

EAF and EBM

WHAT IS EAF?

The main purpose of the EAF is to plan, develop and manage fisheries in a manner that addresses the multiple needs and desires of societies, without jeopardizing the options for future generations to benefit from the full range of goods and services provided by marine ecosystems.

Key features of the EAF principles in practice

- Apply the precautionary approach
- Use best available knowledge
- Acknowledge multiple objectives and values of ecosystem services
- Embrace adaptive management
- Broaden stakeholder participation
- Understand and use full suite of management measures
- Promote sectoral integration and interdisciplinarity

Consultation with stakeholders

1. Initiation and Planning
Scoping and Baseline Information
Broad Objectives

2. Identify and prioritize Issues
Component Trees
Risk Assessment

3. Develop Management System
Set Operational Objectives
Select Indicators
Evaluation/Selection of Mgmt Options

4. Implement and Monitor
Execute Operational Plan
Formalize Management Plan
Review Performance
Report and Communicate

5-10 years

1 year

Best available knowledge

Issue Identification

Types of Issues

- **MANAGE** - These come under your direct legislative responsibility. You can generate regulations/management plans etc to deal with these issues. The agency must take full responsibility for these issues
- **INFLUENCE** - These issues are not under your legislative responsibility so you cannot manage them, but as they are under other legislative responsibility (e.g. another agency) you can influence them
- **REACT TO** - These issues are generated by external
