

# CARIBBEAN ENVIRONMENT OUTLOOK

Special Edition for the Mauritius International Meeting for the  
10-year Review of the Barbados Programme of Action for the  
Sustainable Development of Small Island Developing States

## ACKNOWLEDGEMENTS

### *Editor*

Sherry Heileman, Consultant

### *Lead authors*

Leslie John Walling (Belize), Dr Charles Douglas (Jamaica), Maurice Mason (Jamaica) and Marcia Chevannes-Creary (Jamaica)

The United Nations Environment Programme (UNEP) would like to thank the following individuals and institutions who played a vital role in the production of this report:

The Caribbean Community Secretariat and the University of the West Indies Centre for Environment and Development (UWICED) for being the partners in this project. The Caribbean Community Climate Change Centre (CCCCC) and the staff at the Mainstreaming Adaptation to Climate Change (MACC) for assistance during the review of this report.

Cletus Springer (St Lucia), Michael Haley (Jamaica), John Hammerton (Bahamas), Christopher Corbin (St Lucia), Una-May Gordon (Barbados), Cecile Blake (Jamaica), Jacob Opedayi (Trinidad and Tobago), Pauline Silver (Belize), Lloyd Gardner (Jamaica), Anthony Deyal (Belize), Herold Gopaul (St Lucia), Elizabeth Riley (Barbados), Dulcie Linton (Jamaica) and Rawlestone Moor (Barbados).

Participants in the *Caribbean Environment Outlook* Booklet Consultation which took place on 29 January 2004, in Nassau, The Bahamas (during the Interregional Preparatory Meeting for Barbados +10), also made a significant contribution to this report. They are: Earlston McPhee (Bahamas), Hilary Hazel (St Kitts and Nevis), Shirley Skerritt-Andrew (St Kitts and Nevis), Vasantha Chase (St Lucia), John Hammerton (Bahamas), Sheila G.

Cox (Bahamas), Leonie Barnaby (Jamaica), Patrick McConney (Barbados), Enrique Dalmau (Cuba), Patricia Aquing (St Lucia), Reynold Murray (St Vincent), Navin Chandarpal (Guyana), Conrod Hunte (Antigua and Barbuda), Milton Haughton (Belize), Bishnu Persaud (Guyana), Chris Corbin (St Lucia), Kelvin Penn (British Virgin Islands), Edwin Carrington (Guyana), Jose L. Gerhartz (Jamaica), Sharon Lindo (Belize), Leonardo Nurse (Barbados), Byron Blake (Guyana), Ricardo Sanchez Sosa (Mexico) and Mark Griffith (Mexico). Thanks go to Diane Quarless (SIDS Unit) and United Nations Department for Economic and Social Affairs (UNDESA) for facilitating this consultation.

Sincere appreciation is also extended to Arthur Dahl (Consultant Advisor, UNEP), Espen Ronneberg (UNDESA) for providing useful information and comments, and Janet Strachan (Commonwealth Secretariat, London) for providing useful literature and hosting the SIDS Environment Outlook inception meeting. We also thank Anthony Deyal, Media Coordinator of MACC, for raising awareness about this report within and outside of the region.

### *UNEP Coordination Team*

Marion Cheatle, Munyaradzi Chenje, Jacquie Chenje, Kakuko Nagatani-Yoshida, Harsha Dave, Josephine Wambua and Anne Muchiri

### *UNEP Support Team*

Ricardo Sanchez Sosa (Regional Office for Latin America and the Caribbean), Luc St-Pierre (Regional Coordinating Unit, Jamaica), Isabel Martinez (Global Programme of Action for the Protection of the Marine Environment from Land-based Activities, The Netherlands) and Ed Green (UNEP-WCMC, UK), Johannes Akiwumi, Michael Mwangi and Brian Ochieng (UNEP, Nairobi)

