

A photograph of people in a river. In the foreground, two people are washing clothes in the water. In the background, a man in a red vest is standing in a boat, and a woman in a green and purple patterned dress is sitting in the boat. The river is muddy and there are some buckets and laundry on the bank.

PREFACE

The GEF Medium Size Project (MSP) *Development of the Methodology and Arrangements for the GEF Transboundary Waters Assessment Programme*, approved in January 2009, was envisioned as a partnership among existing programmes, which was considered to be more cost effective than the conduct of an independent data and information gathering exercise. The Project Objective was to develop the methodologies for conducting a global assessment of transboundary waters for GEF purposes and to catalyse a partnership and arrangements for conducting such a global assessment.

This Project has been implemented by UNEP as Implementing Agency, UNEP Division of Early Warning and Assessment (DEWA) as Executing Agency, and the following lead agencies for each of the water systems: the International Hydrological Programme (IHP) of the United Nations Educational, Scientific and Cultural Organization (UNESCO) for transboundary aquifers including aquifers in small island developing states (SIDS); the International Lake Environment Committee (ILEC) for lake basins; UNEP-DHI Centre for Water and Environment (UNEP-DHI) for river basins; and Intergovernmental Oceanographic Commission (IOC) of UNESCO for LMEs and the open ocean.

This Project resulted in developed methodologies for the following five transboundary water systems: (i) groundwater aquifers; (ii) lake/reservoir basins; (iii) river basins; (iv) large marine ecosystems; and (v) open oceans.

The results of this Project are presented in the TWAP MSP Publication, *Methodology for the GEF Transboundary Waters Assessment Programme*, which consists of the following six volumes:

- *Volume 1 – Methodology for the Assessment of Transboundary Aquifers, Lake Basins, River Basins, Large Marine Ecosystems, and the Open Ocean;*
- *Volume 2 – Methodology for the Assessment of Transboundary Aquifers;*
- *Volume 3 – Methodology for the Assessment of Transboundary Lake Basins;*
- *Volume 4 – Methodology for the Assessment of Transboundary River Basins;*
- *Volume 5 – Methodology for the Assessment of Large Marine Ecosystems; and*
- *Volume 6 – Methodology for the Assessment of the Open Ocean.*

The volume 1 is a summary of the detailed methodologies described in volumes 2 – 6. At the back cover of the volume 1 is attached a DVD that contains electronic version of all six volumes.

CONTENTS

CONTENTS	v
LIST OF ACRONYMS	vii
SUMMARY FOR DECISION-MAKERS	1
GENERAL INTRODUCTION	5
PART 1. CONCEPTUAL FRAMEWORK	7
1.1 Objective	7
1.2 Scope	8
1.3 Framework	9
1.4 Vulnerability	13
1.5 Contribution to Existing Global Assessments	13
PART 2. INVENTORY AND CHARACTERIZATION OF TRANSBOUNDARY RIVER BASINS	17
2.1 Assessment Units/Boundaries	17
2.2 Inventory of Agencies, Programmes, Data Sets and Sources	20
2.3 Identification of Major Stakeholders and Partners	21
2.4 Priority Issues, Emerging Issues and Hotspots	22
2.5 Identification of Demonstration/Pilot Projects (Level 2)	24
PART 3. INDICATORS	27
3.1 LEVEL 1 INDICATORS	27
<i>Water Quantity Indicators</i>	28
<i>Water Quality Indicators</i>	29
<i>Ecosystem Indicators</i>	30
<i>Governance Indicators</i>	31
<i>Socioeconomic Indicators</i>	32
<i>Projected Transboundary Stress Indicators</i>	34
3.2 Scoring of Basins	35
3.3 Transboundary River Basin Fact Sheets	38
3.4 Level 2 Indicators	39
PART 4. INTERLINKAGES WITH OTHER WATER SYSTEMS	41
4.1 Interlinkages among Water Systems	41
4.2 Common Issues	43
4.3 Input-Output Analysis	45
4.4 Cross-Cutting Issues	45
PART 5. DATA AND INFORMATION MANAGEMENT	47
5.1 Coordinated Approach	47
5.2 Information Management and Dissemination	48
PART 6. TOWARDS IMPLEMENTATION OF THE RIVER BASINS ASSESSMENT	51
6.1 Partnership and Institutional Arrangements	51
6.2 Validation	54
6.3 Identification of Capacity-Building Needs	56
6.4 Financial Resources Required	56
6.5 FSP Timeframe	59
