This document was prepared by Georgina Catacora-Vargas in collaboration with Víctor Alvarado, both consultants with the Agricultural Development Unit of the Natural Resources Division of the Economic Commission for Latin America and the Caribbean (ECLAC), Marcia Tambutti, Senior Research Assistant in biodiversity in the same Unit, and Aleksandar Rankovic, professor at Sciences Po and, during the period of research and writing of the document, researcher at the Institute for Sustainable Development and International Relations (IDDRI), as part of activities implemented by the ECLAC Natural Resources Division's work programme. The preparation of this publication was made possible thanks to French Cooperation.

Valuable information and conceptual support in the preparation of this study was provided by the following members of the high-level expert group on biodiversity in Latin America and the Caribbean: Barbara Jarschel, Eduardo Brondizio, Stefan Gelcich, Cristiana Simão Seixas, Francisco Prieto-Albuja, Alexander von Humboldt Biological Resources Research Institute, Pablo Marquet, Karin Molt and Marcos Regis da Silva.

Thanks are also due to other members of the high-level expert group on biodiversity in Latin American and the Caribbean who provided information and insights that enhanced the analytical context of this study: Eugenia Arguedas, Brigitte Baptiste, Juan Bello, Mariana Bellot, Hesiquio Benítez, Braulio Ferreira de Souza Dias, Hernando García, Randall García, Ana María Hernández, Oliver Hillel, María Jesús Ovalle, Óscar Ramírez, Lily Rodríguez, Manuel Ruiz, Ana Belén Sánchez, Jeannette Sánchez, José Sarukhán and Pieter van Lierop.

The contributions on practices, processes and lessons learned received from the following interviewees in case studies are also gratefully acknowledged: Aldo Rodas, Alejandro Callejas, Alfredo Arellano, Ana Centeno, Anny Zamora, Aracely Jiménez, Bert De Bievre, David Chacón, Elmer Salazar, Fernando Baldizón, Francisco Prieto-Albuja, Galo Medina, Gustavo Meneses, Ignacio Casali, Ivannia Ayales, Jaime Camacho, Janet Arteaga, Jasmin Hundorf, Karina Godoy, Kathy Baughman, María Carrillo, Marilú Chahua, Mariana Caballero, Marvin Fonseca, Nirlady Artavia, Noela Ort, Ogden Rodas, Olga Barbosa, Óscar Ramírez, Pamela Méndez, Paul Dale, Paula Sierra-Correa, Rolando Ramírez, Sandra Esquivel, Sven Bruchfeld, Vivienne Solis and Xavier Gordillo.

The views expressed in this document, which is a translation of a document reproduced without formal editing, are those of the authors and do not necessarily reflect the views of the Organization or the countries it represents, French Cooperation, the member institutions of the high-level expert group on biodiversity in Latin America and the Caribbean or the persons interviewed for case studies.

## Contents

<b>Overview</b> .....	<b>7</b>
<b>Key messages</b> .....	<b>9</b>
<b>Executive summary</b> .....	<b>13</b>
<b>Introduction</b> .....	<b>17</b>
<b>I. Conceptual framework</b> .....	<b>19</b>
A. Biodiversity governance and the urgent need for transformative change .....	19
B. Features of governance for transformative change for biodiversity .....	20
<b>II. Methodological aspects</b> .....	<b>23</b>
<b>III. A general overview of governance practices for transformative change for biodiversity</b> .....	<b>25</b>
A. Diversity and transdisciplinarity in implementing governance practices .....	25
B. Socioecological processes through governance for transformative change .....	29
1. Changes in biodiversity management.....	29
2. Socioecological changes .....	29
<b>IV. Practices in the integrative approach: consistency and effectiveness</b> .....	<b>33</b>
A. Application of a territorial approach to the conservation and sustainable use of biodiversity .....	34
B. Long-term spatial planning for biodiversity .....	35
C. Granting land security, and access to and use of ecosystems and their components, especially for indigenous peoples and local communities.....	36
D. Conservation through sustainable use and the fair and equitable sharing of the benefits arising out of the utilization of genetic resources .....	38
E. Design and implementation of other effective area-based conservation measures (OECMs).....	40
F. Integration of biodiversity into different sectors.....	41
G. Transdisciplinary approach to biodiversity .....	42
H. Establishment of innovative financial mechanisms for the conservation and sustainable use of biodiversity .....	45

