## Guidelines on International Classifications for Agricultural Statistics

Food and Agriculture Organization of the United Nations

Publication prepared in the framework of the Global Strategy to improve Agricultural and Rural Statistics

**Cover photo:** ©FAO/Joan Manuel Baliellas ©World Bank/Maria Fleischmann ©FAO/Munir Uz Zaman

This publication is jointly published by the Food and Agricultural Organization and the United Nations (Statistics Division, Department of Economic and Social Affairs)

# Guidelines on International Classifications for Agricultural Statistics

### Contents

Acronyms		ix
Pr	Preface Acknowledgments	
A		
In	troduction	xiii
1	Statistical classifications: concepts, components and documentation	1
-	1 1 What is a statistical classification?	1
	1.2 Components of statistical classifications	4
	1.2.1 Title, identifier and version	6
	1.2.2 Structure, coding system and levels	6
	1.2.3 Descriptors	9
	1.2.5 Case laws	11
	1.2.6 Indexes	12
2	Correspondence tables and data conversion	15
	2.1 Correspondence and conversion tables	15
	2.1.1 One-to-one (1:1)	17
	2.1.2 One-to-many (1:m)	17
	2.1.3 Many-to-one (m:1)	18
	2.1.4 Many-to-many (m:n)	19
	2.2 Converting data according to a new classification	20
	2.2.1 One-to-one: no change	20
	2.2.2 Many-to-one: merge	20
	2.2.4 Many-to-many: merge and split	21
	2.3 Conversion coefficients in one-to-many and many-to-many types of link	23
	2.4 Data conversion to CPC in FAO's new statistical working system	26
3	International classifications for agricultural statistics	31
	3.1 International classifications for agricultural statistics	31
	3.2 Link to the Global Strategy's minimum set of core data	33
	3.3 The International Standard Industrial Classification of All Economic Activities	34
	3.4 The UN Central Product Classification (CPC) and FAO's expansion for agriculture	39
	3.5 The Standard International Trade Classification (SITC)	42
	3.6 The Harmonized Commodity Description and Coding System (HS)	45
	3.7 Classifications of Expenditure	49
	3.7.1 Classification of Individual Consumption According to Purpose – COICOP	49
	3.7.2 Classification of the Function of Government – COFOG	51
	3.8 International Standard Classification of Occupations – ISCO	53
	3.9 International Classification by Status in Employment – ICSE	55
	3.10 International Standard Classification of Education – ISCED	57
	3.11 Land classifications in the UN System of Environmental-Economic Accounting (SEEA) 2012	59
	3.11.1 Land use classification	59
	3.11.2 Land cover classification	60
	3.12 FAU classifications for the World Programme for the Census of Agriculture	63

	3.13 FAO classifications for fisheries and aquaculture statistics	67
	3.14 International classification categories relevant to agriculture, fisheries and forestry	72
4	Implementation of international classifications at country level	73
	4.1 International, regional and national classifications	73
	4.2 How countries can benefit from international statistical classifications	75
	4.3 How to adapt international classifications to individual country needs	76
5	Key messages and recommendations	79
R	eferences	87
A	nnex: Regional and country best practices	95
	A1. Regional initiatives	95
	A1.1 Economic Commission for Latin America and the Caribbean (ECLAC):	
	Working Group on International Classifications (GTCI)	96
	A1.2 Observatoire Economique et Statistique d'Afrique Subsaharienne: "Nomenclature d'	Activités et de
	Produits" (NAEMA and NOPEMA)	98
	A1.3 The Statistical Office of the European Union (EUROSTAT)	100
	A1.5 FAO CountrySTAT project	106
	A2. Country case studies and best practices	108
	A2.1 AFRICA	109
	A2.1.1 Senegal	109
		110
	A2.2 ASIA AND PACIFIC	113
	A2.2.1 Chille	115
	A2.2.2 Daligiauesi	113
	A2.2.3 Malaysia A2.2.4 Philippings	110
	A2.2.4 Independent	173
	A2.3.1 ATIN AMERICA AND THE CARIBBEAN	121
	A2.3.1 Brazil	123
	A2 4 NORTH AFRICA	124
	A2.4.1 Tunisia	124
B	OXES	
	BOX 1: Mandate of the Expert Group on International Statistical Classifications –	
	Terms of Reference (Para.s 6-8)	3
	BOX 2: Remarks/Tips 1	8
	BOX 3: Remarks/Tips 2	10
	BOX 4: Remarks/Tips 3	12
	BOX 5: The Generic Statistical Information Model (GSIM)	14
	BOX 6: Correspondence tables between the same or different types of classifications	16
	BOX 7: Remarks/Tips 4	18
	BOX 8: Remarks/Tips 5	25
	BOX 9: Historical insights on ISIC	36

