THE ROLE OF HOST GOVERNMENTS IN ENABLING OR PREVENTING CONFLICT ASSOCIATED WITH MINING

Full-length version

Prepared by

**Tony Andrews, Jonathan Gamu, Philippe Le Billon, Chang Hoon Oh, David Reyes
and Jioung Shin**

For

**The United Nations Development Program (UNDP)
The Canadian International Resources and Development Institute (CIRDI)**

*In essence, governments construct the garden, prepare the soil, plant the seeds and tend the garden,
from inception through to maturity, and through their actions and non-actions produce the fertile
ground for sustainable development or sustained conflict.*

THE RESEARCH TEAM

MAIN AUTHORS

Team Member	Project Role	Affiliation
Tony Andrews, PhD	Project Lead, Ghana Case Study Lead	Principal and Co-Founder, Centre for Responsible Mineral Development Inc., Toronto
Jonathan Gamu, PhD	Literature Survey Leads	Jonathan Kishen Gamu Postdoctoral Fellow Universidade de Brasilia Brasilia, Distrito Federal, Brasil
Philippe Le Billon, PhD		Department of Geography and Liu Institute for Global Issues, Faculty of Arts, University of British Columbia
Chang Hoon Oh, PhD	Quantitative Analysis Lead	Beedie Research Fellow and Professor of International Business, Beedie School of Business, Simon Fraser University
Jiyoung Shin, PhD	Quantitative Analysis	Post-doctoral Research Fellow, Beedie School of Business, Simon Fraser University
David Reyes, PhD	Ghana Case Study	Associate, Triple R Alliance, Exeter, NH, USA

As indicated above each member of the team took responsibility for conducting individual components of the overall study. All members of the research team also contributed their ideas and creativity to the design of this study and the analysis and interpretation of the combined results. Jiyoung Shin, a post-doctoral research fellow at the Beedie School of Business, Simon Fraser University, assisted Chang Hoon Oh in the quantitative analysis.

ACKNOWLEDGEMENTS

The authors thank the United Nations Development Program (UNPD) for providing the financial support for this project and the Canadian International Resources and Development Institute (CIRDI) for providing administrative support, in particular to Olena Soldatova, Olga Cherepanova and Marie-Luise Ermisch. Special thanks to Sarah Daitch and Casper Sonesson of UNDP for providing very helpful feedback on the early drafts of the report and creating opportunities for presenting this research via webinar to a variety of audiences. The study results were also discussed in a one-day workshop presented in Vancouver (November, 2017) and a seminar presented during the PDAC Convention in Toronto (March, 2018), both organized by Rob Stevens of CIRDI. Our appreciation is also extended to a group of reviewers, Margaret Wachenfeld, Themis Research; Uyanga Gankhuyag, Bangkok Regional Hub, United Nations Development Programme; Zamira Djabarova, Human Rights Attorney with the American Bar Association; Beatriz Mejia-Asserias, Director for Public-Private Engagement, APC-Colombia; and Endre Stiansen, Oslo Governance Centrem, whose thoughtful comments and suggestions significantly improved the report structure and content.

Tony Andrews and David Reyes extend their sincere thanks to the Minerals Commission of Ghana who approved and supported the project and in particular to Steven Korshi Agbo, Senior Social Scientist with the Minerals Commission, for the very generous contribution of his time and effort in helping to set up the field schedule in Ghana, arranging meetings with the stakeholders and sharing his considerable knowledge and experience. We also extend our appreciation to Toni Aubynn, CEO of the Minerals Commission at the time, for supporting the project and Steven's participation.

Last but not least we extend our sincere thanks to all of the Ghanaian stakeholders, including community authorities, traditional leaders, ASM operators, NGOs, mining company representatives and representatives of the central government for their willingness to give their time and share their knowledge and experience, without which the field-case study would not have been possible.
