S4-2

# Waste Management Partnership Area Draft Wish List (As of 19 Dec 2012)

Title of the Project (To be updated in early 2013)	1. Replicable pilot project on provincial implementation plan and introduction of BAT BEP strategies for the management of mercury and mercury containing waste (in the province of Santa Fe, Argentina)
Outline of the Project	<ol> <li>Revise the existing legal and normative national and provincial framework that regulates collection, transport, management and temporary and final disposal of mercury and mercury containing waste.</li> <li>Analyze the existing technical and scientific infrastructure for collection, transport, management and transitory and final disposal of mercury and mercury containing waste in the province of Santa Fe, including the locally and internationally available BAT and BEP.</li> <li>Prepare a provincial implementation plan (PIP) for collection, transport, management and transitory and final disposal of mercury and mercury containing waste.</li> <li>Prepare the basis and develop a proposal to be included under the PIP and to be implemented as a subsequent small scale pilot project to demonstrate efficiency and effectiveness of the BAP and BET available technology.</li> </ol>
Achievements/Outcome Expected	Environmentally sound management of waste containing mercury practically demonstrated, related policy developed and awareness raised
Estimated Amount of Budget and Expected Source of Funds	GEF: USD\$500,000 Minimum co-financing required: USD\$1.0 million
Contact Person and Organization	Carolina Gonzalez, UNIDO Email: C.Gonzalez-Castro@unido.org

Title of the Project	2. Sound Management of Mercury Containing Wastes
(Updated 19 Dec 2012)	(management, treatment, collection and disposal) (Syrian Arab
	Republic)
Outline of the Project	1. Inventory developing
	2. Increase the technical capacity
	3. Awareness workshops
	4. Environmental Impact Assessment (EIA) for the paper
	production plant - Syrian coast
	5. Developing a national action plan for sound management of
	mercury containing wastes (Separation, collection,
	transportation, treatment, storage, disposal, landfill design)
Relation with the	Related priority actions;
Priority Actions of the	Priority Action A: Identify and disseminate environmentally sound
Partnership Area	collection, treatment, transportation and disposal
	techniques/practices to reduce mercury releases from waste by
	following a lifecycle approach
	Priority Action B: Assess environmental impacts of current waste
	management practices and processes, including providing support to

	countries to assess their national situation (e.g. development of national mercury waste inventories and priority setting) and needs
T2	
Expected impacts on Target Area/Population	Target area of the project (country, city) Syrian Arab Republic:
ranget Area/1 opulation	Deir el-Zor City (paper plant)
	Banias City (beach, oil refinery, power plant, oil estuary)
	Estimated Number of Target Population
	About 601053 inhabitants
	Major challenges/problems of Target Area/Population to be
	tackled in the project
	· Lake in the data base
	· Type of used technology
	Expected impacts that would improve the situation of the Target
	Area/Population
	Reducing the concentration of mercury in the waste and the
	surrounding medium <ul><li>Decrease morbidity</li></ul>
Achievements/Outcome	Outline of the Expected Achievements/Outcome
Expected	1. Review of quantitative and qualitative data from the
P	national inventory of mercury sources
	2. Development of a national mercury waste management plan
	3. Sampling and mercury analysis of environmental and
	human samples
	4. Final national reports and final project report; evaluation
	Expected amount of mercury diverted from waste stream
	$2500~\mathrm{kg} ext{-Hg}$
	Expected amount of mercury releases from waste reduced
	About 10 %
	Other measurable outcomes contributing to the progress indicators of the Waste Management Partnership Area
	The results of blood analysis - hair - urine for the target
	population in the study area.
	• The results of analysis of water and soil in the targeted areas
Replicability of the	Mechanisms to promote utilization of experiences/knowledge
Project	from this project:
	· Trainers' training
	· Development of guidebooks
	Production of videos,
	• Putting the results on the website of the Ministry of State for Environment Affairs
Estimated Amount of	Estimated amount of budget
Budget and Expected	USD\$ 200,000
Source of Funds	Expected source of funds/Amount of budget confirmed
	United Nations Industrial Development Organization
	(UNIDO)
Implementation	Name of the implementing agency (including section or
Structure	department):
	Ministry of State for Environment Affairs
	(Chemical Safety Department)

