

Meeting on the Asia-Pacific Gateway for Disaster Risk Reduction and Development for SDGs

15 December 2015

Bangkok

Online resources

Our needs

1. Our needs

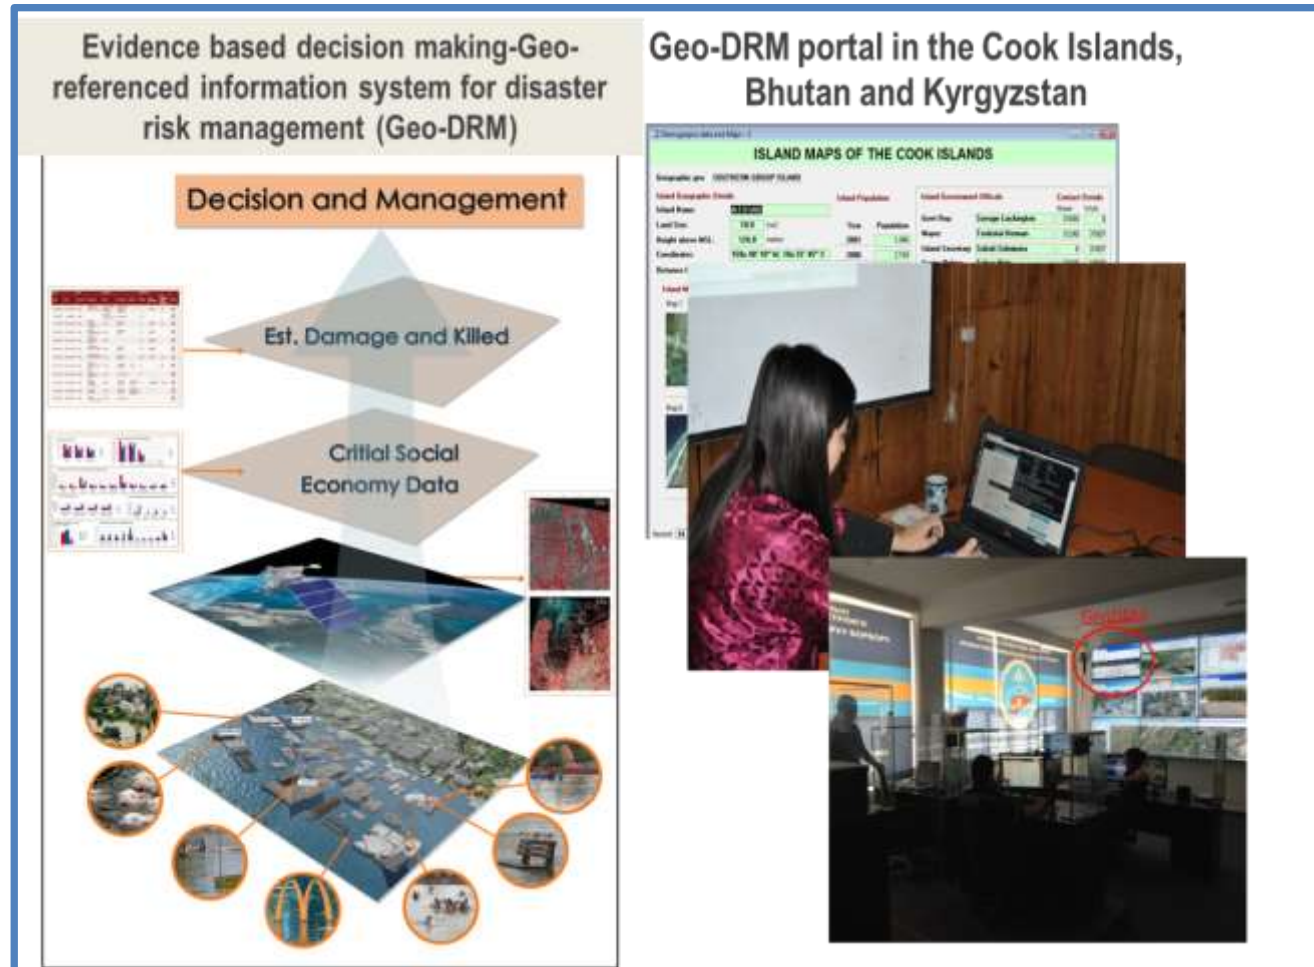

1. Learning environment
