

Joint United Nations Regional Commissions

Trade Facilitation and Paperless Trade Implementation Survey 2015

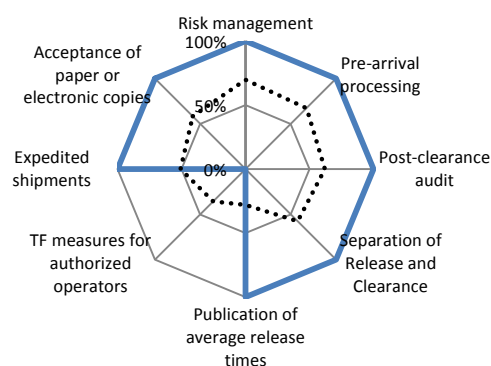

AUSTRALIA

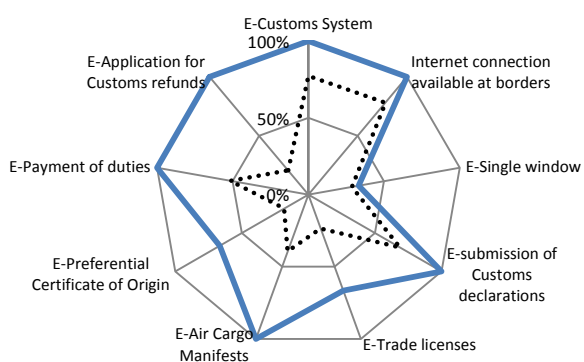

Transparency

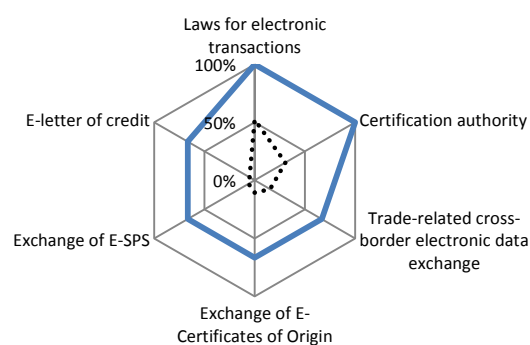

Formalities

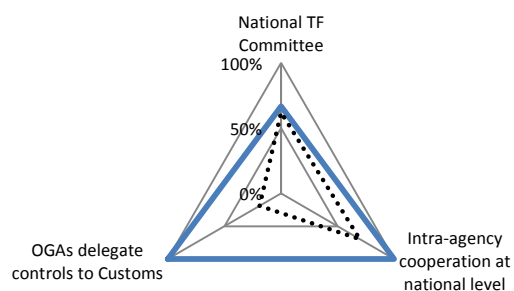

Paperless trade

Cross-border paperless trade

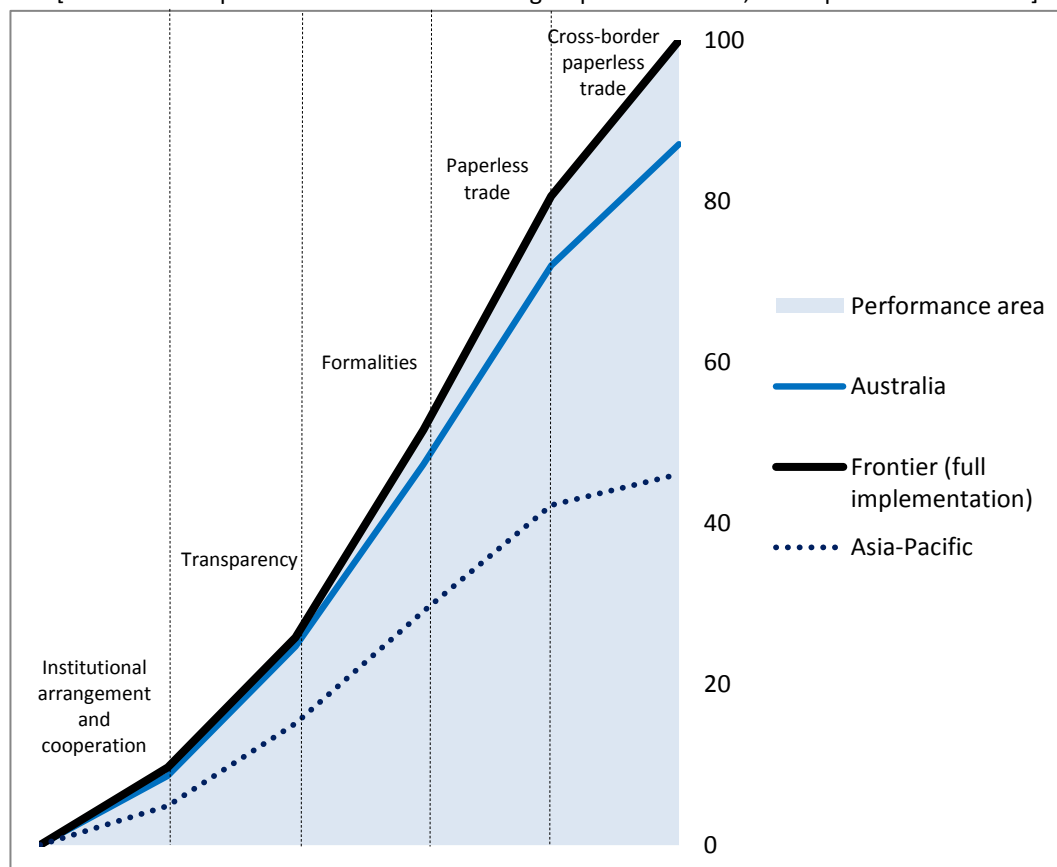

Institutional arrangement and cooperation

AUSTRALIA

Moving up the trade facilitation ladder towards seamless international supply chains

[Cumulative implementation scores of core groups of measures; full implementation =100]

The level of implementation of trade facilitation measures in Australia (88%) is above the level in Asia-Pacific (46.5%). Among the five core groups of trade facilitation measures, the most implemented in Australia are “Transparency” measures (100%). The least implemented are “Cross-border paperless trade” measures (77.8%).

All “Transparency” measures are fully implemented, and implementation is well above the regional average. Implementation of improved “Formalities” is likewise higher than the regional average. The least implemented measure in this area is *TF measures for authorized operators*.

In “Paperless trade”, Australia’s implementation is higher than the regional average. *E-Single window* is least implemented.

Australia may focus its trade facilitation efforts in particular on full implementation of “Paperless trade” measures, as well as on moving towards “Cross-border paperless trade”.
