwise specified.
- A slash (/) between years (e.g. 2013/2014) indicates a 12-month period falling between the two years.
- Figures and percentages in graphs and tables may not always add up to the corresponding total because of rounding.

Presentation.....	13
Executive summary.....	15
Part I	
Regional macroeconomic report and outlook for 2022.....	25
Chapter I	
Regional overview.....	27
A. The international context.....	29
1. In 2021 the world economy underwent a post-crisis rebound, growing more than 6%, but in 2022 the rebound effect has disappeared and the war in Ukraine is hampering global economic performance, with growth of just 3.1% expected.....	29
2. After ending 2021 with a rise of more than 10%, growth in the volume of trade looks set to slow to 3% in 2022.....	30
3. The Russian Federation’s invasion of Ukraine has intensified the uptrend in commodity prices seen since the second half of 2020, pushing some commodities to record highs.....	31
4. Global inflationary pressures have been exacerbated by the war, leading central banks to withdraw monetary stimulus measures and raise monetary policy rates faster and in larger increments than anticipated at the start of the year.....	33
5. The deterioration in the outlook for the global economy and growing inflationary pressure have affected financial markets.....	34
6. Tighter monetary policy will have a more marked effect on financing conditions if the tightening by major central banks is faster and more intense.....	36
B. Global liquidity trends.....	38
1. In 2022, global liquidity contracted owing to shifts in the monetary policy stance of the major central banks in developing countries.....	38
2. The conditions for accessing financial markets have been tightened.....	39
3. The impact of quantitative tightening on medium- and long-term economic performance and global liquidity is still uncertain.....	41
4. Tighter liquidity conditions in international capital markets have had a significant impact on developing economies.....	43
5. The tightening financial cycle will also negatively impact the non-financial corporate sector.....	44
C. The external sector.....	46
1. The balance of payments current account will remain negative in 2022, broadly replicating the previous year’s deficit.....	46
2. The goods balance will return a surplus again in 2022, albeit slightly smaller than in the previous year, as imports have grown faster than exports in value terms.....	46
3. The region’s commodity terms of trade are projected to fall by an average of 7%.....	48
4. The services deficit is expected to widen slightly in 2022 and end the year at 1.1% of GDP.....	48
5. The income account deficit is set to widen in 2022, owing to higher interest payments on the external debt and greater profit repatriation by foreign firms.....	49
6. The surplus on the transfers account will increase further in 2022, mainly thanks to the continued growth of remittances to the region.....	49
7. Financial flows returned to the region in 2021, making it possible to finance the current account deficit and accumulate international reserves; but in 2022 there are already signs that capital inflows are faltering.....	50
8. Having remained stable in 2021, debt issuance by the region in international markets was down in the first few months of 2022, although green and social bond issues continue to gain ground.....	51
9. The region’s sovereign risk remained stable in 2021, but global turbulence has pushed the indicator up in 2022 thus far.....	54
D. Domestic performance.....	55
1. Growth in 2021 has been followed by a slowdown in the first quarter of 2022.....	55
2. Gross fixed capital formation shows signs of slowing and remains far below pre-pandemic levels.....	58
3. Services sectors drive slight growth in economic activity in the first quarter of 2022.....	59
4. Burgeoning global inflation has accelerated the rise in prices in the economies of Latin America and the Caribbean.....	61