2. File-sharing environment

2. Existing solutions

1. DRM e-learning platform
2. Multiple methods for file-sharing

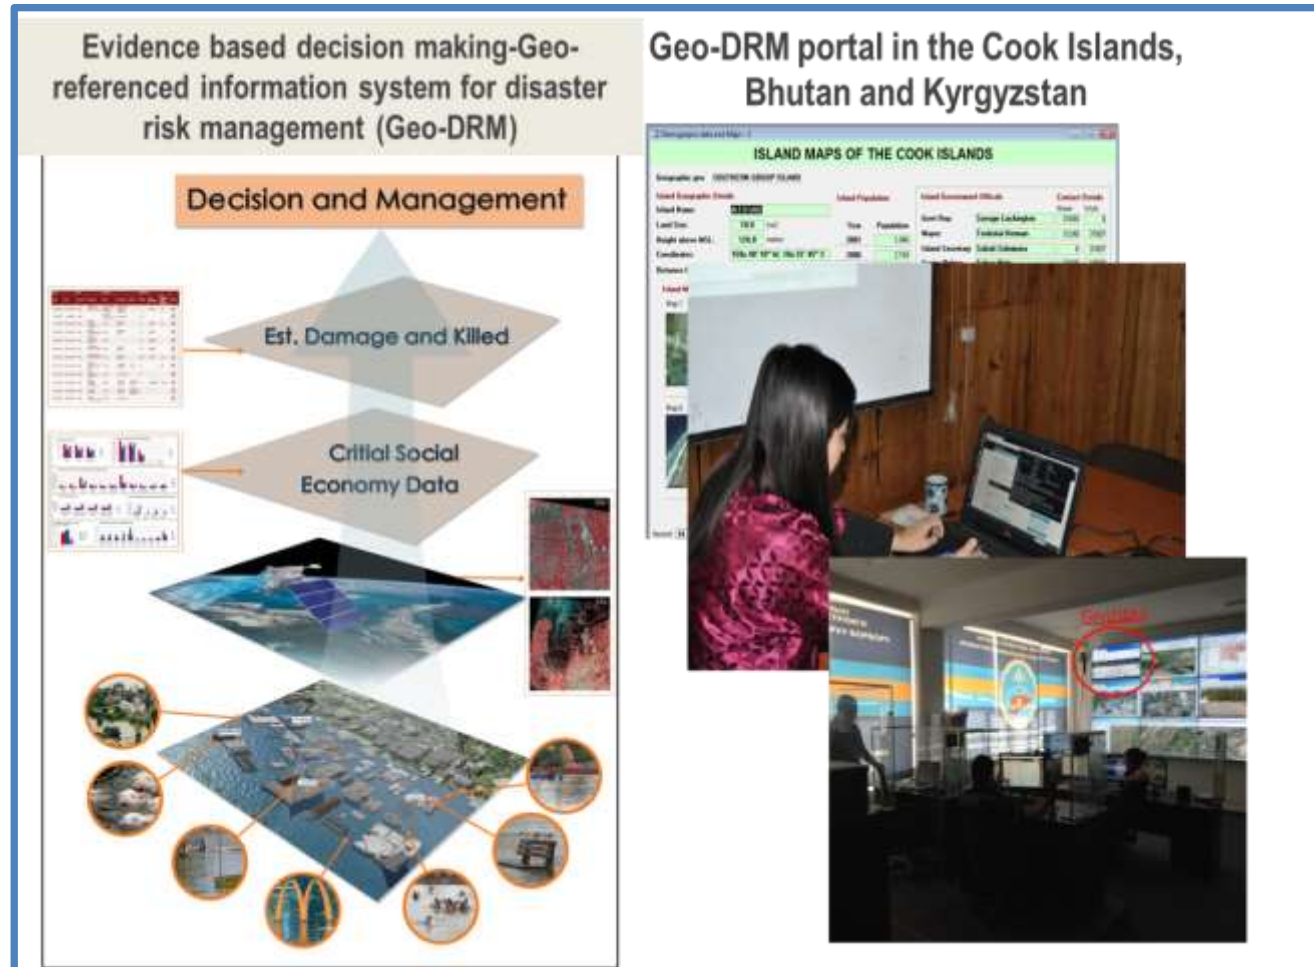

Previously we had material on multiple platforms:

