- Tools and guides development activities
- Advocacy and Technical Training Workshops
- Knowledge sharing and peer-to-peer support

- Secretariat provided by ESCAP, in collaboration with UNECE

- **Link: unnex.unescap.org**

What is Trade Facilitation?

- There is no universal definition of trade facilitation.
- Any measure that **reduce barriers** to the movement of goods between buyers and sellers throughout the international supply chains (ESCAP 2010)
- Simply any measure that facilitate and **simplify movement of goods and information** along the supply chains
- Objective of trade facilitation - **reduce time, cost and complexity of trade transactions**

Agriculture Trade Facilitation can be defined as:

the simplification and harmonization of procedures (activities, practices and formalities) involved in the import and export of agricultural and food products, including but not limited to collecting and processing data and documents required for the cross-border movement of these products

Electronic exchange of sanitary and phytosanitary certificates is an important paperless agriculture trade facilitation:

- helps to reduce fraud
- better management of the risks in trade of agricultural products
- lower administrative costs and burden of the regulatory authorities
