Table of Contents

I. Poverty and Development Cooperation

II. Poverty Reduction and Economic Dynamics in Northeast Asia

III. Sharing Development Experiences for Development Effectiveness

IV. Concluding Remarks

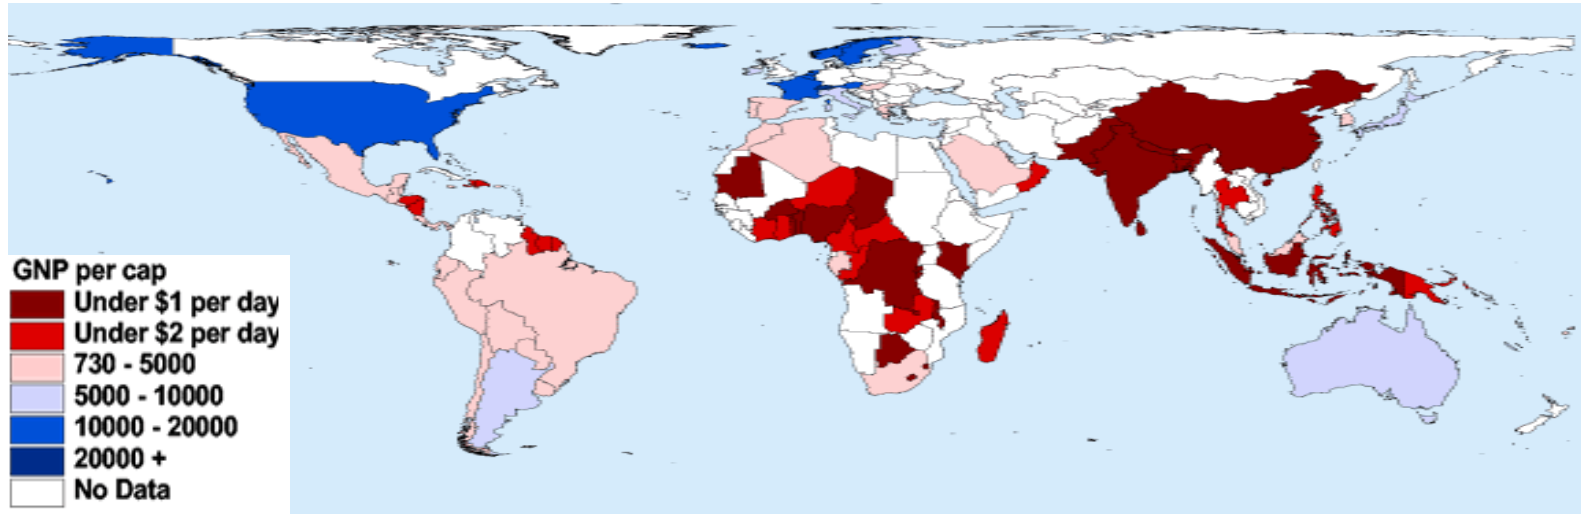

I. Poverty and Development Cooperation

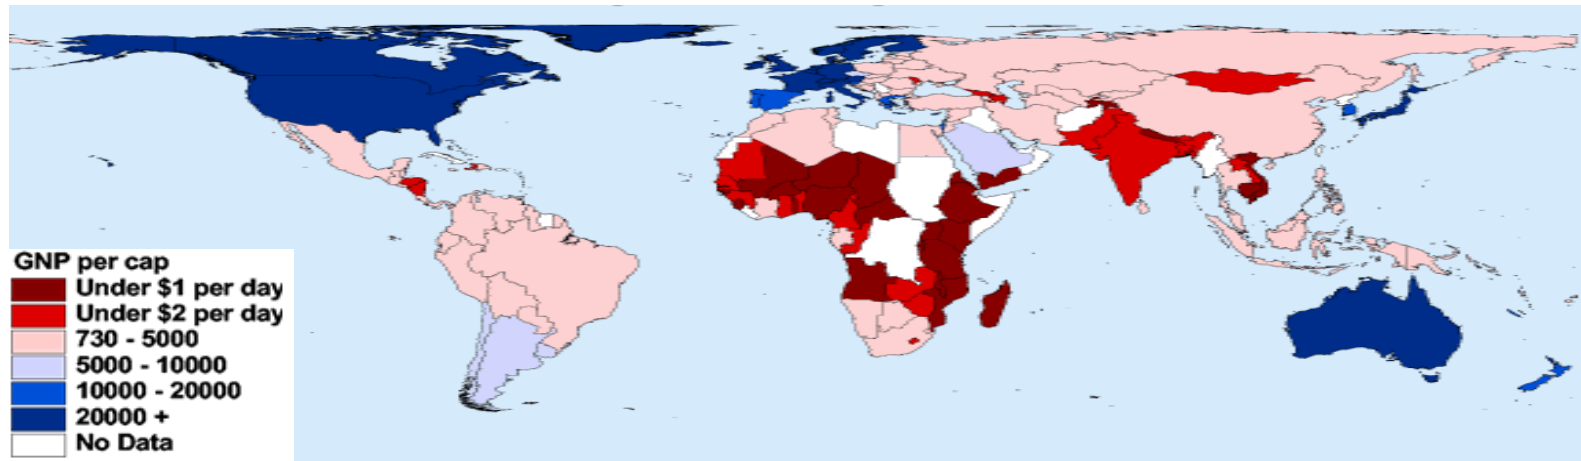

In spite of global efforts by the global community, no significant economic development in the world has been witnessed except in East Asia.

