Acknowledgements

This *Handbook* is the result of cooperation among a number of organisations and individual experts. Special thanks are extended to the lead author, Sarah Richardson (Maeander Enterprises Ltd., Canada).

At UNEP, the project was initiated and led by Hussein Abaza. Sophie Forster Carbonnier and Mariko Hara coordinated and provided technical and logistical support to the project. The country teams prepared the full studies as well as the summaries included in the Synthesis report (*Integrated Assessment of the Impact of Trade Liberalization on the Rice Sector; UNEP Country Projects Round III, A Synthesis Report*). Thanks are due to Jan Joost Kessler, Konrad von Moltke and Fulai Sheng for having provided critical reviews of draft reports. This appreciation is also extended to the members of the international working group on rice set up by UNEP to guide and implement the projects and provide comments. The members of this group, who attended the two international expert meetings on 19-20 February and 17-18 November 2003 in Geneva, and provided useful contributions and comments on these occasions, are: Tunji Akande, Nigerian Institute of Social and Economic Research; Claude Auroi, IUED (Institut Universitaire d'Etudes du Développement); Laurent Bardon, European Commission; Luisa Bernal, South Centre; Concepción Calpe, FAO; Céline Charveriat, Oxfam International; Martha Chouchena-Rojas, IUCN; Aliou Diagne, West Africa Rice Development Association; Salah El Serafy; Aimée Gonzales, WWF International; Dongmei Guo, State Environmental Protection Administration, China; Nestor Gutierrez, Federación Nacional de Arroceros, Bogota; Mark Halle, IISD; Dimitris Kiakosavvas, OECD; Panos Konandreas, FAO; Doug Koplow, Earth Track, Inc.; Hans-Jörg Lehmann, Federal Office for Agriculture, Bern; Eric Peters, European Commission; Majda Petschen, WTO; Shishir Priyadarshi, South Centre; Abdoulaye Sene, Institut des Sciences de l'Environnement, Dakar; Shefali Sharma, IATP; Miho Shirotori, UNCTAD; Matus Suparmoko, Jenderal Soedirman University, Indonesia; Robert Teh, WTO; Gerard van Dijk, UNEP Regional Office for Europe; Truong van Tuyen, Hue University of Agriculture and Forestry, Viet Nam; Scott Vaughan, OAS (ex-Carnegie Endowment); Rene Vossenaar, UNCTAD; Alex Werth, ICTSD.

The following individuals are also acknowledged for their reviews and comments on this document: Evelin Bermudez, WWF International; Ron Bisset, BMT Cordah Limited; Laksmi Dhewanthi, Ministry of Environment, Indonesia; Roula El Cheikh, Ministry of Environment, Lebanon; Ursula Holzhauser, Permanent Mission of the Federal Republic of Germany, Switzerland; Markus Lehmann, UN Convention on Biological Diversity; Peter Adebola Okuneye, The University of Agriculture, Nigeria; Mireille Perrin, WWF International.

Susan Broomfield edited the text and logistical support was provided by Desiree Leon and Rahila Mughal from UNEP.

Finally, UNEP/ETB wishes to gratefully acknowledge the funding from the Norwegian Ministry of Foreign Affairs, which made this project possible.

United Nations Environment Programme

The United Nations Environment Programme (UNEP) is the overall coordinating environmental organisation of the United Nations system. Its mission is to provide leadership and encourage partnerships in caring for the environment by inspiring, informing and enabling nations and people to improve their quality of life without compromising that of future generations. In accordance with its mandate, UNEP works to observe, monitor and assess the state of the global environment, improve the scientific understanding of how environmental change occurs, and in turn, how such change can be managed by action-oriented national policies and international agreements. UNEP's capacity building work thus centres on helping countries strengthen environmental management in diverse areas that include fresh-water and land resource management, the conservation and sustainable use of biodiversity, marine and coastal ecosystem management, and cleaner industrial production and eco-efficiency, among many others.

UNEP, which is headquartered in Nairobi, Kenya, marked its first 30 years of service in 2002. During this time, in partnership with a global array of collaborating organizations, UNEP has achieved major advances in the development of international environmental policy and law, environmental monitoring and assessment, and the understanding of the science of global change. This work also supports the successful development and implementation of the world's major environmental conventions. In parallel, UNEP administers several multilateral environmental agreements (MEAs) including the Vienna Convention's Montreal Protocol on Substances that Deplete the Ozone Layer, the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and their Disposal (SBC), the Convention on Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (Rotterdam Convention, PIC) and the Cartagena Protocol on Biosafety to the Convention on Biological Diversity as well as the Stockholm Convention on Persistent Organic Pollutants (POPs).

Division of Technology, Industry and Economics

The mission of the Division of Technology, Industry and Economics (DTIE) is to encourage decision makers in government, local authorities and industry to develop and adopt policies, strategies and practices that are cleaner and safer, make efficient use of natural resources, ensure environmentally sound management of chemicals, and reduce pollution and risks for humans and the environment. In addition, it seeks to enable implementation of conventions and international agreements and encourage the internalisation of environmental costs. UNEP DTIE's strategy in carrying out these objectives is to influence decision-making through partnerships with other international organisations, governmental authorities, business and industry, and non-governmental organisations; facilitate knowledge management through networks; support implementation of conventions; and work closely with UNEP regional offices. The Division, with its Director and Division Office in Paris, consists of one centre and five branches located in Paris, Geneva and Osaka.

Economics and Trade Branch

The Economics and Trade Branch (ETB) is one of the five branches of DTIE. Its mission is to enhance the capacities of countries, especially of developing countries and countries with economies in transition, to integrate environmental considerations into development planning and macroeconomic policies, including trade policies. ETB helps countries to develop and use integrated assessment and incentive tools for sustainable development and poverty reduction. The Branch further works to improve the understanding of environmental, social and economic impacts of trade liberalization and the trade impacts of environmental policies, and to strengthen coherence between Multilateral Environmental Agreements and the World Trade Organisation. Through its finance initiative, ETB helps enhance the role of the financial sector in moving towards sustainability.

In the field of environmental economics, ETB aims to promote the internalisation of environmental costs and enhance the use of economic instruments to contribute to sustainable development and poverty reduction, including in the specific context of Multilateral Environmental Agreements. The UNEP Working Group on Economic Instruments, serves as an advisory body to UNEP-ETB's work programme on economics and has been instrumental in the preparation of UNEP publications on economic instruments.
