A TOOLKIT FOR

**Integrating Disaster Risk Reduction and
Climate Change Adaptation into**

**ECOSYSTEM MANAGEMENT
OF COASTAL AND MARINE AREAS
IN SOUTH ASIA**

Prepared by : Sriyanie Miththapala, Vishwas Sawarkar, Pramod Krishnan and Madhavi Malalgoda Ariyabandu

Contents

List of Acronyms	x
Acknowledgements	xii
Foreword	xiii
1. Introduction	1
Background	1
Threats to coastal and marine environment	3
Climate change and the coastal and marine environment	3
Disasters and the coastal and marine environment	4
The resilience of coastal and marine ecosystems: Its bearing on DRR and CCA	4
Integrating DRR and CCA into ecosystem management	7
2. The Ecosystem Approach	9
Background	9
EbA: Practical application of the ecosystem approach	10
1. First line of defence against climate change and disasters	10
2. Enhancing livelihoods and ensuring food security	11
3. Improving the prospects of biodiversity conservation in the wake of climate change	11
4. Sustainable water management	12
EbA: Linkages in practice	17
3. Disaster Risk Reduction	20
Disaster-prone Asia	21
Coastal vulnerability in South Asia	22
Inter-linkages among DRR, CCA and ecosystem-based management	33
4. Climate Change	35
Impacts of climate change on the coastal and marine environment of South Asia	37
Approaches to dealing with climate change	41
Mitigation	41
Adaptation	42
5. A Snapshot of the Physical Features and Socio-economics of the Focal Region	43
South Asia	43
Physical and ecological features	43
Coastline	45
Economy	45
Poverty	48
Demography	49
Health	53
Education	55
6. Issues Relating to DRR, CCA and Ecosystem Management in South Asia	58
Introduction	58
Loss of coastal habitats in the region	58
Coral reefs	59
Mangroves	59
Seagrasses	59
Salt marshes	59

Coastal erosion and its impacts on coastal ecosystems	66
Coastal infrastructure and its impacts on coastal ecosystems	66
Knowledge management concerns	66
Capacity concerns	67
Coordination	67
Institutions	68
Laws	68
Organizations	68
7. Knowledge Needs of Coastal Managers	69
Knowledge generation	69
Hazard vulnerability and risk assessments	70
1. Define the boundaries of the target area	70
2. Identify and map the hazard	71
3. Assess the vulnerability	72
4. Assess risk	73
Mitigation strategy planning	74
Identify mitigation tools	75
Hard engineering	75
Ecosystem restoration	75
Evaluate and select mitigation tools	78
Other knowledge needs	78
Carrying out climate-specific research on species	78
Using bio-indicators as natural early warnings of changes in ecosystem health	80
Integrating traditional knowledge into the knowledge base	82
Knowledge sharing and dissemination	82
Knowledge resources	83
DRR	83
Climate change	84
Biodiversity and ecosystems	85
8. Institutional Strengthening for Better Governance	90
1. Carry out institutional mapping	90
Step 1: Carry out organizational mapping	91
Step 2: Carry out a review of existing laws and treaties	94
2. Forge partnerships	97
9. Improving Coordination	99
Step 1: Develop a mechanism for ensuring coordination among all coastal stakeholders	100
Step 2: Develop a common action plan and strategy to be used by DRR, CCA and ecosystem managers with shared and individual responsibilities	102
Step 3: Integrate environmental management plans that include DRR and CCA into development sectors (for example, tourism)	102
10. Strengthening Capacity	107
Gap 1. Lack of understanding of DRR and CCA by the different stakeholders	107
Step 1. Improve the capacity of coastal managers for DRR and CCA	107
Step 2. Improve the capacity of communities for DRR and CCA	108

1. Identify your stakeholders and categorize them	108
2. Analyse stakeholders by impact and influence	109
3. Understand stakeholders	110
4. Engage the stakeholders	111
Step 4. Improving the capacity of decision makers for DRR and CCA	111
Gap 2. Awareness of the importance of ecosystems in mitigating the impacts of natural hazards and the long-term effects of climate change	112
Step 1. Improve the capacity of coastal managers in EbA	112
Step 2. Improve the capacity of communities for EbA	113
Gap 3. Awareness among policy makers, planners and administrators (including politicians) about the linkages among DRR, CCA and ecosystem management	113
11. Improving the Management of Coastal Areas	117
Step 1: Ensure that management plans have DRR and CCA incorporated into them	117
Step 2: Involve communities in management	118
Step 3: Promote climate-resilient livelihoods	119
Step 4: Know disaster response procedures for the locality	119
Step 5: Ensuring better management of protected areas	119
Know all the protected areas in the locality	120
Step 6: Make management adaptive	128
12. Conclusion	130
The impacts of natural disasters on MDGs	131
The impacts of climate change on MDGs	132
The impacts of biodiversity loss on MDGs	132
13. References	134
14. Annex 1	149
Hyogo Framework for Action (HFA)	
15. Annex 2	150
The United Nations Framework Convention on Climate Change (UNFCCC)	
16. Annex 3	151
The Convention on Biological Diversity (CBD)	
17. Annex 4	153
Principles of the Ecosystem Approach	

List of Tables

Table 2.1.	Ecosystem services of coastal ecosystems	13
Table 3.1.	Types of hazards prevalent in South Asia	23
Table 3.2.	Natural hazards and their impacts on focus countries and coastal ecosystems	25
Table 3.3.	The impacts of climate change on hazards and ecosystems	33
Table 3.4.	The impacts of ecosystem degradation on hazards and climate change	34
Table 4.1.	Impacts of climate change on coastal ecosystems and human well-being in coastal areas	40
Table 5.1.	Flora and fauna of South Asia	44
Table 5.2.	Length of the coastline in each focal country	45
Table 5.3.	Economic indicators in the focal countries	46
Table 5.4.	Poverty statistics for the focal countries	48
Table 5.5.	Population statistics for the focal countries	50
Table 5.6.	Health indicators in the focal countries	55
Table 5.7.	Education indicators in the focal countries	56
Table 5.8.	The impacts of climate change and natural disasters on women	56
Table 6.1.	Threats to coral reefs	59
Table 6.2.	Threats to seagrass meadows	62
Table 6.3.	Threats to sand dunes	63
Table 6.4.	Threats to salt marshes	64
Table 6.5.	Threats to mangroves	65
Table 8.1.	Laws, policies and international treaties related to protecting coastal and marine resources, DRR and CCA in the focal countries	96
Table 10.1.	The monetary value of coastal ecosystem services	113
