UNITED NATIONS

NOTE

UNCTAD serves as the focal point within the United Nations Secretariat for all matters related to foreign direct investment and transnational corporations. In the past, the Programme on Transnational Corporations was carried out by the United Nations Centre on Transnational Corporations (1975-1992) and the Transnational Corporations and Management Division of the United Nations Department of Economic and Social Development (1992-1993). In 1993, the Programme was transferred to the United Nations Conference on Trade and Development. UNCTAD seeks to further the understanding of the nature of transnational corporations and their contribution to development and to create an enabling environment for international investment and enterprise development. UNCTAD's work is carried out through intergovernmental deliberations, research and analysis, technical assistance activities, seminars, workshops and conferences.

The term "country" as used in this study also refers, as appropriate, to territories or areas; the designations employed and the presentation of the material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgement about the stage of development reached by a particular country or area in the development process.

The following symbols have been used in the tables:

Two dots (..) indicate that data are not available or are not separately reported. Rows in tables have been omitted in those cases where no data are available for any of the elements in the row;

A dash (-) indicates that the item is equal to zero or its value is negligible;

A blank in a table indicates that the item is not applicable;

A slash (/) between dates representing years, e.g. 1994/95, indicates a financial year;

Use of a hyphen (-) between dates representing years, e.g. 1994-1995, signifies the full period involved, including the beginning and end years.

Reference to "dollars" (\$) means United States dollars, unless otherwise indicated.

Annual rates of growth or change, unless otherwise stated, refer to annual compound rates.

Details and percentages in tables do not necessarily add to totals because of rounding.

The material contained in this study may be freely quoted with appropriate acknowledgement.

Preface

The United Nations Conference on Trade and Development (UNCTAD) is implementing a work programme on a possible multilateral framework on investment, with a view towards assisting developing countries to participate as effectively as possible in international investment rule-making at the bilateral, regional, plurilateral and multilateral levels. The programme embraces capacity-building seminars, regional symposia, training courses, dialogues between negotiators and groups of civil society and the preparation of a series of issues papers.

This paper is part of that series. It is addressed to Government officials, corporate executives, representatives of non-governmental organizations, officials of international agencies and researchers. The series seeks to provide balanced analyses of issues that may arise in discussions about international investment agreements. Each study may be read by itself, independently of the others. Since, however, the issues treated closely interact with one another, the studies pay particular attention to such interactions.

The series is produced by a team led by Karl P. Sauvant and Pedro Roffe. The principal officer responsible for its production is John Gara who oversees the development of the papers at various stages. The members of the team include Mattheo Bushehri, Obiajulu Ihonor, dnnn Joubin-Bret, Patricia Mira Ponton, Cynthia D. Wallace and Jörg Weber. The series' principal advisors are Arghyrios A. Fatouros, Sanjaya Lall and Peter T. Muchlinski. The present paper is based on a manuscript prepared by Dali Bouzora. Substantive supervision and inputs were provided by Cynthia D. Wallace. The final version reflects comments received from Susan Borkowski, Joachim Karl, Helmut Krabbe, Jeffrey Owens and Suresh Shende. The paper was desktop-published by Teresita Sabico.
