**FOREIGN DIRECT INVESTMENT AND
PERFORMANCE REQUIREMENTS:
NEW EVIDENCE FROM SELECTED
COUNTRIES**

**UNITED NATIONS

NOTE

UNCTAD serves as the focal point within the United Nations Secretariat for all matters related to foreign direct investment and transnational corporations. In the past, the Programme on Transnational Corporations was carried out by the United Nations Centre on Transnational Corporations (1975-1992). UNCTAD's work is carried out through intergovernmental deliberations, technical assistance activities, seminars and conferences.

The term "country" as used in this study also refers, as appropriate, to territories or areas; the designations employed and the presentation of the material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgement about the stage of development reached by a particular country or area in the development process.

The following symbols have been used in the tables:

Two dots (..) indicate that data are not available or are not separately reported. Rows in tables have been omitted in those cases where no data are available for any of the elements in the row;

A dash (-) indicates that the item is equal to zero or its value is negligible;

A blank in a table indicates that the item is not applicable, unless otherwise indicated;

A slash (/) between dates representing years, e.g., 1994/95, indicates a financial year;

Use of a hyphen (-) between dates representing years, e.g., 1994-1995, signifies the full period involved, including the beginning and end years;

Reference to "dollars" (\$) means United States dollars, unless otherwise indicated;

Annual rates of growth or change, unless otherwise stated, refer to annual compound rates;

Details and percentages in tables do not necessarily add to totals because of rounding.

The material contained in this study may be freely quoted with appropriate acknowledgement.

Preface

The continuous globalization of the world economy poses new challenges for the governance of economic activities. This is particularly the case in the area of foreign direct investment. Investment and trade liberalization have provided greater freedom to transnational corporations to organize their production activities across borders in accordance with their own corporate strategies and the competitive advantages of host-countries. Countries today view inward foreign direct investment as an important means of integrating their economies with international markets and expect it to contribute to their economic development. Nonetheless, openness alone is not always sufficient for the expected benefits to materialize. In order to narrow the gap between the objectives of host countries and transnational corporations, governments use a variety of policy measures.

Performance requirements can be an important policy tool in this context, to enhance the benefits of, and address concerns related to, inward FDI. Their role in policy-making is still controversial, however. Many developing countries seek to preserve their right to utilize them, arguing that they should have the right to use tools that were available to developed countries when they were industrializing their economies. Developed countries, on the other hand, tend to associate performance requirements with interventionist strategies of the past and question their effectiveness.

In response to a request made by the Commission on Investment, Technology and Related Financial Issues at its sixth session, the present volume is meant to contribute to the debate on performance requirements by bringing new empirical evidence to bear on the subject. To this end, the volume presents four developing country case studies and a review of the experience of developed countries. The focus of

the analysis is on performance requirements that are not prohibited by the WTO Agreement on Trade-Related Investment Measures, but may be addressed in various agreements at the bilateral or regional levels.
