This study was drafted by Mark Pearson, international consultant, under the direct supervision of Stefano Inama, Chief of the Enhanced Integrated Section and Technical Cooperation Section of UNCTAD's Division for Africa, Least Developed Countries, and Special Programmes (ALDC). The work was completed under the overall supervision of Paul Akiwumi, Director, Division for Africa, Least Developed Countries and Special Programmes.

This corridor diagnostic draws from the findings and action matrices of the Diagnostic Trade Integration Study (DTIS) of Ethiopia and Djibouti as well as of previous work done on assessing the performance of the corridor, and so builds on an already significant body of knowledge.

In addition, insight and advice has been provided by Dr. Taffere Tesfachew, former Director of ALDC. Significant contributions were made by Eyob Tekalign Tolina and Mwansa James Musonda, who were part of the team who prepared the time release study for the Ethiopian Galafi border post financed by the African Development Bank through the Common Market for Eastern and Southern Africa in 2017.

The Enhanced Integrated Framework National Implementation Units (NIUs) in Djibouti and Ethiopia contributed to the realization of this study through their insights and through help given to the study team in securing meetings with stakeholders.

As is normal practice, any errors in the study are the responsibility of the author.

Madasamyraja Rajalingam was responsible for the layout and desktop publishing, Magali Studer designed the cover and additional support was provided by Pramilla Crivelli, Stefanie Garry and Michaela Summerer.