- YouTube
- PDF files
- Printed material
- Sample data

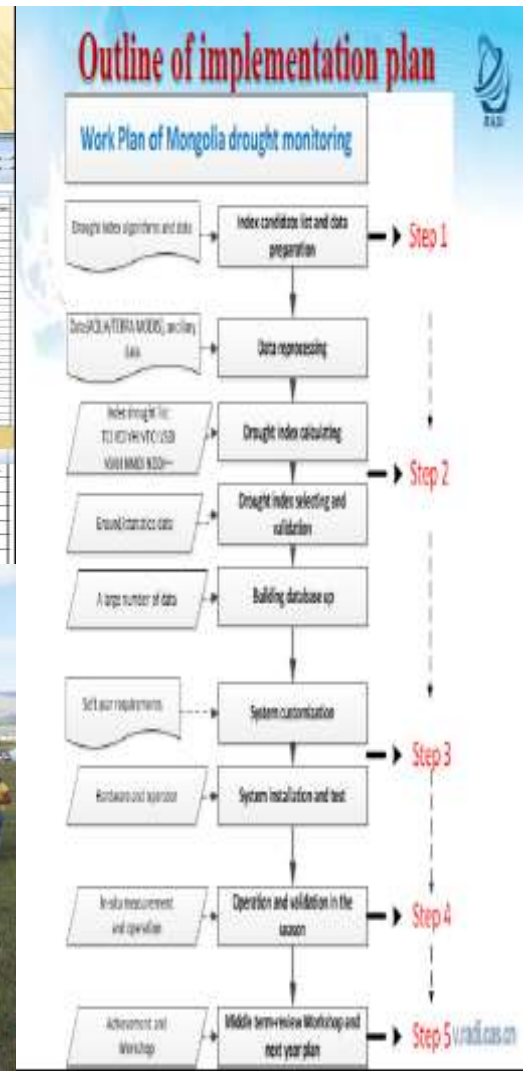

