- iii. Expected Outputs

1. Project

**Strengthening Multi-Hazard Risk Assessment and
Early Warning Systems with
Applications of Space and Geographic Information Systems
in Pacific Island Countries**

Objectives

1. Strengthen multi-hazard assessment and **early warning systems** of Pacific Island countries
2. Assist **Pacific regional cooperation platforms** for multi-hazard assessment and early warning systems
 - Knowledge hub for sharing experiences, practices, and geospatial data

** In particular, by using space and GIS applications*

Key Activities

1. Gap and needs analysis (Aug – Oct 2016)
 - Early warning systems
 - Geo-portal and geospatial data for DRR
2. Two capacity building trainings (for 1 month each; Oct. – Nov. 2016)
 - Early warning systems in Indonesia
 - Geo-portal and geospatial data for DRR in Thailand
3. Pilot projects in the selected Pacific countries (Jan. – Aug 2017)
 - National early warning systems + geo portal & geo database
 - 3-5 year national action plans for DRR (EWS)
4. Building a Pacific knowledge hub on space and geospatial data
5. E-learning platform for remote training

Key Outcomes

Pacific countries...

1. Have **strengthened capacities** for multi-hazard risk assessment and early warning systems
2. Operate **national geo-portals and geospatial database**
3. Develop **mid- and long-term national working plans** on national multi-hazard risk assessment and early warning system
4. Corner stone to move **towards SDGs** in Pacific;
 - Ministerial Conference on Space in 2018

2. First Pacific Workshop

Objectives

1. Share initial findings from the gap and needs analysis in the Pacific region.
2. Share knowledge and experiences in the Pacific context
3. Discuss cooperation opportunities towards
 - Sustainable Development Goals
 - Pacific's concerted voice
 - Space Leaders Forum in India, early Nov 2016
