Acknowledgements

Like all GEO products, developing the Methodology for the Preparation of GEO Cities Reports was a collective effort. UNEP is grateful for the work of Consorcio Parceria 21, an association of three Brazilian Non-Governmental Organizations with broad experience on matters relating to the environment and urbanization, for leading the technical development of the first version of this manual, and to the Ministry of the Environment of the Government of Brazil for its financial support. We are also grateful for the collaboration of experts from institutions and governments who contributed to preparing this report with their observations during the “Urban Environmental Assessment Workshop: GEO Cities”, organized by UNEP and the government of Mexico City, held in November 2001, and in the workshops in Lima, Peru, in November 2003, and in Havana, in May 2005 (list of experts attached).

We also express our thanks to our colleagues in UN-HABITAT whose experience of almost 15 years in preparing environmental profiles of cities provided inputs to develop this third version of the manual, and for joining forces with UNEP to help cities, by using this methodology, to develop their integrated environmental assessments (IEA) or GEO reports.

Revision and preparation of the third version of the Manual

Napoleão Miranda	ISER
------------------	------

The english version of the manual was coordinated by:

Graciela Metternicht, Regional Coordinator Division of Early Warning Assessment, UNEP, Regional Office for Latin America and the Caribbean (ROLAC).

Johanna Zisky Granados Alcalá, UNEP, Production Coordination

Phil Linehan. Translation into English

Rocío Milena Marmolejo Cumbe. Editorial Design

Table of contents

Preface	11
I. Introduction.....	13
II. GEO Cities methodology.....	16
1. Focus of the analysis: urban development and its effect on the environment	17
2. Analytical framework: DPSIR matrix.....	17
3. GEO Cities report structure.....	20
Chapter 1: Introduction to the City	24
1.1 Location and relation to other cities	24
1.2 Geography and topography.....	24
1.3 Ecosystem and climate.....	24
Chapter 2: Socio-economic and political context (DRIVING FORCES and PRESSURES)	24
2.1 Description of local political and administrative structure.....	25
2.1.1 Local public authority administrative structure	25
2.1.2 Characteristics and role of civil society organizations.....	26
2.1.3 The local private sector	26
2.2 Analysis of local socio-economic factors	27
2.2.1 Urbanization and territorial occupation dynamics.....	27
2.2.2 Demographic dynamics.....	30
2.2.3 Social dynamics	31
2.2.4 Economic dynamics	32
a) Dynamics of economics.....	33
b) Use of environmental resources	34
c) Impact of activity sector on environmental resources	34
d) Agriculture	35
e) Commerce and services	35
2.2.5 Consumption of resources	36
a) Energy consumption	36
b) Water consumption	36
2.2.6 Atmospheric emissions	37

2.2.7 Waste production.....	37
2.2.8 Sewage treatment and sanitation	39
2.3 Chapter synthesis.....	40
Chapter 3: State of the environment (STATE)	40
3.1 Local ecosystems	41
3.2 Analysis of the state of the environment's natural resources	42
3.2.1 Atmosphere.....	42
3.2.2 Water	43
3.2.3 Land.....	44
3.2.4 Marine and coastal resources	44
3.2.5 Biodiversity	45
3.2.6 Forests and green areas	45
3.2.7 Built-up environment	46
3.3 Chapter synthesis	47
Chapter 4: Impacts of the state of the environment (IMPACT)	47
4.1 Impact on ecosystems.....	48
4.2 Impact on quality of life and human health (inequality and poverty)	49
4.3 Impact on urban economy (external causes)	50
4.4 Impact on built-up environment (human settlements)	51
4.5 Impact at political and institutional level	52
4.6 Socio-environmental vulnerability	53
Chapter 5: Urban environmental management policies and instruments (responses).....	55