# CONTENTS

<b>Foreword</b>	vii
<b>Executive summary</b>	1
<b>Chapter 1</b>	
<b>INTRODUCTION</b>	8
<i>Scope of the Caribbean Environment Outlook</i>	12
<b>Chapter 2</b>	
<b>STATE OF THE ENVIRONMENT</b>	14
Geopolitical arrangements	15
Biophysical characteristics	17
Economic performance	17
Demographics and social performance	27
Environmental trends	32
Land and food	32
Forests	34
Natural disasters	39
Waste management and pollution	44
Freshwater	49
Biodiversity	51
Marine and coastal areas	56
Conclusion	64
<b>Chapter 3</b>	
<b>POLICY RESPONSES</b>	66
Action plans and non-binding agreements	68
Global and regional action plans	68
National action plans and strategies	71
Global and regional multilateral environmental agreements	75
National laws	80
Regional institutions and programmes	81
Caribbean Environment Programme	81
International Coral Reef Action Network Project	83
Integrating Watershed and Coastal Area Management in Small Island Developing States of the Caribbean (IWCAM)	83
Caribbean Blue Flag Programme	83
Caribbean Global Water Partnership	83
Designating the Caribbean Sea as a Special Area	84
Caribbean Planning for Adaptation to Climate Change Project (CPACC)	84
The Caribbean Regional Fisheries Mechanism (CRFM)	85

Economic instruments	86
Science and technologies	88
Environmental information, education and outreach	93
Institutional and individual capacity for environmental management	94
Conclusion	95
<b>Chapter 4</b>	
<b>CURRENT NEEDS AND CONSIDERATIONS FOR THE WAY FORWARD</b>	<b>96</b>
Governance and decision making for sustainable development	97
Altering lifestyle choices	99
Reducing environmental vulnerability	100
Protecting biodiversity	101
Natural disaster risk reduction and preparedness	102
Food, water and energy security	103
Managing human resources for the environment	104
Conclusion	104

## FOREWORD

**Klaus Toepfer**

United Nations Under-Secretary General and  
Executive Director, United Nations  
Environment Programme

In 1995, the United Nations Environment Programme (UNEP) launched the Global Environment Outlook (GEO) process for integrated environmental assessment and reporting at global and regional levels. GEO is based on cross-sectoral and participatory environmental assessment, facilitating dialogue between policy-makers and the scientific community.

Under the GEO framework, the first environment outlook report for the Small Island Developing States (SIDS) in the Caribbean was published in 1999 through UNEP's Regional Office for Latin America and the Caribbean (UNEP-ROLAC), and with the help of the European Commission and the University of the West Indies Centre for Environment and Development (UWICED). The report helped the region to identify the main environmental concerns and highlight appropriate policy priorities.

Small Island Developing States have been recognized as a special category of countries, with particularly vulnerable and delicate ecosystems due to their small size and other characteristics. The United Nations recognizes the unique situation of SIDS and actively supported the process of giving them an international political identity with the establishment in 1991 of the Alliance of Small Island States (AOSIS), which would provide a forum for small island states to have a collective voice in addressing their common problems. This recognition was reaffirmed by the United Nations Global Conference on the Sustainable Development of Small Island Developing States

held in Barbados in 1994, and the resulting Barbados Programme of Action for the Sustainable Development of Small Island Developing States (BPOA).

In 2003, UNEP initiated the preparation of environment outlook reports for the Caribbean, Pacific and the Atlantic and Indian Oceans SIDS, as a contribution to the Mauritius International Meeting for the 10-year Review of the BPOA (Barbados +10) in 2005. The major objectives of these reports are to:

- Highlight the state of the environment in the SIDS showing the trends of national, regional and global significance;
- Provide policy guidance and early warning information on environmental threats;
- Provide a basis for regional consultations and for identifying the environmental issues and priorities in preparation for Barbados +10;
- Help to catalyse and promote international cooperation and action based on the best scientific and technical capabilities available; and
- Contribute to the development of a common strategy for sustainable development in SIDS.

There was considerable effort to ensure that the assessment and evaluation builds on the preparation initiatives for the Barbados +10, to ensure consistency of reporting.

The *Caribbean Environment Outlook* assesses the state of the environment in the Caribbean SIDS and Low-Lying Coastal States in terms of the environmental concerns identified in the BPOA and the driving forces of environmental change. It emphasizes the interdependence between the quality of the environment, human well-being and sustainable development. It is intended to be a resource document for civil servants, private and public sector policy-makers, professionals in development-related areas and funding institutions. It is our hope that this report will remind decision-makers in the Caribbean of the importance of a healthy environment and intact natural resource base for sustainable development.

The *Caribbean Environment Outlook* was prepared in collaboration with many experts from the region, the partners from the 1999 report including UWICED and the Caribbean Community Secretariat (CARICOM), as well as new partners such as the Caribbean Community Climate Change Centre (CCCCC) and the Mainstreaming Adaptation to Climate Change Project (MACC). UNEP considers such partnerships to be the key to the success of the GEO process.

It is my sincere hope that this report — *Caribbean Environment Outlook* — will be a useful resource during deliberations at the Barbados +10 Conference.