	Number of staffs to be involved (e.g. legal staff, technical specialist, outreach staff):  Legal staff: 2  Technical specialist: 20  Outreach staff: 5
	<ul> <li>Experiences of the implementing agency in the relevant fields (Name, overview and achievements of the previous projects):         <ul> <li>Preparation of the national profile for chemical safety</li> <li>Preparation of the NIP (National Implementation Plan for POPs)</li> <li>Preparation of the Mercury Release Inventories - Asian Pilot Project</li> <li>Preparation of the Emergency Plan for Oil Pollution.</li> </ul> </li> </ul>
Contact Person and Organization	Ministry of State for Environment Affairs – Syrian Arab Republic  1- Engineer Adib Almasri, Director of Chemical Safety Derectorate Telefax: +963-11-231-7856, Email: almasril972@yahoo.com  2- Engineer Eyad Ibrahim, National Contact Person of Mercury Programme Telefax: +963-11-231-7856, Email: eyad-ib@hotmail.com

Title of the Project	3. Get on with the Light Bulbs & Fluorescent Lamps (Panama)
The state of the s	5. Get on with the Light Builds & Fluorescent Lamps (Fanama)
(Updated 13 Dec 2012)	
Outline of the Project	1. Information on the toxic content of CFLs and fluorescent
	tubes by national media, visits to companies, universities
	and colleges nationwide.
	2. Develop voluntary recovery systems of light bulbs and
	fluorescent tubes between the society and the private sector.
	3. Establish a voluntary elimination program for major users
	and in conjunction with private companies that provide the
	service of reduction and elimination of fluorescent tubes and
	CFLs.
	4. Present a draft Bill to the National Assembly of Deputies
	and in conjunction with the municipality of Panamá and
	San Miguelito, the National Waste Management Authority
	and the Ministry of Health for the integral management of
Relation with the	mercury containing waste.
Relation with the Priority Actions of the	Related priority actions;
Partnership Area	Priority Action A: Identify and disseminate environmentally sound
1 artifership Area	collection, treatment, transportation and disposal
	techniques/practices to reduce mercury releases from waste by
	following a lifecycle approach
	<u>Priority Action C</u> : Promote public awareness of the hazards regarding
	mercury waste and support community engagement in the activities
	of the Waste Management Partnership
Expected impacts on	Target area of the project (country, city)
Target Area/Population	Three major cities (Panama, Chorrera & Arraijan)
	Timoo major onoo (t anama, onorrora w mraijan)
	Estimated Number of Toward Develotion
	Estimated Number of Target Population
	· 1,250,000 people or (50% of the population)

· 70% of the total GDP

# Major challenges/problems of Target Area/Population to be tackled in the project

- · Lack of awareness on toxic waste and low recycling/segregation culture
- · Local and small Businesses don't like to pay for waste management.
- · Corruption at lower levels will disrupt the implementation of segregation schemes.

# Expected impacts that would improve the situation of the Target Area/Population

- · Multinational & CSR oriented corporation will jump into the segregation program at a faster pace.
- Public will start to demand more options to properly dispose their electric & electronic waste.
- · Reduce in the amount of toxic waste being dumped at the local dumpster, reducing the toxicity of the waste stream and the impact on ecosystems and human health.
- Develop a sound collection & management system for used fluorescent lamps & CFL's in the beginning of a new energy efficiency bill, passed in Nov. 2012.

