Acknowledgments

The consultation on “Quality Management: Linking TPOs and NSBs for Export Success” was jointly organized by ISO (the International Organization for Standardization) and the International Trade Centre (ITC), in partnership with the Department of Standards Malaysia (DSM) and the Malaysia External Trade Development Corporation (MATRADE), respectively the national standards body (NSB) and trade promotion organization (TPO) of Malaysia.

All participating moderators and speakers provided suggestions and advice. Special thanks go to Dato’ Noharuddin Nordin (MATRADE), Mrs. Fadilah Baharin (DSM), Mr. Riyaz Ahmed Memon (Pakistan), Mr. Deo Muni Shakya (Nepal), Mr. Didit Yuan Permadadi (Indonesia), Ms. Tupou Raturaga (Fiji), Mrs. Dayani Dahanayake Yapa (Sri Lanka), Mr. Senen Perlada (Philippines), Mr. Dan Yansom (Papua New Guinea), Mr. Pema Khandu (Bhutan), Mr. Chandranath Som (India) and Mr. Ridzwan Kasim (Malaysia).

ISO and ITC thank DSM and MATRADE and their staff for hosting the event. ISO and ITC acknowledge the financial support of the Swedish International Development Coopera-

tion Agency (Sida), who partly funded the event and the publication.

ISO and ITC are also grateful to the participants for preparing the country papers submitted prior to the Malaysia consultation. The conclusion paper was researched and written by Martin Kellermann, South Africa, in cooperation with Alan Reynolds, United Kingdom; Rajinder Raj Sud, Malaysia; Beer Budoo and Roswitha Franz, of ISO; and Ludovica Ghizzoni, Shyam K. Gujadhur, Sophie Krantz and Bertrand Jocteur-Monrozier, of ITC. This handbook is an edited version of the text of the conclusion paper.

The consultation was conceived and managed by the ITC Enterprise Competitiveness, Export Strategy and Trade Support Institutions Teams, and ISO. The inputs provided by Anton Said, of ITC, on the design of the consultation are well acknowledged. The consultation organization support provided by Hema Menon, of ITC, is also much appreciated.

This handbook was edited and designed by the Communication Services (Marketing, Information and Communication Department) of ISO Central Secretariat.

DISCLAIMER

The designations employed and the presentation of the material in this handbook do not imply the expression of any opinion whatsoever on the part of the ITC, nor on that of ISO, concerning the legal status of any country, territory, city or area or its authorities, or concerning the delimitation of its frontiers or boundaries.

This document has been developed by the authors mentioned above, with editing and publishing by ISO and ITC. Discussions and recommendations do not necessarily reflect the views of ISO and ITC, and are not endorsed by these organizations. While every effort has been made to verify the information contained in this document, neither ITC nor ISO can accept any responsibility for any errors that it may contain. This document is strictly an information document and in no way represents the consensus views contained in ISO standards and other ISO deliverables.

ISO – International Organization for Standardization

ISO has a membership of 163* national standards bodies from countries large and small, industrialized, developing and in transition, in all regions of the world. ISO's portfolio of more than 18 300* standards provides business, government and society with practical tools for all three dimensions of sustainable development: economic, environmental and societal.

ISO standards make a positive contribution to the world we live in. They facilitate trade, spread knowledge, disseminate innovative advances in technology, and share good management and conformity assessment practices.

ISO standards provide solutions and achieve benefits for almost all sectors of activity, including agriculture, construction, mechanical engineering, manufacturing, distribution, transport, medical devices, information and communication technologies, the environ-

ment, energy, quality management, conformity assessment and services.

ISO only develops standards for which there is a clear market requirement. The work is carried out by experts in the subject drawn directly from the industrial, technical and business sectors that have identified the need for the standard, and which subsequently put the standard to use. These experts may be joined by others with relevant knowledge, such as representatives of government agencies, testing laboratories, consumer associations and academia, and by international governmental and non-governmental organizations.

An ISO International Standard represents a global consensus of the knowledge in a particular subject or process, whether it is the state of the art in that subject, or what is good practice.

* September 2010

International Trade Centre (ITC)

ITC : EXPORT IMPACT FOR GOOD

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations.

ITC MISSION

ITC enables small business export success in developing and transition countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers.

ITC OBJECTIVES

- Strengthen the international competitiveness of enterprises through ITC training and support
- Increase the capacity of trade support institutions to support businesses
- Strengthen the integration of the business sector into the global economy through enhanced support to policymakers.
