The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations (FAO) concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Dashed lines on maps represent approximate border lines for which there may not yet be full agreement. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these have been endorsed or recommended by FAO in preference to others of a similar nature that are not mentioned.

		INTRODUCTION		
		Agriculture on the proving grounds	1	
Foreword	xxii	2010–2019 the most turbulent decade	2	
Acknowledgements	xxv	Disasters steady on the rise	4	
Abbreviations and acronyms	xxvi	Exceptions are the new rule	9	
		Biological hazards: pest and disease outbreaks	10	
		The heat is on	12	
		Global 2030 Agenda – one decade left	15	
		Quest continues for disaggregated data	16	
		From governance of evidence to governance of action	18	
		Time to act	21	
		PART I		
		More disasters, more impact on agriculture		23
		Chapter I		25
		Proving the case: measurement and evidence 2008–2018		
		Chapter II		47
		Disasters and forests: unpacking a complex relationship		
		Chapter III		63
		Impact of disasters on fisheries and aquaculture

PART II

Focus on food chain crises

Chapter IV

Agriculture in the face of a pandemic: COVID-19 impacts on food production

77

79

Chapter V

Animal health at the crossroads: bridging theory, assessment and policy

93

Chapter VI

Locusts, a legendary pest with a present-day toll: lessons from Madagascar

113

PART III

Towards the future of damage and loss monitoring

Chapter VII

Extreme exposure: a clearer picture of agriculture in the climate crisis

133

135

Chapter VIII

From farm to space: exploring remote sensing applications for disaster impact analysis in agriculture

157

CONCLUSION

The road to 2030: risk-resilient development pathways for agriculture

177

APPENDICES

187

Technical annex

FAO's damage and loss assessment methodology

188

Glossary

198

References

202

Extreme weather events

India 2019 Though common here, dust storms have become more frequent, intense and deadly, such as this one which struck Prayagraj, killing many.
