

GLOBAL SUSTAINABLE DEVELOPMENT REPORT

2015 EDITION
ADVANCE UNEDITED VERSION

This publication was printed on recycled paper using renewable energy.

Foreword

In September 2015, world leaders will meet to adopt a universal and transformative agenda for sustainable development, with a set of sustainable development goals (SDGs) at its core. The scientific community has provided valuable guidance in the formulation of the SDGs, and it will need to remain closely engaged as the world moves towards implementing the new agenda and reviewing our progress. The current report should help ensure that our efforts are underpinned by the latest and best scientific evidence and advice.

The GSDR is the only comprehensive, global report on sustainable development. It brings together a broad range of existing scientific assessments and reviews global progress and future sustainable development pathways in an integrated way, taking into account the perspectives of scientific communities across the globe.

Extensive inputs have been sought for the 2015 report from the UN system, scientists, government officials and stakeholders. More than 500 independent scientists and experts from many UN entities and affiliated organizations located in all regions of the globe have contributed to the report.

A crowdsourcing exercise carried out in the six UN languages invited scientists and researchers around the world to submit science briefs that highlight research findings or solutions relating to sustainable development, for the attention of policy-makers. Some 187 science briefs were submitted and, following a public review, a number have been featured in the report.

The report endeavours to present a range of scientific perspectives and to be policy-relevant but not policy-prescriptive. It offers suggestions on how to strengthen scientists' engagement with policy makers at national and international levels, in the latter case notably through the High Level Political Forum (HLPF). The report examines the SDGs as an interlinked system, analyzing how the goals are interrelated through their targets, and how progress towards one goal may depend on and contribute to progress towards others. Such an integrated assessment of the SDGs and the post-2015 agenda will be a standard feature of future GSDRs.

2015 is a historic year. We are set to adopt an ambitious agenda that will move us towards a sustainable future for people and planet. But adopting the agenda is only the first step. Making it a reality will require work and dedication from all of us. The scientific community has a crucial role to play by sharing its advice and evidence in a compelling manner with policy-makers and conducting a dialogue with them, and the Global Sustainable Development Report serves as a tool to facilitate this exchange. Let us use it on our path towards the future we want.

List of Abbreviations and Acronyms.....	14
Executive Summary.....	19
Introduction	25
Chapter 1. The Science Policy Interface.....	26
1.1. Introduction: the science-policy interface for sustainable development	26
1.1.1. Science for sustainable development	26
1.1.2. The science policy interface for sustainable development.....	26
1.2. Possible roles of the HLPF for strengthening the science-policy interface: opinions from scientists and development experts	30
1.2.1. Highlighting trends and providing policy-relevant analysis	32
1.2.2. Providing a platform for science-policy dialogue.....	34
1.2.3. Contributing to the agenda-setting functions of the Forum.....	36
1.2.4. Additional ideas suggested by experts.....	38
1.3. Conclusion	38
Chapter 2. Integrated Perspectives on the Sustainable Development Goals.....	40
2.1. The Sustainable Development Goals and integrated perspectives suggested by the scientific community	40
2.1.1. UN recognition of inter-linkages and integrated approaches.....	40
2.1.2. Sustainability science and integration	40
2.1.3. Sustainable Development Goals (SDGs).....	41
2.1.4. Recommendations by the International Council for Science (ICSU) and the International Social Science Council (ISSC)	42
2.1.5. ICSU/ISSC recommendation to formulate an overarching goal.....	42
2.1.6. ICSU/ISSC recommendation to develop interlinking targets that are common to different goals.....	42
2.1.7. ICSU/ISSC recommendation to formulate a compelling narrative of development.....	43
2.1.8. Complexity scientists' integrated view and global risks.....	43
2.1.9. From a political to a scientific integrated view of the SDG network of inter-linked goals and targets	44
2.2. Integrated SDG perspectives in international assessments	46
2.2.1. Hierarchy in terms of thematic breadth	46
2.2.2. SDG coverage	47
2.3. Global scenario models for integrated assessment of the SDGs.....	47
2.3.1. Sustainable development scenarios for Rio+20 in 2012	49
2.3.2. SDG coverage of the global scenario models.....	49
2.3.3. Coverage of inter-linkages between SDGs.....	51
2.4. Conclusions.....	52
Chapter 3. The Oceans, Seas, Marine Resources and Human Well-being Nexus.....	53