### Achievements/Outcome Expected

#### Outline of the Expected Achievements/Outcome

- Inform 6,000 young people and children about the damage to the health and 1 million Panamanians on the toxicity and the potential damage of the fluorescent tubes and the CFLs.
- Establish at least a network of 6 collection points of fluorescent tubes and the CFLs at the national level.
- · Collect and remove the mercury contained in 10,000 fluorescent tubes and 2,500 CFLs annually in the next 3 years.
- Draw up, submit and pass the law for the integral management of wastes with mercury in Panama in the year 2013.
- Raise at least USD\$45,000 as contributions of strategic partners and sponsors to the program which represents 50% of the total investment.
- Buy at least 3 lamp compactors USD\$15,000 (USD\$5,000 each- 1 per year)
- · Total investment: USD\$90,000 (3 years)

#### Expected amount of mercury diverted from waste stream;

Amount of Mercury contained in 10,000 fluorescent tubes and the 2,500 CFLs. (30,000 Fluorescent lamps + 7,500 CFL's)

### Expected amount of mercury releases from waste reduced

Under confirmation

### Other measurable outcomes contributing to the progress indicators of the Waste Management Partnership Area;

· Approximately 30 cubic meters of waste dispose's land will be saved.

Replicability of the	Mechanisms to promote utilization of experiences/knowledge
Project	from this project; (e.g. trainers' training, development of
	guidebooks, production of videos, establishment of website)
	· Train people on seminars regarding toxic waste
	management.
	· Train people to handle the lamp compactor units.
	· Develop a sound system to manage large amount of lamps.
Estimated Amount of Budget and Expected	Estimated amount of budget;
Source of Funds	Would like to secure funding for at least USD\$10,000 annually or
bource of 1 unus	1/3 of our total annual investment (USD\$30,000)
	Expected source of funds/Amount of budget confirmed;
	<ul> <li>From Ecologic, S.A. &amp; Zero Pollution Alliance (US\$5,000)</li> <li>From Several alliances (US\$ 15,000)</li> </ul>
Implementation	Name of the implementing agency (including section or
Structure	department);
	· Zero Pollution Alliance (Funds securement & Public
	Relations) • Eco Creando Foundation & Gabriela Batista (Seminars &
	Workshops)
	· Ecologic, S.A. (Funds securement, General management &
	toxic Waste treatment)
	Number of staffs to be involved; (e.g. legal staff, technical
	specialist, outreach staff)
	· Around 12 people will be involved in the implementation of
	the program.
	<ul> <li>Public Relation, Outreach (6)</li> <li>General Management &amp; Toxic Waste treatment (6)</li> </ul>
	Experiences of the implementing agency in the relevant fields;
	(Name, overview and achievements of the previous projects)
	Zero Pollution alliance
	Since 2006 promoting sustainability programs
	Reusable plastic bags campaign (2006-YTD)
	> 12 corporations and NGO's involved
	> 25,000 reusable bags give away
	> 500,000 reached via traditional media
	> 2,500 kids reached on workshops with Gabriela Batista
	• "Get on the Batteries with the Batteries program (2007-YTD)
	(2007-YTD) > 18 corporation involved
	> 7.0 tons of dry batteries collected & encapsulated
	> 13 pounds of elemental mercury collected &
	encapsulated
	> 1,250,000 people reached via traditional and new media
	> 4,000 kids & young adults reached via workshops &
	Seminars with Gabriela Batista  Get on with your lamps program (2010-YTD)
	> 7 large corporations involved
	> 9,500 fluorescent & 1,500 CFL's collected & compacted
	> 1,125,000 reached via traditional & new media

