Table of contents

Acknowledgements.....	5
Acronyms.....	6
Glossary.....	7
Executive summary.....	9
Key Findings.....	11
Policy Implications and Recommendations.....	13
1. Background.....	17
1.1 Climate change and migration: global context.....	17
1.2 Framework of study.....	19
2. Country context.....	21
2.1 Physical geography and environment.....	21
2.2 Climate change projections for Nauru.....	22
2.3 Demographics.....	22
2.4 Economy.....	25
2.5 Gender.....	25
2.6 Migration from Nauru.....	26
2.7 Remittances.....	26
3. Methodology.....	29
3.1 Household survey.....	29
3.2 Qualitative analysis.....	30
4. Findings.....	33
4.1 Nauruans are already experiencing environmental change, particularly droughts.....	33
4.2 The adaptive capacity in Nauru to cope with climate change is limited and internal migration is not a solution.....	34
4.3 Nauru has some history of migration.....	37
4.4 Migration seems to be related to improved resilience and remittances.....	41
4.5 Migration is experienced differently by women and men.....	45
4.6 Migration demand is greater than the access to migration opportunities.....	47
4.7 Economic and cultural motivations will remain a primary driver of migration.....	47
4.8 Migration is less related to subsistence agriculture than in other parts of the world.....	48
4.9 Climate change will drastically impact migration demand.....	48
4.10 Many potential migrants will not have the means to migrate.....	51
5. Policy Implications and Recommendations.....	55
References.....	61

List of Tables

Table 1: The distribution of the household survey.....	30
Table 2: Livelihood risks classed as severe and their potential solutions according to PRA sessions.	35
Table 3: Migration destinations and reasons.	38
Table 4: Migration length by gender.....	43

List of figures

Figure 1: Conceptualization of migration decision making ...	18
Figure 2: A map of Nauru.....	23
Figure 3: Population of Nauru from 1950-2014	24
Figure 4: GDP per capita of Nauru from 1970-2014	24
Figure 5: Households affected by natural hazards 2005-2015	34
Figure 6: Incidence of household vulnerability by dimension.	36
Figure 7: Ease of access to destinations.....	37
Figure 8: The reasons for migration	39
Figure 9: Institutions able to assist households.....	40
Figure 10: Household vulnerability by migration experience	41
Figure 11: Household vulnerability by rental income and migration experience	41

Figure 12: Migration for education and work by income quartile	42
Figure 13: Mean AUD per capita income for households receiving remittances by type of migrant.....	43
Figure 14: Migration destination by gender	44
Figure 15: Migration reason by gender.....	45
Figure 16: Reason for non-migration.....	46
Figure 17: Perceived impact of economic and cultural factors on future migration	48
Figure 18: Most likely destination for future migration	49
Figure 19: Likely reason for future migration.....	50
Figure 20: Perceived impact of climate change manifestations on future migration	50
Figure 21: Perceived ability to migrate	51

Acknowledgements

This report has been produced by the United Nations University Institute for Environment and Human Security (UNU-EHS) as a part of the Pacific Climate Change and Migration (PCCM) Project entitled, 'Enhancing the Capacity of Pacific Island Countries to Manage the Impacts of Climate Change on Migration'. The PCCM project is a three-year project (2013-2016) funded by the European Union (EU) and implemented by the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP), the International Labour Organization (ILO) and the United Nations Development Programme (UNDP).

UNU-EHS staff involved in the development of this report include Robert Oakes, Andrea Milan, Koko Warner, Noemi Cascone, Markus Schindler, Ann-Kristin Matthé and Jakob Rhyner. UNESCAP staff include Iosefa Maiava, Jillian Campbell, Malcolm Ponton, Justin Shone, Paul Tacon and Timothy Westbury. Local UNESCAP PCCM experts who made a significant contribution include Mavis Depaune. The University of the South Pacific played a crucial role in data collection.
