Exports of beans from Myanmar

Given normal weather conditions, Myanmar's bean and pulse production should continue to rise to 5.04 MMT in MY 2013/14 and 5.16 MMT in MY 2014/2015 due to an expansion in growing area.

Myanmar's bean and pulse exports in MY 2013/14 are estimated to grow significantly by 14 percent to 1.6 MMT from 1.4 MMT in MY 2012/13 due mainly to increased export demand from India. India is likely to remain as the largest market for Myanmar's bean and pulse exports in MY 2013/14. Demand from China is also likely to increase. In MY 2014/15 bean and pulse exports are forecast to reach 1.63 million tons, an increase of 2 percent from MY 2013/2014.
