# **THE EUROPEAN ENVIRONMENT** STATE AND OUTLOOK 2015

SYNTHESIS REPORT

# Contents

---

**Foreword..... 6**

**Executive summary..... 9**

**Part 1 Setting the scene**

**1 The changing context of European environmental policy ..... 19**

1.1 European environmental policy is aimed at living well, within the limits of the planet..... 19

1.2 Over the past 40 years, environmental policies in Europe have had notable success.....21

1.3 Our understanding of the systemic nature of many environmental challenges has evolved .....23

1.4 Environmental policy ambitions address the short, medium and long term .....25

1.5 SOER 2015 provides an assessment of the state and outlook for the environment in Europe.....29

**2 The European environment in a wider perspective..... 33**

2.1 Many of today's environmental challenges have a systemic character.....33

2.2 Global megatrends affect the prospects for the European environment .....35

2.3 European consumption and production patterns impact both the European and global environment .....40

2.4 Human activities affect vital ecosystem dynamics at multiple scales.....44

2.5 Excessive use of natural resources jeopardises humanity's safe operating space .....46

## Part 2 Assessing European trends

<b>3</b>	<b>Protecting, conserving and enhancing natural capital .....</b>	<b>51</b>
3.1	Natural capital underpins the economy, society and human well-being .....	51
3.2	European policy aims to protect, conserve and enhance natural capital .....	53
3.3	Biodiversity decline and ecosystem degradation reduce resilience .....	56
3.4	Land-use change and intensification threaten soil ecosystem services and drive biodiversity loss .....	59
3.5	Europe is far from meeting water policy objectives and having healthy aquatic ecosystems .....	62
3.6	Water quality has improved but the nutrient load of water bodies remains a problem.....	66
3.7	Despite cuts in air emissions, ecosystems still suffer from eutrophication, acidification and ozone.....	69
3.8	Marine and coastal biodiversity is declining, jeopardising increasingly needed ecosystem services .....	72
3.9	The impacts of climate change on ecosystems and society call for adaptation measures .....	75
3.10	Integrated management of natural capital can increase environmental, economic and social resilience .....	78
<b>4</b>	<b>Resource efficiency and the low-carbon economy .....</b>	<b>83</b>
4.1	Increased resource efficiency is essential for continued socio-economic progress.....	83
4.2	Resource efficiency and greenhouse gas emission reductions are strategic policy priorities .....	85
4.3	Despite more efficient material use, European consumption remains very resource intensive.....	87
4.4	Waste management is improving but Europe remains far from a circular economy .....	89

- 4.5 The transition to a low-carbon society requires greater greenhouse gas emission cuts..... 93
- 4.6 Reducing fossil fuel dependence would cut harmful emissions and boost energy security ..... 96
- 4.7 Increasing transport demand affects the environment and human health..... 99
- 4.8 Industrial pollutant emissions have declined but still cause considerable damage each year..... 103
- 4.9 Reducing water stress requires enhanced efficiency and water demand management..... 106
- 4.10 Spatial planning strongly influences the benefits that Europeans derive from land resources ..... 109
- 4.11 An integrated perspective on production-consumption systems is needed ..... 112

**5 Safeguarding people from environmental risks to health ..... 115**

- 5.1 Human well-being critically depends on a healthy environment ..... 115
- 5.2 European policy takes a broader perspective on the environment, human health and well-being ..... 116
- 5.3 Environmental, demographic and lifestyle changes contribute to major health challenges..... 119
- 5.4 Water availability has generally improved, but pollution and scarcity still cause health problems ..... 121
- 5.5 Ambient air quality has improved, but many citizens are still exposed to dangerous pollutants ..... 124
- 5.6 Exposure to noise is a major health concern in urban areas... 128
