Measuring Success

Indicators for the Regional Seas Conventions and Action Plans

CITATION: UNEP (2014): Measuring Success: Indicators for the Regional Seas Conventions and Action Plans

AUTHORS: David Johnson, Angela Benn, Maria Adelaide Ferreira

SERIES: UNEP Regional Seas Report and Studies No. 194

ISBN: 978-92-807-3421-8

JOB NUMBER: DEP/1847/NA

COVER LAYOUT: William Orlale, Milcah Ndegwa (UNEP)

COPYRIGHT: UNEP

MEASURING SUCCESS
INDICATORS FOR THE REGIONAL SEAS CONVENTIONS
AND ACTION PLANS

David Johnson, Angela Benn, Maria Adelaide Ferreira

Contents

- 1. Introduction..... 11
 - What is an indicator? 11
 - Where do indicators stand in the planning/management cycle? A coordinated system of objectives, indicators, limits and targets 13
 - Transboundary indicators/indicators of transboundary effects 13
 - Linking effects with causes 14
 - Sustainable development indicators 14
 - Environmental indicators 17
 - Ecosystem-based indicators 17
 - Ecosystem service indicators 18
 - Summary..... 18
- 2. Regional application of the Ecosystem Approach 19
 - Defining the Ecosystem Approach 19
 - Application of the Ecosystem Approach to regions 20
 - Regional Seas Programme (RSP) 21
 - Global Environment Facility Large Marine Ecosystem Projects (GEF-LMEs) 24
 - Global marine policy initiatives with regional dimensions using indicators 25
 - Related initiatives..... 27
 - Summary..... 28
- 3. The purpose and remit of this study 30
 - Aim and objectives 30
 - Methodology..... 30
 - Structure of this report 34
- 4. Assessment of regional indicator systems developed to date 35
 - State of the Environment Reporting 35
 - Indicator systems linked to State of the Environment reporting 36
 - Selection of State of the Environment reporting indicators..... 37

Specific management targets and/or objectives.....	38
Periodic collection of information.....	40
Iterative development	40
Constraints on indicator selection and application.....	41
Collation and communication of indicator information.....	43
Summary.....	44
5. Use of indicators to monitor progress in achieving targets and/or objectives	45
Specificity	45
Numbers of indicators being used.....	49
Underlying rationale for indicator selection.....	51
State of the Environment v Progress reporting	59
Level of sophistication	74
Alternative approaches.....	77
Constraints	79
Summary.....	81
6. Critical evaluation: a proposed way forward for the Regional Seas Programme (RSP).....	82
The need to build upon existing efforts.....	82
Combining with RSP obligations	84
Feeding into agreed global assessment processes	85
Anticipating interface with a possible Sustainable Development Goal on Oceans...	89
Regional Seas Marine Biodiversity Assessment and Outlook Series	89
Towards a ‘coordinated set’ of indicators	93
Challenges involved in taking this forward.....	99
Conclusion	100
7. Conclusions and recommendations	101
8. References	103
9. Annexes.....	108
Annex I: Ecosystem-based Indicators Questionnaire	

Annex II: Feedback on the structure of the draft template SoME reporting Abidjan Convention

Annex III: Summary of Regional Seas Indicator System

Table 1: A Healthy Ecosystem and Sustainable Use of Marine Resources (BOBLME)

Table 2: GEF-Humboldt Project

Table 3: Coastal and Marine Environmental, and Biodiversity Indicator Matrixes (ROPME)

Table 4: GEO Data-Indicators Matrix (ROPME)

Table 5: Draft Set of Selected Key SAP Indicators (CLME)

List of Acronyms

ASC	Agulhas and Somali Current
ASCLME	Agulhas and Somali Current Large Marine Ecosystems Project
ATS	Arafura and Timor Seas
ATSEA	Arafura and Timor Seas Action Plan
BCLME	Benguela Current Large Marine Ecosystem
BD	Biodiversity
AFEAS	Alternative Fluorocarbons Environmental Acceptability Study
BBSAP	Black Sea Strategic Action Plan
BOBLME	Bay of Bengal Large Marine Ecosystem Project
BOD	Biological/Biochemical Oxygen Demand
BSAP	Baltic Sea Action Plan
BSC	Black Sea Commission
BSIMAP	Black Sea Integrated Monitoring and Assessment Program
BSIS	Black Sea Information System
BSSAP	Strategic Action Plan for the Environmental Protection and Rehabilitation of the Black Sea
CAFF	Conservation of Arctic Fauna and Flora
CBD	Convention on Biological Diversity
CCA	Causal Chain Analysis
CCAMLR	Commission for the Conservation of Antarctic Living Resources
CDIAC	Carbon Dioxide Information Analysis Center
CEMP	CCAMLR Ecosystem Monitoring Program
CEP	Caribbean Environment Programme
CFC	Chlorofluorocarbon
Chl/ Chl a	Chlorophyll/ Chlorophyll a
CI	Conservation International
CIDCM	Center for International Development and Conflict Management
CIESIN	Center for International Earth Science Information Network
CIMAB	Center of Engineering and Environmental Management of Coasts and Bays
CITES	Convention on International Trade in Endangered Species of Wild Fauna and Flora
CLME	Caribbean Large Marine Ecosystem Project
CO2	Carbon Dioxide
COD	Chemical Oxygen Demand
COP	Conference of the Parties
CPPS	Comisión Permanente del Pacifico Sur
CPUE	Catch Per Unit Effort
CRED	Centre for Research on the Epidemiology of Disasters
CSD	UN Commission on Sustainable Development
CSI	Core Set Indicator
CSIRO	Commonwealth Scientific and Industrial Research Organisation
CRU	The Climatic Research Unit
