NPC
National Planning Commission

Post Disaster Needs Assessment
Process and Key Findings

Prof Dr Govind Raj Pokharel
Vice Chairman

What is a PDNA?

❑ **A methodology and a framework to assist governments to estimate the extent of disaster's effects and impact across all sectors and social groups;**

❑ **A tool to support country-led assessments to initiate recovery planning processes through a coordinated inter-institutional platform integrating the concerted efforts of national and international partners.**

❑ **An instrument to** produce an actionable and sustainable recovery strategy for mobilizing financial and technical resources.

❑ A process to estimate of recovery costs and recommend strategies for the way forward

Assumptions & Limitations

➢ **The data set for damages and losses fully not complete due to**
- Scale of disaster;
- Time constraint;
- Remoteness of the areas;
- Competing priorities.

➢ Extrapolation of data in many sectors based on
  - ✓ CBS assessment of impact on GDP
  - ✓ Survey of damages
  - ✓ Unit costs
  - ✓ Specifications for improved reconstruction

➢ Costing based on
  - ✓ Current market prices
  - ✓ Improved standards
  - ✓ Logistical challenges

Initiatives and milestones achieved by NPC

| Activity	Date
Coordination meetings to draw up sectors for assessments	May 15, 2015
Organized PDNA training workshop for over 250 persons from line ministries, donor agencies, and civil society	May 20, 2015
Formed Sector Groups with focal points, sector team leads and members during the workshop	May 20, 2015
Sector groups discussions and finalization of assessment methodology and presentation to other sectors for comments, ad finalization of delivery schedules	May 21, 2015
Sector leads coordination meetings with PDNA Secretariat – – led by NPC for updating collection of data, facilitation of field visits and meetings with data sources	Every third day from May 22 to June 8 , 2015

Initiatives and milestones achieved by NPC

Activity	Date
Debriefing of Members of CCG and combined review of progress with line Ministries and Sector Leads of 23 sectors	June 4, 2015
Receipt, review and revision of data by Core Coordination Group (CCG) members	June 2 to 10 , 2015
Submission of zero draft sector reports to PDNA CCG by sector teams	June 4, 2015
Consultations with elected members of the Constituent Assembly representing worst affected 14 districts	Jun19e 6 , 2015
Review of sector reports and data by CCG and providing comments to sector team focal point in line ministries and team leads + discussion & updation of data flow with NPC members	June 4 to 9, 2015

Initiatives and milestones achieved by NPC

Activity	Date
Review of Data sheets by NPC members	June 8, 2015
First consolidated draft report forwarded to NPC for review by CCG	June 10, 2015
Review, reconciliation & validation of data with sector teams by NPC members and CCG	June 11 & 12 , 2015
Consultations with heads & representatives of CCG members & other selected donor agencies	June 11 & 12 , 2015
Preliminary Findings already considered in full meeting of NPC, chaired by Rt. Hon'ble Prime Minister	June 12 , 2015
Stakeholders consultation (Pvt Sector, Civil Society, Political party, Experts, others)	June 13, 2015

Recovery strategy is a multi-dimensional solution that aligns needs with resources and delivery model

A Stakeholder alignment

B Identify areas/ sectors that needs to be rebuilt

C Identify resource requirements

D Prioritize fimpact and implemen- tation

E Funding strategy and resources

F Identify delivery model, policy for sector

Objectives

- Identify major areas for reconstruction, i.e., <u>what needs to be done</u> in each sector to recover from the disaster

- Identify <u>all aspects of resources</u> required for each sector recovery – HR, materials, monetary etc

- Identify critical areas for reconstruction using a <u>rigorous and agreed upon framework to prioritize</u>

- Identify and <u>match funding resources</u> for each area

- Identify the execution model for sector, i.e., <u>how to get things done, including governance structure , & Monitoring and Evaluation criteria</u>

Nepal employed globally accepted PDNA methodology to assess the impact of earthquake

PDNA assessed damages, losses and needs...

- **Damage** to infrastructure and physical assets in public and private sectors

- **Losses** of production of goods and services and access to goods and services;

- **Effects on governance** and decision making processes

...in consultation with all stakeholders...

- All line ministries

- 30 Development partners

- Private sector

- Civil Society

- Academia

- Technical agencies

- Briefing to Parliamentary

...via categorization in 4 major sectors and 23 themes

Social
Housing
Health
Education
Nutrition
Cultural Heritage

Infrastructure
Electricity
Communications
Community
Transport
Water

Productive
Agriculture
Irrigation
Commerce
Industry

Cross-Cutting
Governance
Disaster
Environment
Gender