Title of the Project	4. Living in a cleaner & less toxic city
(Updated 13 Dec 2012)	(Legislation, communication, collection & neutralization of toxic wastes program) ( <i>Panama</i> )
Outline of the Project	<ol> <li>Inform general public, schools and college students about the mercury containing products and its impacts on human health and the environment.</li> <li>Run a mass media campaign to educate people about the toxicity of some consumer &amp; industrial products, like electronic &amp; electric products.</li> <li>Create awareness on the toxicity of some waste and promote their segregation from common waste streams and promote cleaner alternatives.</li> <li>Design and installation of the public collection point system.</li> <li>Propose at the National Assembly, laws to engage all the stakeholders in sustainable education and segregation programs at national scale for electric &amp; electronic waste.</li> </ol>
Relation with the Priority Actions of the Partnership Area	Related priority actions;  Priority Action A: Identify and disseminate environmentally sound collection, treatment, transportation and disposal techniques/practices to reduce mercury releases from waste by following a lifecycle approach  Priority Action C: Promote public awareness of the hazards regarding mercury waste and support community engagement in the activities of the Waste Management Partnership
Expected impacts on Target Area/Population	Target area of the project (country, city) Panama National scale
	<ul> <li>Estimated Number of Target Population</li> <li>1.100.000 people will be reached using all the traditional as well as new media outlets.</li> <li>50,000 people will be reached directly with seminars, workshops, direct campaigns.</li> </ul>
	<ul> <li>Major challenges/problems of Target Area/Population to be tackled in the project</li> <li>Lack of awareness on toxic waste and low recycling/segregation culture</li> <li>Local and small Businesses don't like to pay for waste management.</li> <li>Lobby from large corporation will avoid the law discussion and approval</li> <li>Corruption at lower levels will disrupt the implementation of segregation schemes.</li> </ul>
	Expected impacts that would improve the situation of the Target  Area/Population  Large scale public campaigns will move larger groups to support the legislation and implementation of public collection points.

. Multinational & CSR oriented corporation will jump into the segregation program at a faster pace Some government office will also join the programs at a voluntary agreement Public will start to demand more options to properly dispose their electric & electronic waste Reduce in the amount of toxic waste being dumped at the local dumpster, reducing the toxicity of the waste stream and the impact on ecosystems and human health Develop a sound collection & management system for used fluorescent lamps & CFL's in the beginning of a new energy efficiency bill, passed in Nov. 2012.  Achievements/Outcome Expected  Achievements/Outcome Expected  Outline of the Expected Achievements/Outcome (12 months) . Reach 6,000 children age 8-12 . Reach 3,000 young adults age 18-25 . Reach 500,000 general public age 12-75 . Inform 15,000 public servants . Inform 50 school teachers & college professors . Install 12 public collection points for fluorescent lamps, CFLs light bulbs & electronic waste . Install 48 public collection points for dry batteries . Collect 12,500 fluorescent lamps and 2,500 CFLs . Collect 7.5 tons of used dry & rechargeable batteries . Collect 15.0 tons of electronic waste  Expected amount of mercury diverted from waste stream: . Amount of mercury diverted from waste stream: . Amount of mercury contained in 12,500 (48 inches) fluorescent lamps and 2,500 CFLs, 7.5 tons of used dry & rechargeable batteries, and 15.0 tons of electronic waste.  Expected amount of mercury releases from waste reduced: Under confirmation  Other measurable outcomes contributing to the progress indicators of the Waste Management Partnership Area . Approximately 50 cubic meters of waste dispose's land will be saved.		
Some government office will also join the programs at a voluntary agreement.     Public will start to demand more options to properly dispose their electric & electronic waste.     Reduce in the amount of toxic waste being dumped at the local dumpster, reducing the toxicity of the waste stream and the impact on ecosystems and human health.     Develop a sound collection & management system for used fluorescent lamps & CFL's in the beginning of a new energy efficiency bill, passed in Nov. 2012.  Achievements/Outcome Expected  Achievements/Outcome Expected  Outline of the Expected Achievements/Outcome (12 months) Reach 6,000 children age 8-12 Reach 3,000 young adults age 18-25 Reach 500,000 general public age 12-75 Inform 15,000 public servants Inform 50 school teachers & college professors Install 12 public collection points for fluorescent lamps, CFLs light bulbs & electronic waste Install 48 public collection points for dry batteries Collect 12,500 fluorescent lamps and 2,500 CFLs Collect 7.5 tons of used dry & rechargeable batteries Collect 15.0 tons of electronic waste  Expected amount of mercury diverted from waste stream: Amount of mercury contained in 12,500 (48 inches) fluorescent lamps and 2,500 CFLs, 7.5 tons of used dry & rechargeable batteries, and 15.0 tons of electronic waste.