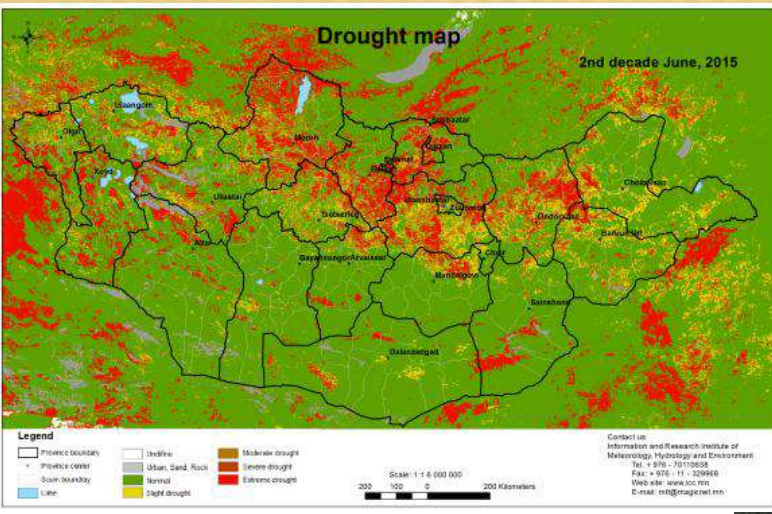

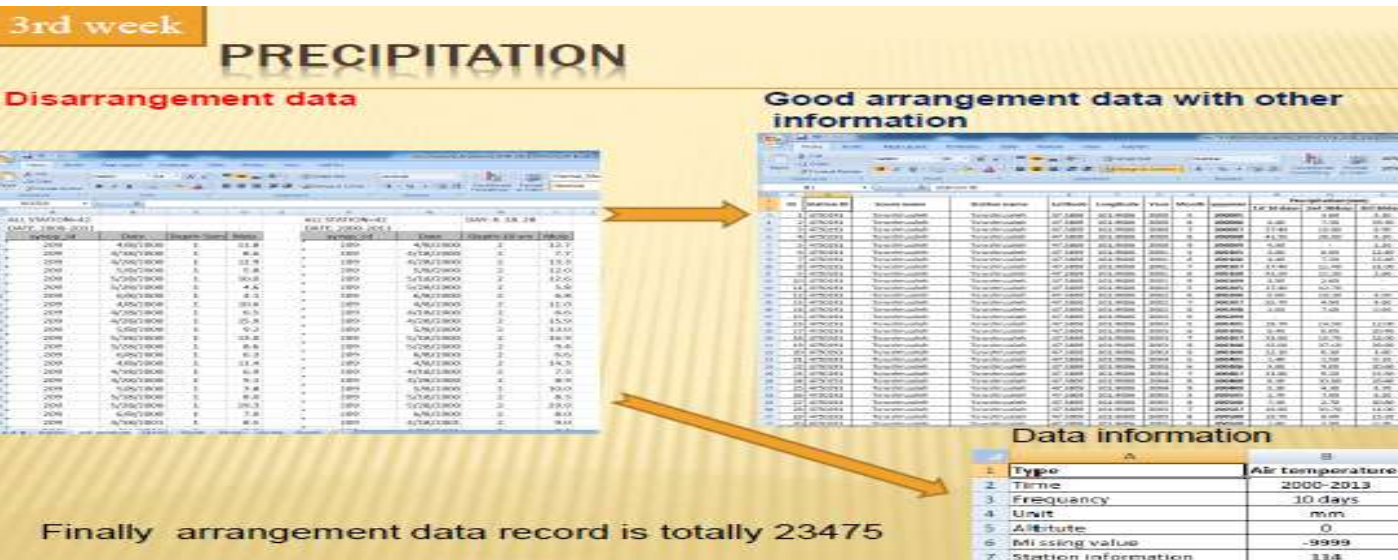

Previously we had material on multiple platforms:

