Please note that this document is a guideline and serves as a reference and supportive text relating to the integration of HIV and gender-related issues into the Environmental Assessment process. It does not seek to be a definitive guideline on any of the Environmental Assessment tools such as Strategic Environmental Assessment (SEA), Environmental Impact Assessment (EIA), Social Impact Assessment or Health Impact Assessment, as these are covered in many other publications, which are listed in Appendix A of this document. Furthermore, the recommendations made in the guidelines should not take the place of any specific legal requirements of any country; rather, these guidelines should be used as ideas and options to improve best practice within the context of each country's legal and administrative frameworks.

The views expressed in this publication are those of the author(s) and do not necessarily represent those of the United Nations, including UNDP, or the UN Member States.

Glossary and definitions viii

1. Introduction to the guidelines 2
   - 1.1 HIV epidemic in eastern and southern Africa 2
   - 1.2 Key drivers of the epidemic 2
   - 1.3 Environmental Assessment tools 5
     - 1.3.1 Strategic Environmental Assessment 6
     - 1.3.2 Environmental Impact Assessment 7
   - 1.4 Need for EA strengthening to include HIV and gender-related Issues 8
   - 1.5 Purpose of the guidelines 10
   - 1.6 How to use the guidelines 12

2. Roles and responsibilities of key stakeholders in the EA process 14
   - 2.1 Government authorities 16
     - 2.1.1 Environmental authorities 16
     - 2.1.2 Line ministries 17
     - 2.1.3 Other ministries and government agencies 18
     - 2.1.4 Local government and traditional leaders 19
   - 2.2 Proponents, contractors and suppliers 19
     - 2.2.1 Proponent/developer 19
     - 2.2.2 Contractors 20
   - 2.3 EA consultants 22
   - 2.4 Civil society stakeholders 22
   - 2.4.1 Directly affected parties 23
   - 2.4.2 Interested parties 23

3. Best practice guidelines for integrating HIV and gender-related issues into Strategic Environmental Assessment 26

3.1 SEA process 26

3.2 Initial steps in the SEA process (scoping) 28

- 3.2.1 Actions to be taken during SEA scoping to integrate HIV and gender-related issues 28

3.3 Conducting the SEA 30
3.3.1 Actions to be taken during the SEA to integrate HIV and gender-related issues 31
3.4 Strategic Environmental Management Plan 36
3.4.1 Best practice guidance for the formulation of an HIV and gender-inclusive SEMP 36
3.5 Monitoring and evaluation 38
3.5.1 Best practice guidance for monitoring compliance with the SEMP 38
4, Best practice guidelines for integrating HIV and gender-related issues into Environmental Impact Assessment 40
4.1 Environmental Impact Assessment in relation to the project life cycle 40
4.2 Screening and project concept development 42
4.2.1 Definition 42
4.2.2 Types of screening 42
4.2.3 Actions to be taken during screening to integrate HIV and gender-related issues 44
4.3 Scoping and pre-feasibility studies 45
4.3.1 Definitions 46
4.3.2 Basic elements of scoping 46
4.3.3 Actions to be taken during scoping to integrate HIV and gender-related issues 47
4.4 Public consultation 50
4.4.1 Actions to be taken during public consultation to integrate HIV and gender-related issues 52
4.5 EIA and detailed feasibility studies 55
4.5.1 Definitions 55
4.5.2 Aims and objectives of the EIA 56
4.5.3 Actions to be taken during the EIA to integrate HIV and gender-related issues 56
4.6 EMP, final design and tendering 60
4.6.1 Definition 61
4.6.2 Types of EMP 61
4.6.3 Actions to be taken during formulation of the EMP and tendering to integrate HIV and gender-related issues 62
4.6.4 Environmental monitoring 66
4.6.5 Actions to be taken during environmental monitoring to integrate HIV and gender-related issues 68
4.7 Compliance monitoring during project construction 71

4.7.1 Actions to be taken during compliance monitoring to integrate HIV and gender-related issues 72

4.8 Project operations audits 73

4.8.1 Actions to be taken during project operations to mainstream HIV and gender-related issues 73

5. Summary and conclusions 78

Boxes

1	Example of an SEA taking into account the risks of HIV	6
2	Definitions of the term 'environment'	7
3	Failure to implement the recommendations made in the EMP	8
4	Example of a principle of social justice and equity	9
5	Definition on integrating HIV into EA	10
6	Conflict between government departments	14
7	Role of the ministry responsible for labour	15
8	HIV and AIDS in the workplace	16
9	Corporate Social Responsibility (ICMM)	17
10	Mongbwalu project, DRC	18
11	Mobility as a driver of HIV	18
12	Bujugali hydropower project, Uganda	18
13	Example of a sector SEA	22
14	Decision criteria and desired outcomes for sustainable development with a focus on health	28
15	Key questions to be answered in the SEA process relating to HIV	29
16	Coordinating the Namibian 'uranium rush'	31
17	Screening examples	35
18	Bujugali hydropower project – a good example of where HIV was recognized as a key public health issue at an early stage of project formulation	38
19	Questions to ask of an EMP	48
20	Focus on settings	49
21	Recommended HIV mitigation actions to be taken during construction and operation of a project by all contractors and project owners	50
22	Example of an HIV monitoring protocol	54
23	Some examples of good corporate social responsibility programmes	57
