

Mercury Fate and Transport in the Global Atmosphere: Measurements, Models and Policy Implications

Editors:

Nicola Pirrone

Chair of the UNEP MFTP
CNR - Institute for Atmospheric Pollution
Rende, Italy

Robert Mason

Department of Marine Sciences
University of Connecticut
Hartford, USA

Interim Report
of the

UNEP Global Mercury Partnership

Mercury Air Transport and Fate Research partnership area

14 July 2008

Mercury Fate and Transport in the Global Atmosphere: Measurements, Models and Policy Implications

Editors:

Nicola Pirrone
Chair of the UNEP MFTP
CNR - Institute for Atmospheric Pollution
Rende, Italy

Robert Mason
Department of Marine Sciences
University of Connecticut
Hartford, USA

**Interim Report
of the
UNEP Global Mercury Partnership
Mercury Air Transport and Fate Research partnership area**

14 July 2008

List of contributors

Preface

Nicola Pirrone Italy

Foreword

Terry Keating United States Andrè Zuber European Community

Acknowledgments

Nicola Pirrone Italy

Executive summary

Nicola Pirrone Italy Robert Mason United States

Chapter - 1: Global Mercury Emissions to the Atmosphere from Natural and Anthropogenic Sources

Coordinating lead author

Nicola Pirrone Italy

Contributing authors

Sergio Cinnirella	Italy	Rob Mason	United States
Xinbin Feng	China	Arun B. Mukherjee	Finland
Robert B. Finkelman	United States	Glenn Stracher	United States
Hans. R. Friedli	United States	David G. Streets	United States
Joy Leaner	South Africa	Kevin Telmer	Canada

Chapter - 2: Mercury Emissions from Coal Combustion in China

Coordinating lead author

David G. Streets United States

Contributing authors

Jiming Hao	China	Ye Wu	China
Shuxiao Wang	China		

Chapter - 3: Mercury Emissions from Industrial Sources in China

Coordinating lead author

Xinbin Feng China

Contributing authors

Jiming Hao	China	David G. Streets	United States
Guanghui Li	China	Ye Wu	China

Chapter - 4: Mercury Emissions from Industrial Sources in India and its Effects in the Environment

Coordinating lead author

Arun B. Mukherjee Finland

Contributing authors

Prosun Bhattacharya	Sweden	Ron Zevenhoven	Finland
Atanu Sarkar	India		

Chapter - 5: Mercury Emissions from Point Sources in South Africa

Coordinating lead author

Joy Leaner South Africa

Contributing authors

James Dabrowski	South Africa	Robert Mason	United States
Rico Euripides	South Africa	Tabby Resane	South Africa
Martin Ginster	South Africa	Marguerite Richardson	South Africa
Elizabeth Masekoameng	South Africa		

Chapter - 6: World Emissions of Mercury from Artisanal and Small Scale Gold Mining**Coordinating lead author**

Kevin H. Telmer	Canada
-----------------	--------

Contributing author

Marcello M. Veiga	Canada
-------------------	--------

Chapter - 7: Mercury Emissions from Natural Processes and their Importance in the Global Mercury Cycle**Coordinating lead author**

Rob Mason	United States
-----------	---------------

Chapter - 8: Mercury Emissions from Global Biomass Burning: Spatial and Temporal Distribution**Coordinating lead author**

Hans. R. Friedli	United States
------------------	---------------

Contributing authors

Avelino F. Arellano	United States	Nicola Pirrone	Italy
Sergio Cinnirella	Italy		

Chapter - 9: Spatial Coverage and Temporal Trends of Land-Based Atmospheric Mercury Measurements in the Northern and Southern Hemispheres**Coordinating lead author**

Ralf Ebinghaus	Germany
----------------	---------

Contributing authors

Catharine Banic	Canada	Nicola Pirrone	Italy
Steve Beauchamp	Canada	Laurier Poissant	Canada
Dan Jaffe	United States	Francesca Sprovieri	Italy
Hans Herbert Kock	Germany	Peter S. Weiss-Penzias	United States

Chapter - 10: Spatial Coverage and Temporal Trends of Atmospheric Mercury Measurements in Polar Regions**Coordinating lead author**

Aurélien Dommergue	France
--------------------	--------

Contributing authors

Marc Amyot	Canada	Francesca Sprovieri	Italy
Steve Brooks	United States	Alexandra Steffen	Canada
Christophe P Ferrari	France		

Chapter - 11: Spatial Coverage and Temporal Trends of Over-Water, Air-Surface Exchange, Surface and Deep Sea Water Mercury Measurements**Coordinating lead author**

Francesca Sprovieri	Italy
---------------------	-------

Contributing authors

Maria Andersson	Sweden	Nicola Pirrone	Italy
Robert Mason	United States		

Chapter - 12: Monitoring and Modeling Projects for Fate of Mercury Species in Japan

Coordinating lead author

Noriyuki Suzuki Japan

Contributing authors

Koyo Ogasawara Japan Yasuyuki Shibata Japan

Chapter - 13: The Need for a Coordinated Global Mercury Monitoring Network for Global and Regional Models Validation