I. The feature of international development since 1960s

[Year 1960]

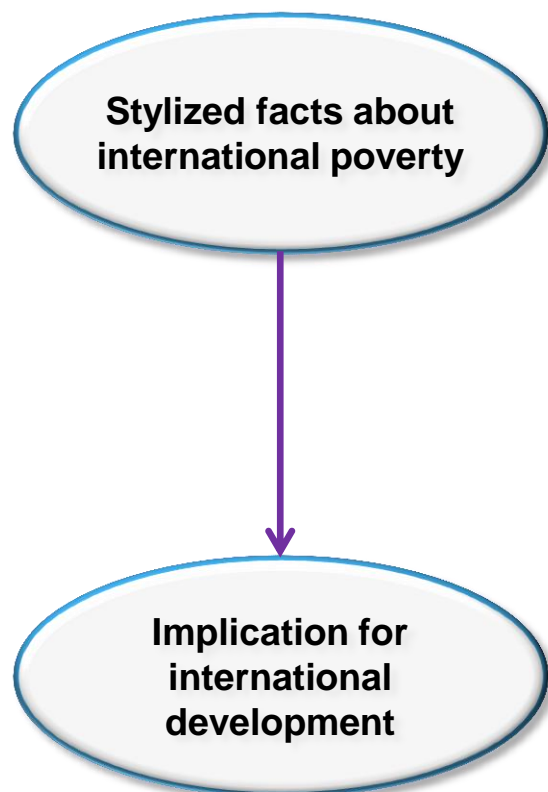

[Year 1999]

