**INTERNATIONAL INVESTMENT AGREEMENTS:  
KEY ISSUES  
Volume III**

**UNITED NATIONS  
New York and Geneva, 2005**

## Note

As the focal point in the United Nations system for investment and technology, and building on 30 years of experience in these areas, UNCTAD, through DITE, promotes understanding of key issues, particularly matters related to foreign direct investment and transfer of technology. DITE also assists developing countries in attracting and benefiting from FDI and in building their productive capacities and international competitiveness. The emphasis is on an integrated policy approach to investment, technological capacity building and enterprise development.

The term "country" as used in this study also refers, as appropriate, to territories or areas; the designations employed and the presentation of the material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgement about the stage of development reached by a particular country or area in the development process.

The following symbols have been used in the tables:

Two dots (..) indicate that data are not available or are not separately reported. Rows in tables have been omitted in those cases where no data are available for any of the elements in the row;

A dash (-) indicates that the item is equal to zero or its value is negligible;

A blank in a table indicates that the item is not applicable;

A slash (/) between dates representing years, e.g. 1994/1995, indicates a financial year;

Use of a hyphen (-) between dates representing years, e.g. 1994-1995, signifies the full period involved, including the beginning and end years.

Reference to "dollars" (\$) means United States dollars, unless otherwise indicated.

Annual rates of growth or change, unless otherwise stated, refer to annual compound rates.

Details and percentages in tables do not necessarily add to totals because of rounding.

The material contained in this study may be freely quoted with appropriate acknowledgement.

## Acknowledgements

This three-volume set was edited by Karl P. Sauvant, assisted by Jörg Weber. Desktop publishing was done by Teresita Sabico.

UNCTAD's work on IIAs is undertaken by a team led by James Zhan. The principal officer responsible for the production of the chapters was Anna Joubin-Bret who oversaw their development at various stages. The members of the team included, at various stages, Jörg Weber, Victoria Aranda, S. M. Bushehri, Ruwan De Alwis, John Gara, Assad Omer, Federico Ortino, Elisabeth Tuerk, and Cynthia Wallace.

This work was made possible mainly thanks to extrabudgetary resources made available by a number of countries, including financial contributions as well as in-kind contributions such as hosting symposia and training events. In addition, various international organizations, non-governmental organizations and academic institutions cooperated with UNCTAD in the implementation of many of the activities. The secretariat very much appreciates this support.