5. Although all components of the consumer price index have been affected by inflation, rates are highest for food and energy.....	64
6. Rising inflation worldwide, including in the region, has been driven by the dynamics of supply and demand factors, whose relative significance has changed over time	65
7. Outlook	70
8. The number of employed has been growing since the second quarter of 2021, but the pace of growth has slowed.....	70
9. Despite the increase in the participation rate since the third quarter of 2020, it has not surpassed pre-crisis levels.....	71
10. The unemployment rate has declined since the third quarter of 2020, but remains above the levels recorded in the fourth quarter of 2019.....	72
11. The regional employment rate has tended to rise since the third quarter of 2020, although at the end of the first quarter of 2022 it remained below pre-crisis levels	73
12. Employment has returned to pre-crisis levels for wage earners and self-employed workers, but not for unpaid family workers and those in domestic service	74
13. The number of employed persons has grown in almost all branches of economic activity, except agricultural and extractive activities and basic services.....	75
14. Gender asymmetries have been maintained in the labour market recovery, which is slower and more incomplete for women.....	76
15. In most of the region's economies, employment has recovered more slowly than economic activity.....	77
16. The trend in average wages in the region has been of a slowdown prior to the COVID-19 pandemic, decline in the second quarter of 2020 and subsequent recovery.....	79
17. The outlook for the labour market	80
E. Macroeconomic policies	81
1. Growth in government revenues is expected to slow in 2022 as a result of a downturn in tax revenues.....	81
2. The slowdown in public spending looks set to continue in 2022, although inflation trends have created additional pressure to implement support programmes	84
3. The pattern of fiscal consolidation is expected to continue in 2022, in a context of low growth.....	88
4. Public debt-to-GDP ratios set to decline	91
5. Amid a persistent rise in domestic prices and lower growth prospects, the region's monetary authorities face the policy challenge of curbing inflationary pressures without exacerbating the economic slowdown	97
6. Authorities have responded to the upturn in inflation by tightening their monetary stance, raising policy rates and dampening growth in monetary aggregates.....	98
7. In economies that use the monetary policy rate as their main instrument, lending rates have increased since September 2021, whereas in economies that target monetary aggregates, lending rates continue to drop.....	101
8. Since the second quarter of 2020, growth in domestic credit to the private sector has slowed, with real rates lower than they were before the start of the pandemic	102
9. The non-performing loans portfolio has increased across the region in 2022	104
10. In 2022, exchange-rate volatility has worsened and currency depreciation has steepened in most of the region's economies, leading to an increase in foreign-exchange interventions and greater reliance on international reserves.....	106
11. After growing in 2020 and 2021, international reserves in Latin America and the Caribbean shrank during the first half of 2022.....	110
12. The space created by complementarity between monetary, macroprudential and exchange-rate policies must be used to coordinate and calibrate policy decisions amid high inflation, weaker growth forecasts and potentially heightened macrofinancial risks	114
F. Growth prospects for Latin America and the Caribbean in 2022	116
1. The GDP of Latin America and the Caribbean is returning to a path of low growth in 2022, in an international landscape that has been made more complex by the war in Ukraine and an internal situation with limited room for monetary and fiscal policy.....	116
2. Private consumption remains the expenditure component that makes the largest contribution to GDP growth, despite a decline in its impact.....	117
3. The slowdown in economic activity will result in slower growth in the number of employed	118
Bibliography.....	119

Part II

Trends and challenges of investing for a sustainable and inclusive recovery	123
Introduction	125

Chapter II

Greater investment needed to drive sustainable and inclusive development in the Latin American and Caribbean economies.....	127
Introduction	129
A. Investment trends 1950–2021.....	130
1. Investment growth has slowed sharply since the 1990s.....	130
2. Since the 1990s, investment has become more volatile, with more frequent, longer-lasting and more pronounced contractionary cycles.....	131
3. Weaker investment growth since the 1990s affected both the private and public sector, albeit more pronounced in the latter.....	131
4. Investment growth since the 1990s has recovered in both construction goods and machinery and equipment.....	133
5. Sectors such as transportation, commerce and mining have increased their shares of total investment.....	134
6. Consistent with the trends described above, investment has accounted for a systematically smaller share of GDP since the 1980s.....	135
7. The region's investment-to-GDP ratio is well below those of other emerging economies.....	136
B. Latin America and the Caribbean faces major investment challenges, and neither the starting point nor the context are propitious	137
1. The challenges are immense.....	138
2. Collective effort needed to increase investment.....	141
C. Conclusions	142
Bibliography	144