2. Stylized facts about international poverty and its implication

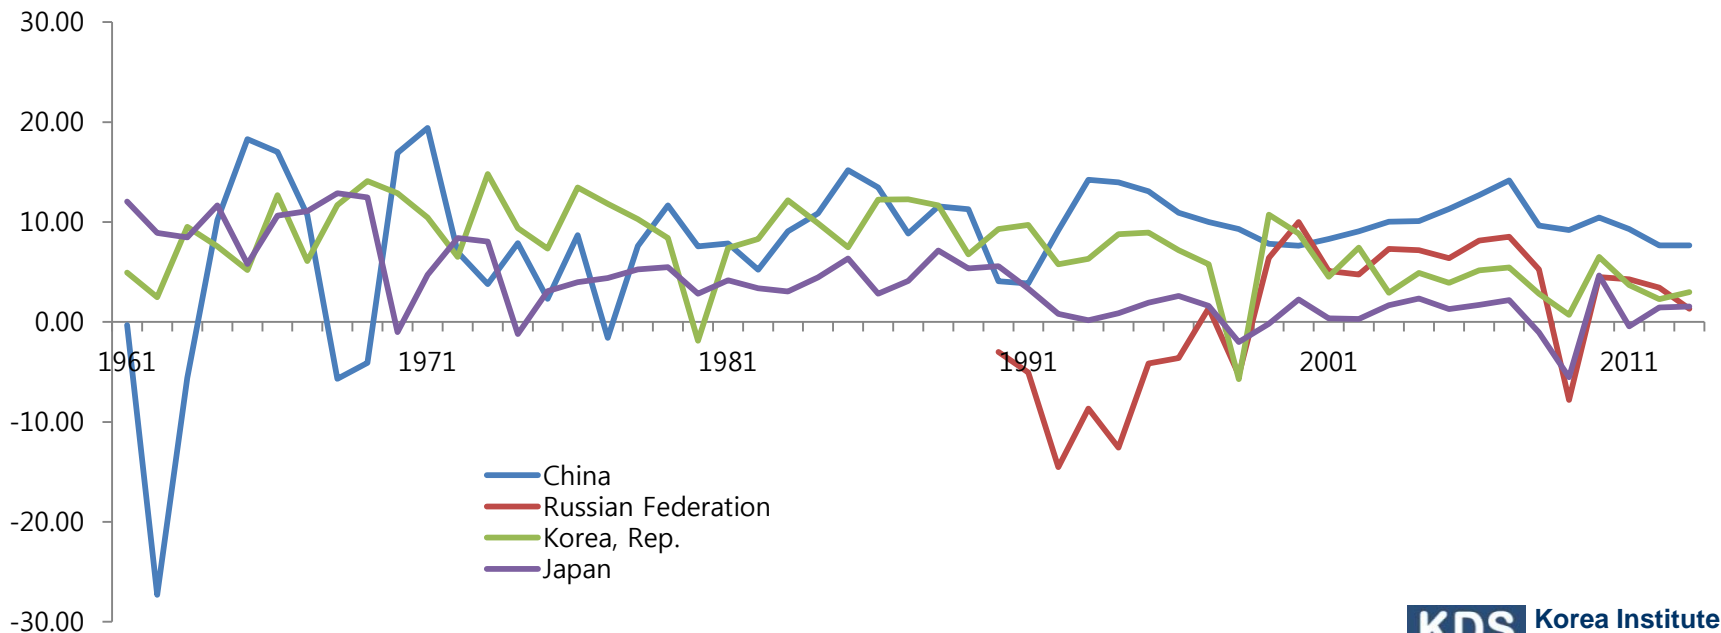

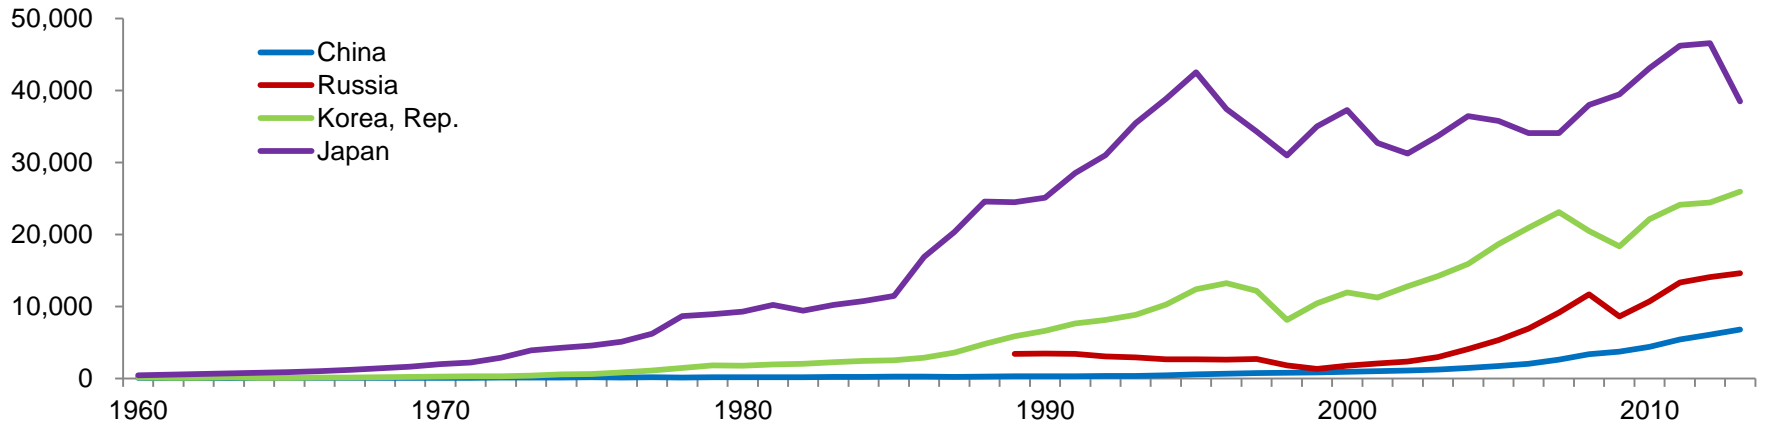

- Few countries have achieved significant progress in poverty reduction
- In Africa, in spite of enormous foreign financial assistance, poverty remained almost unchanged
- East Asia is the only region with such progress
- Northeast Asia is the core of the East Asian growth dynamics
- The wave of development spreads to neighboring countries in Asia

- Poverty reduction is never an easy task to be accomplished
- Economic dynamics in Northeast Asia provides a clue for international development
- In poverty reduction and economic development, reducing knowledge gap among countries seems to be as important as financial assistance

II. Poverty Reduction and Economic Dynamics in Northeast Asia

The four Northeast Asian countries show great dynamism, although their stages of development are different from one another.

I. Economic dynamics in Northeast Asia

The four countries are in a position to provide practical knowledge and expertise in development cooperation with a good supplementary relationship.

2. Strength and weakness of the Northeast Asian countries in development cooperation

	Strength	Weakness
 Japan	<ul style="list-style-type: none">• Skills in development cooperation• Full experience of national development• Financial capacity in foreign aid	<ul style="list-style-type: none">• Vividness of experience in state-building and economic development
 Korea	<ul style="list-style-type: none">• Vivid experience of state-building and economic development• Experience as an aid recipient• Completed stage in industrialization	<ul style="list-style-type: none">• Financial capacity in foreign aid
 China	<ul style="list-style-type: none">• Rapid industrialization and economic growth• Transition economy• Financial capacity in foreign aid• Management of huge population with large	<ul style="list-style-type: none">• Maturity in industrial development• Experience of development aid
