a **CASE STUDY** on

CLIMATE CHANGE MITIGATION OPTIONS
For Afghanistan

December, 2018
National Environmental Protection Agency
United Nations Environment Programme

AUTHORS: Mohammad Faysal Yagan & Mohammad Monib Noori/UNEP

EDIT: Dirk Snyman/UNEP

LAYOUT & DESIGN: Zahra Khodadadi/UNEP

CONTENTS - PART ONE

Greenhouse Gases Baseline and Mitigation Scenarios for Afghanistan 1-70

1. General Information	2
1.1. Introduction	2
1.2. Methodological Issues	3
1.3. Glossary	5
1.4. Base Year Emissions Calculation	6
2. Baseline Scenario	9
2.1. Introduction	9
2.2. Methodology	10
2.3. Baseline Emissions Calculation Spreadsheet	11
2.4. Uncertainty in Base Year (2015) Emissions Estimation	11
2.5. Key Category Analysis	12
2.6. Sector-Specific Baseline Assumptions	13
2.6.1. Power Sector	13
2.6.2. Household and Commercial Sectors	15
2.6.3. Manufacturing Industries and Construction	16
2.6.4. Domestic Solid Waste Sector	17
2.7. Sectoral Emission Trends	18
3. Mitigation Scenario	19
3.1. Introduction	19
3.2. Afghanistan's NAMAs	20
3.3. Afghanistan's NDC	22
3.4. Mitigation Options	23
3.4.1 Mitigation Actions Not Eligible for Development Under CDM and PoA (Soft Programmes)	24
3.4.1.1 Greenhouse Gases Inventory National Information System	24
3.4.1.2. Renewable Energy and Energy Efficiency Fund	26
3.4.1.3. Building Energy Codes	27
3.4.1.4. Household Appliances Labelling and Standards	28

3.4.2. Mitigation Actions Eligible for Development Under CDM and PoA	30
3.4.2.1. Solar Water Heaters PoA in Households	34
3.4.2.2. Electrification of Rural Communities using Renewable Energy PoA (Rooftop PV Units)	36
3.4.2.3. Grid-connected PV Power Plant PoA	37
3.4.2.4. Mini Hydropower Plants PoA	39
3.4.2.5. Improved Cooking Stove PoA	41
3.4.2.6. Methane Gas Recovery from MSWDs PoA	42
3.4.2.7. Natural Gas Combined Cycle Power Plant	43
3.4.2.8. Bus Rapid Transit in Kabul CDM Project	44
3.4.3 Mitigation Results	45
Annexes	48-70
Annex (1) Baseline Scenario Tool	49
Annex (2) Data Templates According to 2006 IPC Guideline and Software	54
Annex (3) Project Idea Notes	63
Annex (4) Conversion Tables	69

LIST OF TABLES

Table 1.1. Base year (2015) GHG Emissions in Gg Gas	7
Table 1.2. Base year (2015) GHG Emissions in Gg CO ₂ e	8
Table 2.1. Key Categories Analysis	12
Table 2.2. Power Sector Baseline Scenario: Future fossil fuel-based power plants	14
Table 2.3. Baseline Scenario Fuel Demand Composition in the Household and Commercial Sector	16
Table 2.4. Industrial Processes and Product use Baseline Scenario	17
Table 2.5. Baseline Sectoral Emission Trends in Gg CO ₂ e	18
Table 3.1. Afghanistan's NAMAs Categorization	21
Table 3.2. Proposed National Inventory System Team Composition	25
Table 3.3. Summary and MRV Guidelines for Soft Programmes Mitigation Activities	29
Table 3.4. General Overview of the Mitigation Options for Afghanistan	32
Table 3.5. Estimated Reduction of the GHG Emission from Solar Water Heaters PoA	35
Table 3.6. Estimated Reduction of the GHG from Rooftop PV Units PoA	37
Table 3.7. Estimated Reduction of the GHG Emission from Grid-Connected PV Power Plants PoA	39
Table 3.8. Estimated Reduction of the GHG Emission from Mini Hydropower Plants PoA	40

Table 3.9. Estimated Reducion of the GHG Emission from Improved Cooking Stove PoA	42
Table 3.10. Estimated Reducion of the GHG Emission from Landfill Gas Capture and Use PoA	43
Table 3.11. Estimated Reducion of the GHG Emission from Natural Gas Combined Cycle PoA	44
Table 3.12. Estimated Reducion of the GHG Emission from BRT PoA	45
Table 3.13. Cummulative Results of the Mitigation Actions	46
Table 3.14. Summary of the Estimated Emission Reduction from the Proposed Mitigation Actions	47

LIST OF FIGURES

Figure 2.1. Baseline Scenario Emissions in Gg CO ₂ e	18

Figure 3.2. Logical Sequence of Determining GHG Mitigation Starting from LEDs	24
Figure 3.3. GHG Mitigation Results	47

CONTENTS - PART TWO

Capacity Building and National Information System Needs Assessment for Climate Change Mitigation in Afghanistan 71-106

1. National Climate Change Information System	72
1.1. Introduction	72
1.2. Basic Database Structure	73
1.2.1. Socio-Economic Data	74
1.2.2. GHG Inventory Data	74
1.2.3. Mitigation Assessment Data	75
1.2.4. Data Required for National Reports (NCs and BURs)	76
2. Capacity Building and Technology Transfer Programme	78
2.1. Introduction	78
2.2. Training Activities under Pillar One (Management Tools and Procedures)	82
2.2.1. Introduction to Climate Change	82
2.2.2. Training on 2006 IPCC Guidelines for National Greenhouse Gas Inventories	83
2.2.3. Training on 2006 IPCC Inventory Software	85
2.2.4. Mitigation Assessment	86
2.3. Training Activities under Pillar Two (Climate Finance)	88
2.3.1. Training Clean Development Mechanism	90
2.3.2. Financial & Economic Analysis Training Activity	91
2.4. Training Activities under Pillar Three (Technology Needs)	92
2.5. Proposed Action Plan	98
Bibliography	95-97
Annexes	98-107
