

Energy Transition Pathways for the 2030 Agenda

SDG 7 Roadmap for Nepal

*The shaded areas of the map indicate ESCAP members and associate members.**

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations regional hub promoting cooperation among countries to achieve inclusive and sustainable development. The largest regional intergovernmental platform with 53 Member States and 9 Associate Members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development, which it does by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. ESCAP research and analysis coupled with its policy advisory services, capacity building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

* The designations employed and the presentation of material on this map do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The preparation of this report was led by the Energy Division of the United Nations Economic and Social Commission for Asia and the Pacific (ESCAP) in collaboration with Murdoch University, Australia, and the Ministry of Energy, Water Resources and Irrigation (MoEWRI), Government of Nepal.

The principal authors and contributors of the report were Anis Zaman and Charlotte Yong. A significant contribution to the overall work was from Dilip Kumar Sadaula, Joint Secretary, MoEWRI; Vishwa Amatya, energy expert; and Jiwan Mallik, Alternative Energy Promotion Centre (AEPIC).

The review and valuable suggestions were provided by Hongpeng Liu, Director of the Energy Division, ESCAP, Michael Williamson, Section Chief of the Energy Division, ESCAP and David Ferrari, Economic Affairs Officer, Energy Division, ESCAP.

Robert Oliver edited the manuscript. The cover and design layout were created by Xiao Dong and Qi Yin.

Administrative and secretariat support was provided by Prachakporn Sophon, Sarinna Sunkphayung, Nawaporn Sunkpho and Thiraya Tangkawattana.

| Foreword: ESCAP | vi |
| Foreword: Nepal | vii |
| Abbreviations and acronyms | viii |
| Executive Summary | ix |
| A. Highlights of the roadmap..... | ix |
| B. Achieving Nepal’s SDG7 and NDC targets by 2030 | x |
| C. Important policy directions | xiii |
| 1. Introduction | xiv |
| 1.1. Background | xiv |
| 1.2. SDG7 targets and indicators | xiv |
| 1.3. Nationally Determined Contribution..... | 1 |
| 2. NEXSTEP methodology | 2 |
| 2.1. Key methodological steps | 3 |
| 2.2. Scenario definitions | 4 |
| 2.3. Economic analysis | 5 |
| 2.3.1. Basics of economic analysis..... | 5 |
| 2.3.2. Cost parameters..... | 5 |
| 2.3.3. Scenario analysis | 5 |
| 3. Overview of Nepal’s energy sector | 6 |
| 3.1. Current situation..... | 7 |
| 3.2. National energy profile..... | 8 |
| 3.3. National energy policies and targets | 9 |
| 3.4. National energy resource assessment | 10 |
| 3.5. National energy balance 2019..... | 10 |
| 3.6. Energy modelling projections..... | 11 |
| 3.7. Energy demand outlook..... | 11 |
| 3.8. Electricity generation outlook..... | 14 |
| 3.9. Energy supply outlook..... | 15 |
| 3.10. Energy sector emissions outlook..... | 15 |

| | |
|--|-----------|
| 4. SDG scenario – achieving SDG7 by 2030 | 16 |
| 4.1. SDG energy demand outlook..... | 17 |
| 4.2. SDG7 targets | 18 |
| 4.2.1. SDG 7.1.1 – access to electricity..... | 18 |
| 4.2.2. SDG 7.1.2 – access to clean fuels and technologies for cooking..... | 18 |
| 4.2.3. SDG 7.2 – renewable energy | 19 |
| 4.2.4. SDG 7.3 – energy efficiency | 20 |
| 4.2.5. GHG emissions | 21 |
| 4.3. Power generation in the context of SDG7 | 21 |
| 4.3.1. Increasing electricity exports to prevent curtailment | 22 |
| 4.3.2. Building storage type hydropower to address seasonal variation..... | 23 |
| 4.4. Policy actions for achieving SDG7 | 25 |
| 4.4.1. Achieving last-mile connectivity with localized renewable resources..... | 25 |
| 4.4.2. Electric cooking stove is a sustainable long-term solution with multi-fold benefits..... | 25 |
| 5. Energy transition pathway with increased ambitions | 28 |
| 5.1. Increasing ambitions with enhancing energy efficiency (EE) scenario | 29 |
| 5.1.1. Energy demand outlook | 29 |
| 5.1.2. Substantial energy savings can be achieved with a whole-economy approach | 30 |
| 5.1.3. Primary energy supply and fuel imports | 32 |
| 5.1.4. GHG emissions | 33 |
| 5.2. Policy recommendations to raise ambitions beyond SDG and NDC targets | 33 |
| 5.2.1. Raising the efficiency standards of household appliances to save long-running costs..... | 33 |
| 5.2.2. Adoption of sustainable heating systems helps to save fuel and reduce GHG emissions..... | 34 |
| 5.2.3. Transport electrification is a major step towards net zero 2050 | 34 |
| 5.2.4. Incentivize industrial energy efficiency measures for a more competitive industry sector..... | 36 |
| 5.2.5. Green financing | 37 |
| 6. Building back better in the recovery from COVID-19 with the SDG 7 roadmap | 38 |
| 6.1. Accelerating access to clean and modern energy services..... | 40 |
| 6.2. Savings from the energy sector will help to build other sectors | 40 |
| 6.3. Long-term recovery planning to build back better while ensuring sustainable growth..... | 40 |
| 7. Revisiting existing policies | 42 |
| 7.1. Universal access to electricity..... | 44 |
| 7.2. Universal access to clean cooking..... | 44 |
| 7.3. Renewable energy | 44 |
| 7.4. Energy efficiency | 45 |
| 8. Conclusion | 46 |
| References | 48 |