Chapter III

Public investment to boost growth.....	145
Introduction	147
A. Stylized facts of public investment in Latin America and the Caribbean.....	148
1. The level of public investment in Latin America and the Caribbean is lower than in other regions of the world in both absolute and relative terms.....	149
2. Public investment varies significantly among the countries of the region, in both level and sector composition.....	153
3. State-owned enterprises are major investors in several countries	155
4. Central governments have used public investment as the main fiscal adjustment variable since the middle of the 2010s.....	156
B. Proposals for a public investment policy that fosters sustainable and inclusive development	158
1. National public investment systems	162
2. Investment promotion strategies.....	165
Bibliography.....	168

Chapter IV

Energy transition and investment challenges in the copper, iron and lithium industries in countries of the region.....	171
Introduction	173
A. Replacing fossil fuels with clean energy means significantly increasing demand for minerals.....	173
B. World copper, iron and lithium markets: recent trends and the impact of the energy transition	177
1. The copper market: current trends.....	177
2. Effects of the energy transition on copper demand	180
3. The iron market: current trends.....	182
4. Effects of the energy transition on iron demand.....	184
5. The lithium market: current trends.....	186
6. Effects of the energy transition on lithium demand.....	189

C. Challenges posed by the energy transition for investment in the region's mining industry	191
1. Green factor challenges: the copper industry in Chile and Peru.....	192
2. Investment efforts to maintain market share in the copper market in the context of the energy shift	194
3. Green factor challenges: the iron industry in Brazil.....	196
4. Investment efforts to maintain market share in the iron market in the context of the energy shift in Brazil	198
5. Green factor challenges: the lithium industry in Argentina, the Plurinational State of Bolivia and Chile.....	199
6. Investment efforts to maintain lithium market share in the context of the energy shift.....	201
D. Final remarks.....	202
Bibliography.....	204
Statistical annex.....	207
ECLAC recent publications.....	245

Tables

Table I.1	Selected regions and countries: GDP growth rate, 2020–2022, projections for 2022 before the war in Ukraine and difference with current projection.....	30
Table I.2	Variation in international commodity prices, 2021 and projections for 2022	32
Table I.3	Credit default swap spreads, government bond yields and general government gross debt as a percentage of GDP, 10 July 2022.....	44
Table I.4	Latin America: debt issues on international markets, by sector, 2021 and January–April 2022	52
Table I.5	Latin America: sovereign debt issuance, January 4–March 2, 2022	53
Table I.6	Latin America: green, social and sustainability-linked bond issuance, by sector and country, total issued between 2017 and April 2022	53
Table I.7	Latin America: sovereign risk index as measured by the J.P. Morgan Emerging Market Bond Index (EMBIG), 2019–April 2022	54
Table I.8	Latin America and the Caribbean: rates of variation of the consumer price index, December 2020–June 2022	63
Table I.9	Latin America and the Caribbean (countries that use the interest rate as the main monetary policy tool): variation in monetary policy rates, December 2020–July 2022.....	99
Table I.10	Latin America and the Caribbean (countries that use the interest rate as the main monetary policy tool): inflation rates, December 2020–July 2022	100
Table I.11	Latin America and the Caribbean (selected countries): monetary policy rates, inflation expectations and monetary policy rates in real terms, June 2022	100
Table I.12	Latin America and the Caribbean (20 countries): half-yearly variations in nominal exchange rates for the dollar, first six months of 2021–first six months of 2022	107
Table II.1	Latin America (9 countries): distribution of investment among different production activities, 1990–2018	134
Table II.2	Latin America and the Caribbean: additional annual investment requirements	139
Table II.3	Emerging economies: additional investment requirements relative to the 2019 level	140
Table III.1	Investment tax incentives: advantages and disadvantages	166
