

**UNITED NATIONS CONFERENCE ON TRADE AND DEVELOPMENT
Geneva**

An Implementation Guide to the Clean Development Mechanism

**UNITED NATIONS
New York and Geneva, 2003**

NOTE

Symbols of the United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Material in this publication may be freely quoted or reprinted, but acknowledgement is requested, together with a reference to the document number. A copy of the publication containing the quotation or reprint should be sent to the UNCTAD secretariat.

The views expressed in this publication are those of the authors and do not necessarily reflect the views of the United Nations.

Foreword

On behalf of the UNCTAD/Earth Council Carbon Market Programme, I am pleased to make this study available to the public. It updates a previous publication, "Layperson's Guide to the Clean Development Mechanism", launched in mid-2002, and is part of a series aimed at enabling developing countries to evaluate risks and capture trade and investment opportunities arising from the Kyoto Protocol. The CDM Guide is also intended to assist in the pursuit of the Protocol's goal of combating global climate change in ways that do not place undue pressure on the global economy. Additional UNCTAD publications address the other Kyoto Protocol mechanisms – Emissions Trading and Joint Implementation.

The CDM Guide has been particularly relevant for policy and decision makers. Brazil used it as a basis for its own Brazilian Implementation Guide, and the United Republic of Tanzania is doing the same. Other countries have also expressed interest in using it as a model for developing their own national guides, as a means of explaining CDM to their citizens, and as a tool to interest national and international investors and project developers in CDM opportunities.

These Guides are also part of the online courses now being offered and developed by the UNCTAD/Earth Council Carbon Market E-Learning Centre (CMEC). A description of these courses and other relevant information can be found at <http://www.LearnSD.org>. The first course on the Clean Development Mechanism is now in its fifth session. Other courses will be available soon.

The UNCTAD/Earth Council Carbon Market Programme wishes to thank the United Nations Foundation and the United Nations Fund for International Partnerships for financing the series. We also wish to acknowledge the support of the Government of Norway and the Swiss Agency for the Environment, Forests and Landscape.

Rubens Ricupero
Secretary-General of UNCTAD