Coordinating lead author

Gerald J. Keeler United States

Contributing authors

Russel Bullock United States Sanford Sillman United States
Nicola Pirrone Italy

Chapter - 14: Our Current Understanding of Major Chemical and Physical Processes Affecting Mercury Dynamics in the Atmosphere and at the Air-Water/Terrestrial Interfaces

Coordinating lead author

A.J. Hynes United States

Contributing authors

D. L. Donohoue United States Ian M. Hedgecock Italy
M. E. Goodsite Denmark

Chapter - 15: Mercury Chemical Transformation in the Gas, Aqueous and Heterogeneous Phases: State-of-the-Art Science and Uncertainties

Coordinating lead author

Parisa A. Ariya Canada

Contributing authors

Marc Amyot Canada Graydon Snider Canada
Kirk Peterson United States

Chapter - 16: Importance of a Global Scale Approach to Using Regional Models in the Assessment of Source-Receptor Relationships for Mercury

Coordinating lead author

O. Russell Bullock Jr. United States

Contributing author

Lyatt Jaeglé United States

Chapter - 17: Global Mercury Modelling at Environment Canada

Coordinating lead author

Ashu P. Dastoor Canada

Contributing author

Didier Davignon Canada

Chapter - 18: The Geos-Chem Model

Coordinating lead author

Lyatt Jaeglé United States

Contributing authors

Daniel J. Jacob United States Sarah A. Strode United States
Noelle E. Selin United States

Chapter - 19: The ECHMERIT Model

Coordinating lead author

Gerlinde Jung Italy

Contributing authors

Ian M. Hedgecock Italy Nicola Pirrone Italy

Chapter - 20: The EMEP/MSC-E Mercury Modeling System

Coordinating lead author

Oleg travnikov Russia

Contributing author

Ilya IlyinG. Jung Russia

Chapter - 21: The AER/EPRI Global Chemical Transport Model for Mercury (CTM-HG)

Coordinating lead author

Christian Seigneur United States

Contributing authors

Leonard Levin United States Kristen Lohman United States
Krish Vijayaraghavan United States

Table of Contents

	<i>Page</i>
List of tables	xvi
List of figures	xxiii
Preface	xxxii
Foreword	xxxiii
Acknowledgments	xxxiv
Executive Summary	xxxv
1. Introduction	
1.1 Major Conclusions and Recommendations	
2. Mercury Inputs to the Global Atmosphere	
3. Mercury Cycling within the Atmospheric Reservoir	
4. Mercury Processes and Modelling Studies	
PART-1: Sources of Mercury released to the Global Atmosphere	
Chapter 1 Global Mercury Emissions to the Atmosphere from Natural and Anthropogenic Sources	
Summary	1
1.1 Introduction	1
1.2 Mercury emissions from natural sources	2
1.2.1 Volcanoes and geothermal activities	3
1.2.2 Water surfaces	3
1.2.3 Rocks, soils and vegetation	4
1.2.4 Biomass burning	5
1.3 Mercury emissions from anthropogenic sources	6
1.3.1 Anthropogenic emissions by sources category	7
1.3.2 Anthropogenic mercury emissions by region	22
1.3.2.1 <i>Europe</i>	22
1.3.2.2 <i>North and Central America</i>	23
1.3.2.3 <i>Russia</i>	23
1.3.2.4 <i>China</i>	24
1.3.2.5 <i>Australia</i>	25
1.3.2.6 <i>India</i>	26
1.3.2.7 <i>South Africa</i>	26
1.3.2.8 <i>South America</i>	27
1.4 Global Assessment	27
1.5 Further Research	30
1.6 References	31
Chapter 2 Mercury Emissions from Coal Combustion in China	
Summary	37
2.1 Introduction	37
2.2 Results and Discussion	37

	<i>Page</i>
2.2.1 Coal use trends, 1995-2005	37
2.2.2 Mercury in coal	39
2.3 Mercury released to the atmosphere	40
2.4 Mercury emission trends in China	41
2.5 Future mercury emissions from coal combustion	44
2.6 Future Research and Policy Implications	45
2.7 References	46
Chapter 3 Mercury Emissions from Industrial Sources in China	
Summary	47
3.1 Introduction	47
3.2 Mercury emission factors from different industrial sources in China	48
3.3 Speciation of mercury compounds from different industrial sources in China	50
3.4 Mercury emissions from different industrial sources in China in 1999	50
3.5 Mercury emission trends from 1995 to 2003	52
3.6 Uncertainties	53
3.7 Future Research and Policy Implications	54
3.8 References	54
Chapter 4 Mercury Emissions from Industrial Sources in India and its Effects in the Environment	
Summary	57
4.1 Introduction	57
4.2 Results	61
4.2.1 Coal combustion	62
4.3 Iron and Steel Industry	64
4.3.1 Non-ferrous metallurgical industry in India	65
4.3.1.1 <i>Production of metals by different processes and emissions of mercury</i>	65
4.3.2 Chlor-alkali industry in India	66
4.3.2.1 <i>Chlorine and caustic soda production</i>	66
4.4 Cement Industry	68
4.5 Wastes	69
4.5.1 <i>Municipal Solid Waste (MSW)</i>	69
