# UNDP LOW EMISSION CAPACITY BUILDING (LECB) PROGRAMME

This product was developed under the LECB Programme, with generous funding from the European Commission (EC), the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Australian Government.

The UNDP Low Emission Capacity Building (LECB) Programme is a country-driven initiative that promotes essential cooperation between relevant institutions, engaging the public sector and industry in a concerted effort to design and implement approaches to low emission development that are consistent with national development priorities. National counterparts are supported to strengthen technical and institutional capacities to identify and formulate Nationally Appropriate Mitigation Actions (NAMAs) and Low Emission Development Strategies (LEDS) in the public and private sectors, and to strengthen the underlying greenhouse gas inventory management and Measurement, Reporting and Verification (MRV) systems.

The LECB Programme runs through 2016 and is active in 25 countries: Argentina, Bhutan, Chile, China, Colombia, Costa Rica, the Democratic Republic of Congo (DRC), Ecuador, Egypt, Ghana, Indonesia, Kenya, Lebanon, Malaysia, Mexico, Moldova, Morocco, Peru, Philippines, Tanzania, Thailand, Trinidad and Tobago, Uganda, Vietnam and Zambia.

The programme is supported through generous contributions from the European Commission, the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB), and the Government of Australia.

More information can be found at [www.lowemissiondevelopment.org](http://www.lowemissiondevelopment.org)

**Australian Government**

Supported by:

Federal Ministry  
for the Environment, Nature Conservation,  
Building and Nuclear Safety

based on a decision of the German Bundestag

## TABLE OF CONTENTS

List of Figures	6
List of Tables	7
Abbreviations and Acronyms	9
Executive Summary	11
1. Introduction to NAMAs	14
1.1. Green Schools NAMA – An Opportunity for Uganda	15
2. Background to Uganda	17
2.1. Country Topography	18
2.2. Country Administration	19
2.3. Climate and Natural Conditions	20
2.4. Demography	20
2.5. Socioeconomic Situation	21
3. Background to the Education Sector	23
3.1. Institutional Framework, Governance and Management	23
3.2. Financing of Uganda School System	24
3.3. Structure of the Education System	25
3.3.1 Primary Education	26
3.3.2 Post-Primary Education	28
3.3.3 Secondary Education	29
3.3.4 Post-Secondary (Tertiary) Education	32
3.3.5 Non-Formal Education	33
3.4. Staffing and Infrastructure Facilities of the Schools	34
3.5. Summary and Challenges of the Education Sector	37
4. Background to the Energy Situation at Schools	38
4.1. Energy for Cooking	39
4.1.1 Cooking Fuel	39
4.1.2 Cooking technologies	39
4.2. Electricity and Energy for Lighting	44

4.3.	Barriers and Gaps with respect to Sustainable Energy Solutions in Schools	46
4.4.	NAMA Solutions for the Transformational Change	47
5.	Policy Environment in Uganda	50
5.1.	Constitution of Uganda	50
5.2.	Vision 2040	51
5.3.	Development Policies	52
5.3.1	The National Development Plan	52
5.3.2	Millennium Development Goals & Sustainable Development Goals	52
5.4.	Education Policies	57
5.4.1	Government White Paper on Education	57
5.4.2	Educational Sector Strategic Plan 2004 –2015	57
5.5.	Energy Policies	58
5.5.1	National Energy Policy	58
5.5.2	Renewable Energy Policy	59
5.6.	Climate Change Policies	60
5.6.1	National Climate Change Policy	60
5.6.2	Nationally Determined Contributions	62
5.6.3	Financing the NDC	
5.7.	Summary and Conclusions	64
6	NAMA Baseline Information	65
6.1.	The NAMA Boundary	65
6.2.	GHG Emission Reduction Baseline	65
6.2.1	GHG Baseline for Cooking Technologies	66
6.2.2	Determining GHG Emission Reduction for Cooking Technologies	66
6.2.3	GHG Baseline for PV Electricity Systems	66
6.2.4	Determining the GHG Emission Reduction for PV Electricity Systems	68
6.3.	Sustainable Development Baseline	69
7.	NAMA Solutions and Approach	72
7.1.	NAMA Launch, Implementation and Roll-Out	74
7.1.1	Physical Interventions Roll-Out	74
7.2.	NAMA Targets	77

8.	NAMA Interventions	80
8.3.	Intervention 1: Improved institutional cookstoves (IICSs)	81
8.4.	Intervention 2: Improving cooking and sanitation conditions of schools with IICSs and biolatrines	84
8.5.	Intervention 3: Solar PV installations	86
9.	NAMA Measures–Technical Assistance and Capacity-Building	91
9.1.	Measure 1: Establish the NAMA Implementing Entity (NIE)	91
9.2.	Measure 2: Technical Assistance to the Government	92
9.2.1	Capacity-Building for NAMA Coordinating Authority	93
9.2.2	GIS-Based Schools Database	94
9.2.3	Adaptation of the ACS	94
9.3.	Measure 3: Business Model for PV Systems	95
9.4.	Measure 4: Capacity-Building and Awareness	95
9.5.	Measure 5: Life Skills Programme	96
10.	Implementation Structure	97
10.1.	National NAMA Approver/Focal Point	98
10.2.	National NAMA Coordinating Authority (NCA)	99
10.3.	NAMA Implementing Entity (NIE)	101
10.4.	NAMA Executing Entities (NEEs)	103
10.4.1	NEEs for Technology Interventions–Technology Suppliers	103
11.	NAMA Finance	107
11.1.	Overview of NAMA Finance	107
11.2.	Scenario for NAMA Finance	108
11.3.	NAMA Finance–Measures	111
11.4.	NAMA Finance–Interventions	113
11.4.1	CSR Model	113
11.4.2	Crowd Funding Model	114
11.5.	Revolving Loan Fund and NAMA Business Model	114
11.5.1	The Revolving Loan Fund (RLF)	115
11.5.2	Conclusions	117

12.	NAMA MRV System	119
12.1.	Measurement	119
12.1.1	GHG Emissions Reductions	119
12.1.2	Sustainable Development Benefits	129
12.1.3	Financial Support	133
12.2.	Verification	133
	References	134