- BOX 10: Agriculture in ISIC Rev.3.1 and ISIC Rev.4
- BOX 11: Historical insights on the CPC

38

40

BOX 12: The FAOSTAT Commodity List (FCL)	41
BOX 13: Historical insights on the SITC	42
BOX 14: The Harmonized System's governance mechanism	45
BOX 15: Three main features to consider when classifying crops with ICC	64
BOX 16: Remarks/Tips 6	74
BOX 17: Coherence and Comparability in the African Charter on statistics	99

### EXAMPLES

Example 1.1: Flat classification	6
Example 1.2: Hierarchical classification	6
Example 1.3: Numerical codes	7
Example 1.4: Alphabetical and alphanumerical codes	7
Example 1.5: "Speaking code" in a hierarchical classification	7
Example 1.6A: Descriptor of CPC Ver.2.1 code 21421	9
Example 1.6B: Descriptors of CPC Ver.2.1 codes 0311 and 03110	10
Example 1.7: Comparison between descriptor and explanatory note for the HS 2012 heading code 10.05	11
Example 1.8: Case law for "Nasi Nua" in the Harmonized System 2012 (extracted from the HS database)	12
Example 1.9: Extracted from SITC Rev.3, alphabetical index for "grain"	
(source: UNSD Classifications Registry)	13
Example 2.1: Links between classifications and development of a correspondence table	15
Example 2.2: One-to-one type of link between items in Classifications A and B	17
Example 2.3: One-to-many link between items in Classifications A and B	17
Example 2.4: Many-to-one link between items in Classifications A and B	18
Example 2.6: Many-to-many type of link between items in Classifications A and B	19
Example 2.7: Converting data from Classification A to Classification B, in case of one-to-one correlation	20
Example 2.8: Converting data from Classification A to Classification B in case of many-to-one correlation	21
Example 2.9: Converting data from Classification A to Classification B in case of one-to-many correlation	21
Example 2.10: Convert data from Classification A to Classification B in case of many-to-many correlation	22
Example 2.11: Data are available for the same year t0 in both classification formats, A and B:	23
Example 2.12: To backcast old time series from A to B for year t, split ratios from year t0 are applied:	24
Example 2.13: Data conversion from FCL to CPC in case of one-to-one link	26
Example 2.14: Data conversion from FCL to CPC in case of many-to-one link	27
Example 2.15: Data conversion from FCL to CPC in the case of a many-to-one type of link turned into	
one-to-one relations	27
Example 2.16: Data conversion from FCL to CPC in a one-to-many link	28
Example 2.17: Many-to-many relations between FCL and CPC concerning tropical, subtropical and	
other fruit n.e.c.	28
Example 2.18: Data conversion from FCL to CPC in case of many-to-many links	29
Example 4.1: Customize the international classification, adding detail at the lower level in NCs or RCs	76
Example 4.2: Customize the international classification by developing alternative aggregates in NCs or	
RCs, while items at the lower level are linked one-to-one	76
Example A.1: NAEMA Code for "01.13 - Growing of oleaginous crops"	98
Example A.2: NOPEMA Code "01.13.1 - Peanuts"	99
Example A.3: NACE Rev.2 code compared to ISIC Rev.4 code	101
Example A.4: CPA code compared to CPC code	101
Example A.5: Structure of PRODCOM code	102
Example A.6: High-level categories of LUCAS land cover classification (2012)	103
Example A.7: High-level categories of LUCAS land use classification (2012)	104

Example A.8: Additional codes for sorghum for countries in which different varieties are available	
(red and white)	107
Example A.10: CNBS code structure	112
Example A.11: Products listed under CNBS A01.12.01 "Products of horticulture, fresh or chilled"	112
Example A.12: Code structure in China's Product Classification	113
Example A.13: Alternative aggregations in China's Product Classification (in bold green the differences as	
compared to CPC)	113
Example A.14: Additional breakdowns for Rice in China's Product Classification	114
Example A.15: Additional breakdown for Code 0113 in BCPC	116
Example A.16: MCPA structure and links to CPC and HS	118
Example A.17: PSCC code structure for "0303.79.20-01 – Milkfish (bangus), frozen	
(excluding livers and roes)"	120
Example A.18: Relationship between KBKI and CPC structure and codes	121
