

# Valuing Waste, Transforming Cities

ESCAP is the regional development arm of the United Nations and the main economic and social development centre for the United Nations in Asia and the Pacific. Its mandate is to foster cooperation among its 53 members and 9 associate members. ESCAP provides the strategic link between global and country-level programmes and issues. It supports governments in consolidating regional positions and advocates regional approaches to meeting the region's unique socioeconomic challenges in a globalizing world.

This publication was printed with vegetable-based oil ink on green series paper made of 100 per cent ecofibre.

# **Valuing Waste, Transforming Cities**

# Acknowledgements

This publication draws on the lessons of six years of sustained engagement by ESCAP, Waste Concern and its partners on issues of municipal solid waste management across the Asia-Pacific region, under the project Pro-Poor and Sustainable Solid Waste Management in Secondary Cities and Small Towns in Asia-Pacific, with funding from the Bill and Melinda Gates Foundation.

The publication was prepared under the overall guidance of Donovan Storey, Chief, Sustainable Urban Development Section, Environment and Development Division of ESCAP, and by a team under the direction of Lorenzo Santucci, Economic Affairs Officer, Sustainable Urban Development Section, Environment and Development Division of ESCAP.

The main contributors from the ESCAP secretariat were: Rowan Fraser, Lorenzo Santucci, Donovan Storey, Joao Aleluia and Joris Oele. The report benefited also from data consolidated by Laksiri Chomchuen.

Iftekhar Enayetullah and Abu Hasnat Md. Maqsood Sinha of Waste Concern in Bangladesh provided technical review and inputs.

Country partners provided valuable inputs and data, including Heng Yon Kora, Community Sanitation and Recycling Organization in Cambodia; Sumaira Gul, Dr Akhtar Hameed Khan Memorial Trust in Pakistan; Jayaratne Kananke Arachchilage and H.M.U. Chularathna, Sevanatha Urban Resource Centre, and Ekanayaka Banda, Micro Enriched Compost Ltd in Sri Lanka; and Ngo Huy Liem and Nguyen Thị Hoài Linh, Environment and Development in Action in Viet Nam.

The publication draws on qualitative and quantitative data, lessons and findings generated through a range of knowledge-gathering mechanisms. These include interviews, focus group discussions, monitoring reports, annual reports and regional and national workshops conducted by ESCAP, its project partners and project stakeholders in countries of operation.

ESCAP would like to thank its partners for their generous contribution, time and commitment to the project, demonstrated over several years, as well as to the development of this publication.

Photographic content for this publication was developed by Brent Lewin, Alejandro Hita and Kibae Park for ESCAP. Ida Zaline Lien and Duncan Munro contributed to the sourcing of additional photographic material and associated graphic content. Photo on page 49: Paul Prescott/Shutterstock.com

The publication was edited by Karen Emmons. It was designed by Jeff Williams.

Paradee Pethaibanlue provided administrative assistance.

<b>Acronyms and abbreviations</b>	vii
-----------------------------------	-----

<b>Executive summary</b>	viii
--------------------------	------

## **PART I**

<b>OUT OF THE WASTE CRISIS</b>	1
--------------------------------	---

<b>Introduction</b>	3
---------------------	---

<b>1. The waste crisis in Asia and the Pacific and the urgent need for change</b>	4
---	---

1.1 Escalating waste	4
----------------------	---

1.2 Overburdened local governments	5
------------------------------------	---

1.3 The opportunity to turn waste into a resource	6
---	---

1.4 Recovering the value of waste	7
-----------------------------------	---

1.5 An affordable and practical model for waste recovery	8
--	---

<b>2. An inexpensive solution for transforming waste into resources:</b>	
<b>The integrated resource recovery centre</b>	9

2.1 The integrated resource recovery centre model	9
---	---

2.2 Why integrated resource recovery centres are versatile solutions	10
--	----

2.3 How integrated resource recovery centres transform waste into resources	12
---	----

<b>3. The benefits of waste-to-resource initiatives</b>	15
---	----

3.1 Economic benefits of waste-to-resource initiatives	16
--	----

3.2 Social benefits of waste-to-resource initiatives	17
--	----

3.3 Environmental benefits of waste-to-resource initiatives	19
---	----

<b>4. Critical requisites for successful waste-to-resource initiatives</b>	22
--	----

Requisite 1. Government commitment	22
------------------------------------	----

Requisite 2. Cost-recovery	25
----------------------------	----

Requisite 3. Waste separation at source	27
---	----

Requisite 4. Stakeholder engagement	29
-------------------------------------	----

## **PART II**

<b>LESSONS LEARNED</b>	33
------------------------	----

<b>Introduction</b>	35
---------------------	----

<b>1. Building partnerships</b>	36
---------------------------------	----

1.1 The importance of partnership	36
-----------------------------------	----

1.2 Developing new models for partnerships	37
--	----

1.3 Understanding partner contributions and resources	45
---	----

1.4 Lessons learned for building partnerships	48
---	----

<b>2. Improving awareness and changing behaviour</b>	50
2.1 The importance of valuing waste	50
2.2 Advancing behaviour change and source separation	51
2.3 Lessons learned for improving awareness and changing behaviour	57
<b>3. Managing facilities and improving operations</b>	60
3.1 The importance of a sound business approach	60
3.2 Achieving financial sustainability over the long term	61
3.3 Lessons learned for management and operations	67
<b>4. Creating an enabling environment for scaling up and replication</b>	69
4.1 The importance of an enabling environment	69
4.2 Strategies for advancing policy change and replication	71
4.3 Lessons learned for enabling and scaling up waste-to-resource initiatives	75
 <b>PART III</b>	
<b>CITY PROFILES</b>	77
<b>Introduction</b>	79
<b>Kushtia, Bangladesh</b>	81
<b>Battambang, Cambodia</b>	85
<b>Kampot, Cambodia</b>	89
<b>Islamabad, Pakistan</b>	93
<b>Matale, Sri Lanka</b>	97
<b>Ratnapura, Sri Lanka</b>	101
<b>Kon Tum, Viet Nam</b>	105
<b>Quy Nhon, Viet Nam</b>	109

# Boxes

Box 1. Conception and development of the first integrated resource recovery centre	11
Box 2. Meet the workers in Kampot, Cambodia	18
Box 3. Quantifying the benefits of waste recovery	20