<b>V.</b>	<b>Practices in the inclusive approach: equality, representation and active participation .....</b>	<b>47</b>
A.	Conservation through processes with a biocultural approach .....	48
B.	Consideration of the human rights and collective rights of indigenous peoples and local communities in the sustainable management of biodiversity .....	49
C.	Strengthening the recognition and rights and roles of women in the sustainable management of biodiversity .....	50
D.	Inclusion of young people in the sustainable management of biodiversity .....	51
E.	Fair and equitable sharing of the benefits arising out of the utilization of genetic resources, in local processes and among local stakeholders .....	53
F.	Multi-stakeholder approach .....	53
G.	Representative discussions for local dialogue and coordination between sectors .....	54
H.	Co-creation of knowledge based on knowledge-building dialogues .....	54
<b>VI.</b>	<b>Practices in the informed-process approach: access to information and the integration of different knowledge systems .....</b>	<b>57</b>
A.	Simplification of complex information to facilitate participatory and multi-stakeholder processes .....	57
B.	Participatory monitoring and management of databases with local stakeholders to measure the achievement of objectives .....	59
<b>VII.</b>	<b>Practices in the adaptive approach: contextualization, sustainability and resilience .....</b>	<b>61</b>
A.	Participatory capacity-building for adaptation to the local context .....	61
B.	Participatory planning .....	62
C.	Co-management of ecosystems .....	63
D.	Conservation of biodiversity through artisanal and small-scale sectors .....	64
E.	Control of invasive alien species through a comprehensive approach involving different stakeholders .....	64
<b>VIII.</b>	<b>Frequency and qualitative performance of governance practices .....</b>	<b>65</b>
A.	Frequency of implementing the practices of governance approaches for transformative change .....	65
B.	Qualitative performance of governance for transformative change for biodiversity .....	67
<b>IX.</b>	<b>Strengths and challenges in the implementation of governance approaches and practices for transformative change for biodiversity .....</b>	<b>71</b>
A.	Strengths identified in the experiences analysed .....	71
B.	Limitations of the experiences and contextual challenges .....	72
<b>X.</b>	<b>Recommendations and final remarks .....</b>	<b>77</b>
	<b>Bibliography .....</b>	<b>81</b>

## Tables

Table 1	Governance approaches and practices for transformative change for biodiversity, identified in ten experiences from Latin America and the Caribbean .....	16
Table 2	Experiences in Latin America and the Caribbean of governance for transformative change for biodiversity that are included in the study .....	24
Table 3	Governance practices for transformative change for biodiversity .....	27
Table 4	Frequency of different governance practices for transformative change for biodiversity, their relation to CBD objectives and the integration of biodiversity into different sectors .....	66

Table 5	Qualitative performance evaluation of the cases studied in relation to governance approaches for transformative change for biodiversity .....	70
Table 6	Limitations and contextual challenges identified that affect the achievement of CBD objectives and the implementation of governance approaches for transformative change for biodiversity .....	73

### Boxes

Box 1	Socioecological processes in governance for transformative changes for biodiversity.....	31
Box 2	Processes and characteristics of the territorial approach to the conservation and sustainable use of biodiversity .....	34
Box 3	Participatory spatial planning of terrestrial and marine landscapes .....	36
Box 4	Biodiversity conservation and security of land and ecosystem access for indigenous peoples and local communities.....	37
Box 5	Sustainable use and fair and equitable sharing of the benefits arising out of the utilization of genetic resources for the conservation of biodiversity .....	38
Box 6	Other effective area-based conservation measures for the conservation of biodiversity through sustainable use in productive systems and the strengthening of traditional life systems.....	40
Box 7	Integration of biodiversity into different sectors through capacity-building, multi-stakeholder coordination and the implementation of coordinated actions.....	41
Box 8	Transdisciplinarity in implementing the territorial, biocultural and integration-based approach to biodiversity .....	43
Box 9	Innovative funding mechanisms for biodiversity .....	45
Box 10	The biocultural approach to biodiversity conservation and the strengthening of local ways of life.....	48
Box 11	Collective rights for the sustainable management of biodiversity .....	49
Box 12	Visualizing and acknowledgement of women's work in the sustainable use of biodiversity.....	51
Box 13	Initiatives to include young people in the conservation and sustainable use of biodiversity .....	52
Box 14	Implementation of fair and equitable sharing of the benefits arising from local processes of sustainable utilization of genetic resources .....	53
Box 15	Co-creation of knowledge through knowledge-building dialogues on integrating biodiversity into agriculture and the management of marine territories.....	55
Box 16	Participatory monitoring approaches in cases of governance for transformative change for biodiversity .....	59
Box 17	Examples of participatory capacity-building methodologies involving local stakeholders, based on experiences of governance for transformative change for biodiversity .....	62
Box 18	Co-management of ecosystems for the conservation and sustainable use of biodiversity.....	63
Box 19	Control of alien species in vineyards through management focused on restoration and use of native biodiversity.....	64

**Diagrams**

Diagram 1	Practices leading to governance for transformative change for biodiversity, identified in the cases featured in the study .....	26
Diagram 2	Summary of the processes identified in governance for transformative change for biodiversity in the experiences of Latin American and Caribbean countries .....	30
Diagram 3	Examples of the simplification of complex information to promote multi-stakeholder processes and participation in governance for transformative change for biodiversity .....	58