3.1.	Interlinked issues: oceans, seas, marine resources and human well-being.....	55
3.2.	Impact of important classes of threats on the oceans, seas, marine resources and human well-being nexus.....	58
3.3.	Illustrative case studies – the need for an integrated approach when dealing with the nexus	64
3.4.	Towards an integrated approach when dealing with the oceans, seas, marine resources and human well-being nexus	66
	Annex 1 (Extended versions of Table 3-1, 3-3, 3-4)	68
Chapter 4.	Disaster Risk Reduction: A Cross-cutting Necessity in the SDGs.....	69
4.1.	Global targets in two frameworks.....	69
4.2.	Interlinkages – DRR as a cross-cutting issue in the SDGs	69
4.3.	Measuring progress – target 11.5	73
4.3.1.	Global and national level target setting and differing risk profiles.....	73
4.3.2.	Importance of loss accounting	74
4.3.4.	Baseline setting and assessing risk: strengths and challenges.....	78
4.3.5.	Measuring affected people	81
4.4.	New solutions for measuring	82
4.4.1.	Preparedness and Early Warning.....	83
4.4.2.	Impact and Response	83
4.4.3.	Mitigation, Risk and Vulnerability Modeling.....	84
4.4.4.	Challenges	85
4.5.	Conclusions.....	85
	ANNEX 1. DRR related targets in the OWG proposal.....	86
Chapter 5.	Economic Growth, Inclusive and Sustainable Industrial Development and Sustainable Consumption and Production	87
5.1.	Introduction.....	87
5.1.1.	Overview of goals and development challenges in the post-2015 agenda	87
5.1.2.	Evolution of thinking on the role of Industrial Policy for development in past decades.....	88
5.2.	Economic growth and structural transformation.....	89
5.2.1.	Developing manufacturing industries: economic growth, sustained technological change and world trade... ..	89
5.2.2.	Transforming industrial systems - increasing value addition in resource, agriculture and service industries ..	91
5.2.3.	Infrastructure, industry and growth	92
5.2.4.	Industrial policies for structural transformation: rationales, scope and policy areas	92
5.3.	Industrialisation and social sustainability: inclusiveness, productive employment and education policies.....	95
5.3.1.	Inclusive economic growth and industrialisation	95
5.3.2.	More and better jobs for inclusive development	96
5.3.3.	Education policies for industrial transformation and inclusive growth.....	96
5.4.	Sustainable consumption and production in relation to industrialization.....	97
5.4.1.	Sustainable industrial systems and new consumption patterns	97
5.4.2.	SCP in national governance – policies and programmes to drive structural transformation through SCP	97

5.5.	New industrial policies for inclusive and sustainable development – policy alignment, trade-off management and win-win solutions.....	99
5.5.1.	Industrial policy challenges.....	99
5.6.	Concluding remarks.....	101
	Technical notes	102
Chapter 6.	Countries in Special Situations.....	104
6.1.	Introduction.....	104
6.1.1.	Context.....	104
6.1.2.	The three groups of countries and related international commitments in the area of sustainable development	
	104	
6.1.3.	Publications relevant to the sustainable development agenda in the three groups of countries	106
6.1.4.	Existing points of contact between science and policy.....	106
6.1.5.	Investment in research and development.....	107
6.2.	Least developed countries	108
6.2.1.	Istanbul Programme of Action (IPoA)	108
6.2.2.	The Istanbul Programme of Action and the SDGs.....	108
6.2.3.	Relevant publications for LDCs.....	109
6.2.4.	The science-policy interface in LDCs	109
6.3.	Landlocked developing countries.....	112
6.3.1.	Historic overview	112
6.3.2.	The Vienna Programme of Action and the proposed sustainable development goals (SDGs) and targets....	113
6.3.3.	Publications relevant for LLDCs.....	113
6.3.4.	Science, technology and innovation in LLDCs	114
6.3.5.	Investment in research and development in LLDCs.....	115
6.4.	Small Island Developing States.....	115
6.4.1.	Science and technology as a SIDS priority.....	115
6.4.2.	SAMOA Pathway	116
6.4.3.	The SAMOA Pathway and the proposed SDGs.....	116
6.4.4.	Publications relevant for SIDS	116
6.4.5.	The landscape of SIDS related international scientific outputs	117
6.4.6.	Research and data from the SIDS regional and national institutions	117
6.4.7.	Existing points of contact between science and policy in SIDS.....	118
6.5.	Data gaps.....	120
6.6.	Concluding remarks.....	121
Annex 1		122
Annex 2		126
Chapter 7.	Science Issues for the Attention of Policy Makers	131
7.1.	Introduction.....	131
7.2.	Crowd-sourcing science briefs for policy makers.....	132

7.2.1.	Open call for inputs to the present report.....	133
7.2.2.	187 accepted science briefs	133
7.3.	Highlights from the submitted science briefs	135
7.3.1.	Poverty eradication.....	135
7.3.2.	Agriculture, hunger and food security	136
7.3.3.	Health.....	136
7.3.4.	Education	136
7.3.5.	Gender equality and empowerment of women	136
7.3.6.	Water and sanitation	137
7.3.7.	Energy	137
7.3.8.	Economic growth and employment.....	137
7.3.9.	Industrialization and infrastructure	138
7.3.10.	Sustainable consumption and production (SCP).....	138
7.3.11.	Cities and human settlements	138
7.3.12.	Climate change.....	139
7.3.13.	Oceans.....	139
7.3.14.	Terrestrial biodiversity	140
7.3.15.	Peace, inclusive societies, justice and institutions.....	140
7.3.16.	Means of implementation, global partnership	140
7.3.17.	Briefs in Chinese language	141
7.4.	Selected sustainability science highlights from academic journals.....	141
7.5.	Big data applications for sustainable development.....	144
7.6.	UN system mechanisms to identify emerging issues	146
7.7.	Time lags between science and policy	148
7.7.1.	Ozone Layer.....	149
7.7.2.	Leaded petrol	149
7.7.3.	Climate Change	150
7.7.4.	Factors influencing science-policy lags	151
7.7.5.	Research uptake in policy in the humanitarian sector in Africa	151
