

Regional Conference on Aligning Corporate Sustainability with SDGs

20 May 2015

United Nations Conference Centre (UNCC), Bangkok, Thailand

At the United Nations Conference on Sustainable Development, held in Rio de Janeiro in 2012 (Rio+20), member States adopted an Outcome Document, The Future we Want and agreed to launch a process to develop Sustainable Development Goals (SDGs), building on the Millennium Development Goals, as part of the post-2015 development agenda. The intergovernmental Open Working Group (OWG) set up for this purpose presented its proposal in July 2014 on what the SDGs should be, comprising 17 goals and 169 targets.¹ The SDGs are expected to be adopted at the United Nations summit on 25-27 September 2015.

The Rio+20 conference also called for a balanced integration of the three dimensions of sustainable development: economic efficiency, social inclusion and environmental protection. This will be the focus of the Second Asia-Pacific Forum on Sustainable Development, to be held on 21 and 22 May 2015 in Bangkok, which will provide regional input to the global High-level Political Forum on Sustainable Development at the global level.

Given the imminent adoption of SDGs and the core role business needs to play in achieving sustainable development, this regional conference is organized by ESCAP, in collaboration with the Organisation for Economic Co-operation and Development (OECD), the Global Reporting Initiative (GRI) and the ESCAP Business Advisory Council (EBAC) and its Sustainable Business Network. The aim is to gather business views as input to the Asia-Pacific Forum on Sustainable Development, as well as to provide input to the G20 workstream on inclusive business. The conference will:

- Examine what the SDGs mean for business and seek business views on the role of Asian-Pacific business in achieving sustainable development and implementing the SDGs.
- Propose tools and strategies to improve and align business sustainability strategies with the SDGs.
- Showcase examples of responsible and inclusive business initiatives from the Asia-Pacific region.
- Provide guidance to policy makers on what is needed to advance corporate sustainability in the region.

In particular, the conference will centre around the following three main questions:

1. How does the private sector in the region view its role in achieving sustainable development and the SDGs? What is needed to increase the willingness and ability of the private sector to adopt

¹ See e.g. A/68/970, and <https://sustainabledevelopment.un.org/index.php?page=view&type=400&nr=1579&menu=1300>

responsible business practices that effectively integrate the three dimensions of sustainable development?

2. What can governments do to provide an enabling environment for business to be an effective partner in achieving sustainable development?
3. What are the main modalities, international initiatives and instruments to advance corporate sustainability and responsible business practices and how do they link to SDGs? What additional frameworks, tools or policies are needed to help business align sustainability strategies with SDGs and contribute to SDG implementation?

Tentative agenda

07.30 – 08.30	Registration
08.30 – 08.50	<p>Opening addresses</p> <p>Shamshad Akhtar, Under-Secretary-General of the United Nations and Executive Secretary of ESCAP</p> <p>Mohamed Iqbal Rawther, Chairperson, ESCAP Business Advisory Council (EBAC)</p>
