and Water Resources

Electronic Certification - Australia

Barbara Cooper

Electronic Certification

Where to start?

- Consideration of current export process and systems
- Consideration of current import process and systems
- Use of the UNCEFACT standard / Business International Standard

First Steps

Have a Plan

- Identify Key markets
- Identify preferred commodities
- Make contact
 - Bilateral meetings
 - Other forums

Creating an exchange

Successful steps

- Face to face meetings
- Technical workshops
 - Map from paper to XML
 - Agree to the mapping
 - Agree to a transmission mechanism
 - Identify a point of contact
- Share information

What Else?

Other things to consider

- How to introduce eCert without impacting trade
- Current Flow of the paper Document
 - How will eCert change or affect this
 - Do other agencies use the paper certificate for clearance
- Can we move to paperless trading
 - Is there legislation changes to consider
 - Is an agreement between the two countries required

Security

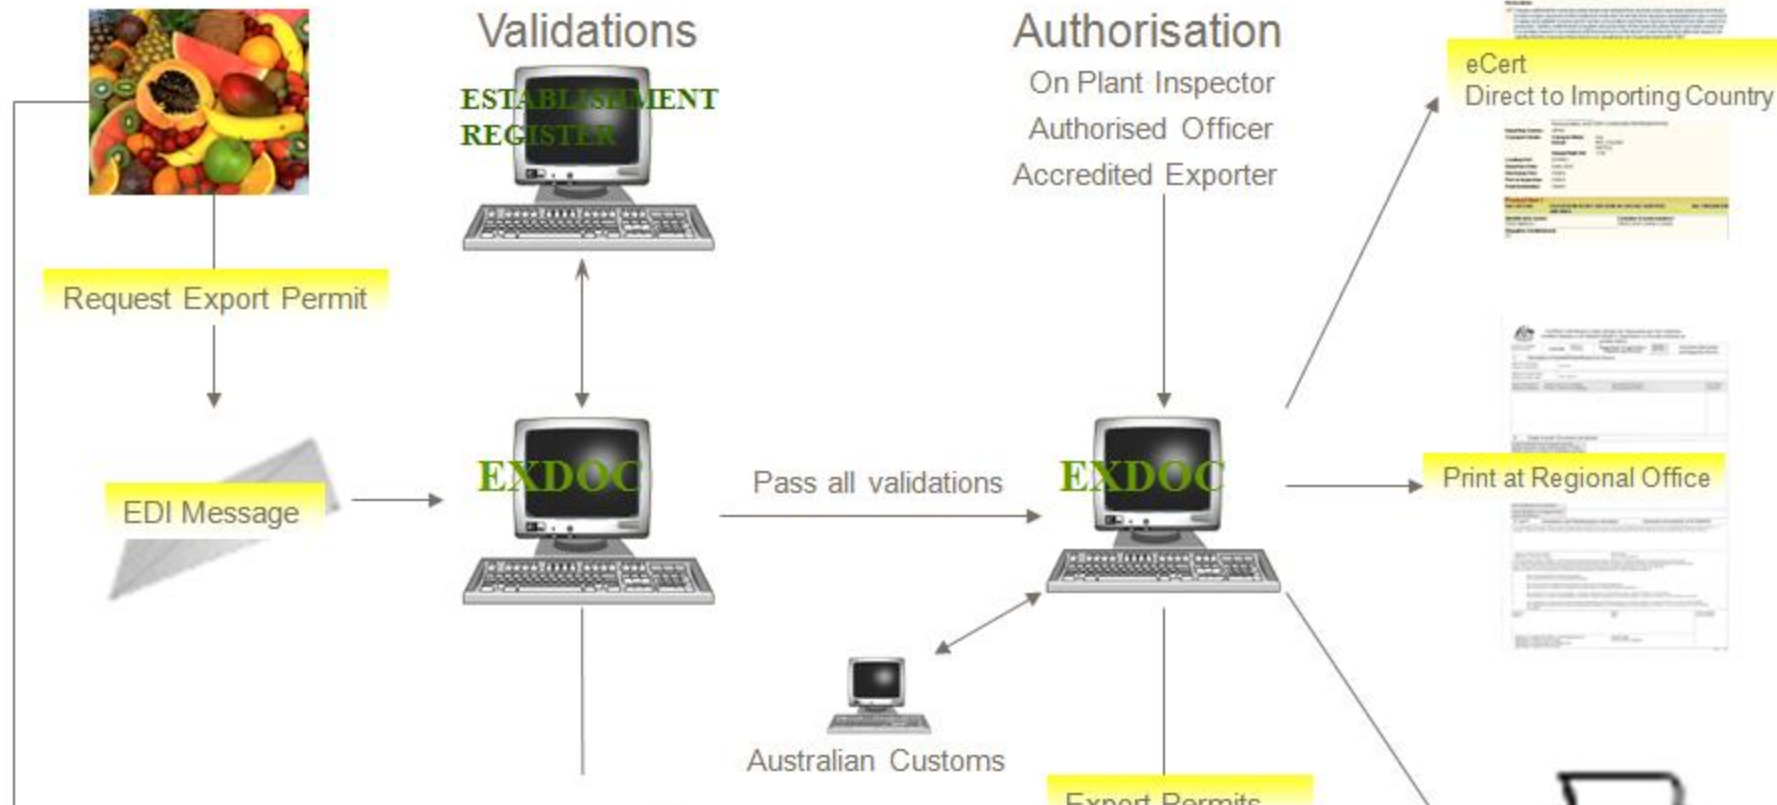

How much is too much?

- Paper Certificates
 - Who handles the paper certificates?
 - Where does it travel?
 - How long does it take?
- eCert exchange security benefits
 - Government to Government
 - Restricted access
 - Quick delivery

Moving from paper to eCert is a significant step toward secure trading.
