

Solomon Islands

Resilience in the agriculture sector

Context: Resilience in SI Agriculture

- Community resilience strong
 - Farming communities quickly recover after events
Eg. El Nino & TC Pam in the Atoll
- Paradigm shift/Concept quite new/Confusions
 - In the past responsibility for disaster cycle sat with NDMO
 - Now ministry and sector starting to take responsibility

Building Blocks

People

Capacity

Partnerships

Networks

Mechanisms

Policies

**Institutional
arrangements**

**Legal
frameworks**

Processes

**Development
products**

**Development
plans**

Budgets

People

(Production capacity)