- YouTube
- PDF files
- Printed material
- Sample data

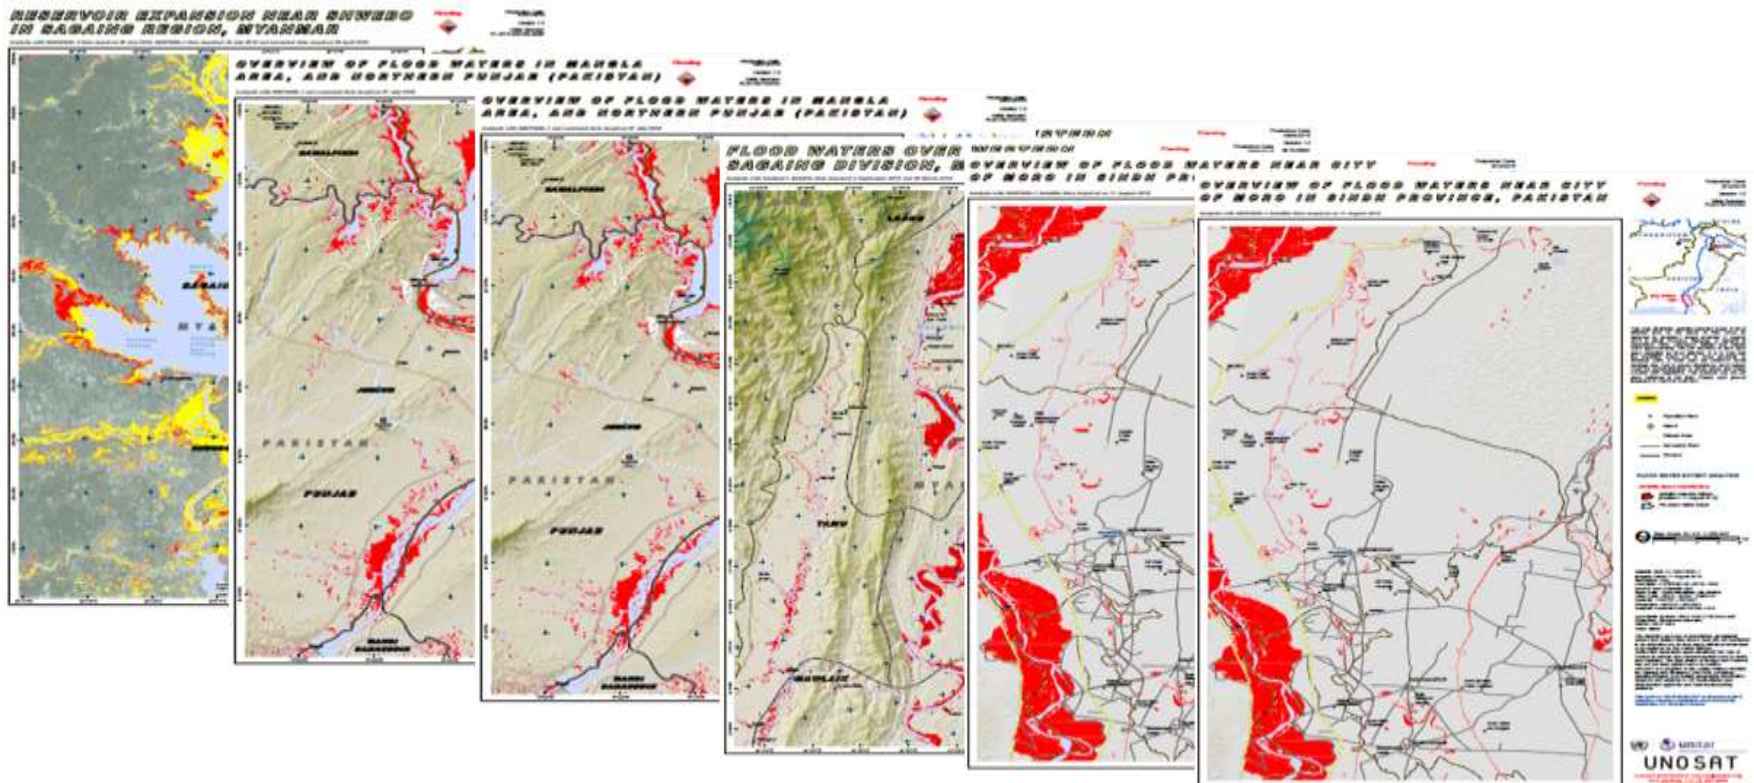

1. Learning environment needs

Example: training material and sample data

2. File-sharing needs

- We provide high-resolution and multi-spectral satellite imagery to countries affected by disaster
- And mapping products (as below)

2. File-sharing needs

- High-resolution and multi-spectral satellite imagery can be between 2-5 GB per file

Damage in
Kathmandu, Nepal,
May 2015
(provided by GISTDA)

2. File-sharing needs

This requires:

- A lot of storage
- Capacity for high bandwidth upload and download
- No limitations on the amount we can upload/download with our hosts
- Easy to use interface
